

Welcome to the Kult!

Because reality is just a corporate psy-op waiting to be vandalized.

Uncle FrizzleBob's Kayfabizarro Komik Kult Kards

POWER: Smashes through the fourth wall to deliver epistemic sabotage directly to the prefrontal cortex.

LORE: The truth isn't found in textbooks; it's scribbled in the margins by the people they locked out of the room.

KayfaBIZARRO!

The Rules of Engagement

POWER: Dictates the mechanics: Cut on the dotted lines, build your deck, and trust no authority.

LORE: A game is just a reality you willingly consent to—choose yours carefully.

The Wimmelbild Warning

POWER: Forces the player to observe the margins where the real story is hiding.

LORE: If you're only looking at the center, you're missing the punchline.

KayfaBIZARRO!

Hilfe, ich bin ein Mensch!

POWER: Initiates the Human Nature expansion pack, activating all psychology and anthropology artifacts.

LORE: The ultimate cosmic joke: Being biologically wired for love in a society built for spreadsheets.

What the
FLUFFY!

Survival of the Friendliest

Nature red in tooth, claw, and deeply interconnected networking events.

Charles Darwin - Der kooperative Vorfahre

KayfaBONGO!

POWER: When played, all players share one example of cooperation, adding [A+1] to the Stage.
LORE: Darwin knew cooperation wasn't evolution's enemy, but its main engine—sympathetic communities flourish best.

Robert Axelrod - Der Spieltheoretiker

POWER: Allows you to copy the dice value of a player who helped you; reciprocity becomes your shield.
LORE: Even among pure egoists, the mathematical certainty is that Tit for Tat cooperation wins the long game.

Lynn Margulis - Die Endosymbiontin

POWER: Merges two cards on the Stage into a single, dominant entity with combined effects.
LORE: Life conquered the globe not by combat, but through microscopic networking and cellular fusion.

SYNTHESIS - The Evolution Matrix

POWER: Synthesizes the board: cancels all active competitive multipliers and resets the baseline to cooperative.
LORE: The Alpha Male myth is a statistical rounding error in an otherwise cooperative biosphere.

The Pain of the Pack

Why being left on read actually causes biological trauma.

Joachim Bauer - Der Spiegelneuron-Entdecker

POWER: Mirrors another player's emotion, granting both [A+1]; failing to mirror costs [A-1].
LORE: Mirror neurons ensure we are biologically designed for social resonance; we literally feel what others feel.

John Cacioppo - Der Einsamkeitsforscher

POWER: Marks a player as isolated, aggressively increasing their Fragility [F+2] every turn until they reconnect.
LORE: Chronic loneliness destroys the immune system and acts as a biological hunger signal for connection.

Matthew Lieberman - Der Soziale-Schmerz-Forscher

POWER: Punishes isolation with [F-2], but rewards reconnection immediately with [A+2].
LORE: Social pain is real pain—rejection activates the exact same brain regions as physical injury.

BLODSINN!

SYNTHESIS - The Empathy Circuit

POWER: Reveals hidden emotional states, allowing players to bypass logical defenses for one round.
LORE: We are not thinking machines that feel; we are feeling machines that occasionally

The Myth of the Blank Slate

Fairness was invented by monkeys long before we had courthouses.

Michael Tomasello – Der Kleinkind-Forscher

POWER: Morality functions automatically this round; trust replaces all dice rolls and calculation.
LORE: Morality isn't trained into us by society—toddlers help instinctively before they can even speak.

Ernst Fehr – Der Fairness-Ökonom

POWER: Sacrifice [A-1] to violently reduce an offender's Rivalry by [R-2]; justice demands a price.
LORE: We would rather burn our own resources than let an unfair actor walk away unpunished.

Frans de Waal – Der Primatenforscher

POWER: Triggers post-conflict reconciliation, restoring [A+2] to both parties and erasing conflict memory.
LORE: Empathy, consolation, and justice aren't human inventions; they are ancient evolutionary inheritances.

SYNTHESIS – The Scales of Fairness

POWER: Rebalances the Stage by redistributing hoarded resources equally among all active players.
LORE: True justice is a biological reflex, part nurturing hug, part spiteful rejection of the greedy.

The Homo Oeconomicus Autopsy

Dissecting the most dangerous fictional character ever invented.

Adam Smith – Der missverstandene Ökonom

POWER: Grants [A+2] if you consider others' welfare before your own; penalizes ignorance with [F-1].
LORE: The prophet of capitalism actually believed human nature was deeply rooted in empathy, a fact history conveniently forgot.

Rutger Bregman – Der Mythen-Dekonstrukteur

POWER: Challenges any selfish nature assumption; if debunked, all players gain [A+1] and [F-1].
LORE: Most cynical proofs of human evil are fabricated myths—deep down, humanity is aggressively decent.

Gary Becker – Der Homo Oeconomicus Architekt

POWER: Turns all actions into transactions; buys cooperation with [R+2], but permanently halves all trust effects.
LORE: By reducing all human behavior to a cost-benefit analysis, he built a perfect model of a sociopath.

SYNTHESIS – The Egoism Autopsy

POWER: Disables all purely transactional or selfish multipliers on the board for three consecutive rounds.
LORE: We built an entire global economic system for a species that doesn't actually exist.

The Generous Beast

Proof that giving things away is the ultimate biological flex.

C. Daniel Batson – Der Empathie-Experimentator

POWER: Lose [A-1] to give another [A+2]; if they pay it forward, you reap a massive [F-2] reward.
LORE: True altruism exists. We don't just help to feel good; we help because genuine empathy compels action.

Jorge Moll – Der Großzügigkeits-Neurowissenschaftler

POWER: Give away a card to trigger your brain's reward center: immediately gain [A+2] and [F-1].
LORE: Evolution hardwired generosity to the same neurological pleasure centers as food and sex.

Felix Warneken – Der Kleinkind-Helfer-Forscher

POWER: The first helpful action in a round automatically succeeds without a dice roll; purity bypasses calculation.
LORE: We are born helpers; toddlers will drop everything to assist a stranger without any promise of a reward.

SYNTHESIS - The Generosity Loop

POWER: Any altruistic action taken this round doubles in power and creates a cascading benefit to the next player.
LORE: Selflessness isn't a sacrifice; it is the most sophisticated dopamine hack in evolutionary history.

The Zoo's Illusion

How throwing money at a problem reliably makes everyone stupid.

Edward Deci – Der Intrinsische-Motivation-Forscher

POWER: Roll with advantage if acting from genuine interest; roll with disadvantage if bribed.
LORE: The Overjustification Effect: paying someone to do what they love is the fastest way to kill their passion.

Bruno Frey – Der Crowding-Out-Ökonom

POWER: Monetizing any cooperative action this round degrades all [A] values by 1.
LORE: Motivation Crowding Theory: putting a price tag on a civic duty destroys the moral desire to do it.

Dan Ariely – Der Irrationale-Anreize-Aufklärer

POWER: If offered a massive reward [R+3], you choke under pressure: roll twice and take the worse result.
LORE: The rational market is a joke; huge financial bonuses reliably cause performance-destroying panic.

SYNTHESIS - The Motivation Spectrum

POWER: Strips all financial and external reward buffs from the Stage, forcing players to rely purely on base stats.
LORE: Carrots and sticks are for donkeys; meaning and autonomy are for living beings.

The Extraction Engine

You are not the customer. You are the raw material.

Shoshana Zuboff - Die Überwachungskapitalismus-Analystin

POWER: Reveals all hidden tech influences for one round; choose to resist [R+2] or tragically comply [A-1].
LORE: Surveillance capitalism doesn't want your money—it wants to mine your behavior, predict your future, and sell it.

Jean M. Twenge - Die Smartphone-Generationen-Forscherin

POWER: Every screen-based artifact on the Stage actively increases Fragility (F+1) for all players.
LORE: Since 2010, the invisible umbilical cord to our screens has been silently mass-producing loneliness and anxiety.

Byung-Chul Han - Der Müdigkeitsgesellschaft-Philosoph

POWER: Pushing yourself beyond limits [R+4] causes immediate burnout, draining [F-3].
LORE: We are no longer exploited by cruel masters; we are the cheerful, self-optimizing architects of our own burnout.

SYNTHESIS - The Surveillance Cage

POWER: Traps all players in an algorithmic feedback loop, restricting moves until a Disconnect action is taken.
LORE: The modern world is a beautifully designed Skinner box, and we are paying a monthly subscription to stay inside.

Breaking the Cage

Reality is highly negotiable if you know how to redraw the lines.

Carol Dweck – Die Growth-Mindset-Psychologin

POWER: Reframes any failed roll as learning, banking an [A+2] bonus for your next related action.
LORE: The belief that you are unfinished is infinitely more powerful than the belief that you are gifted.

Robert Rosenthal – Der Pygmalion-Effekt-Entdecker

POWER: Declare a positive expectation about another player; if they believe it, both gain [A+2] and [F-1].
LORE: The Pygmalion Effect: Our expectations of others literally alter their reality and capabilities.

Martin Seligman – Der Gelernte-Hilflosigkeit-Forscher

POWER: Consume a past failure token to prevent a current collapse. Learned resilience is the ultimate shield.
LORE: Helplessness can be learned, but so can optimism—hope is a muscle that must be violently exercised.

SYNTHESIS - The Reality Redraw (Ellen Langer)

POWER: Notice one missed detail on the Stage to completely reinterpret its meaning, shifting the game context.
LORE: Mindfulness isn't meditation; it is the radical, reality-bending power of simply paying attention to the present.
