

CORE CLAYS

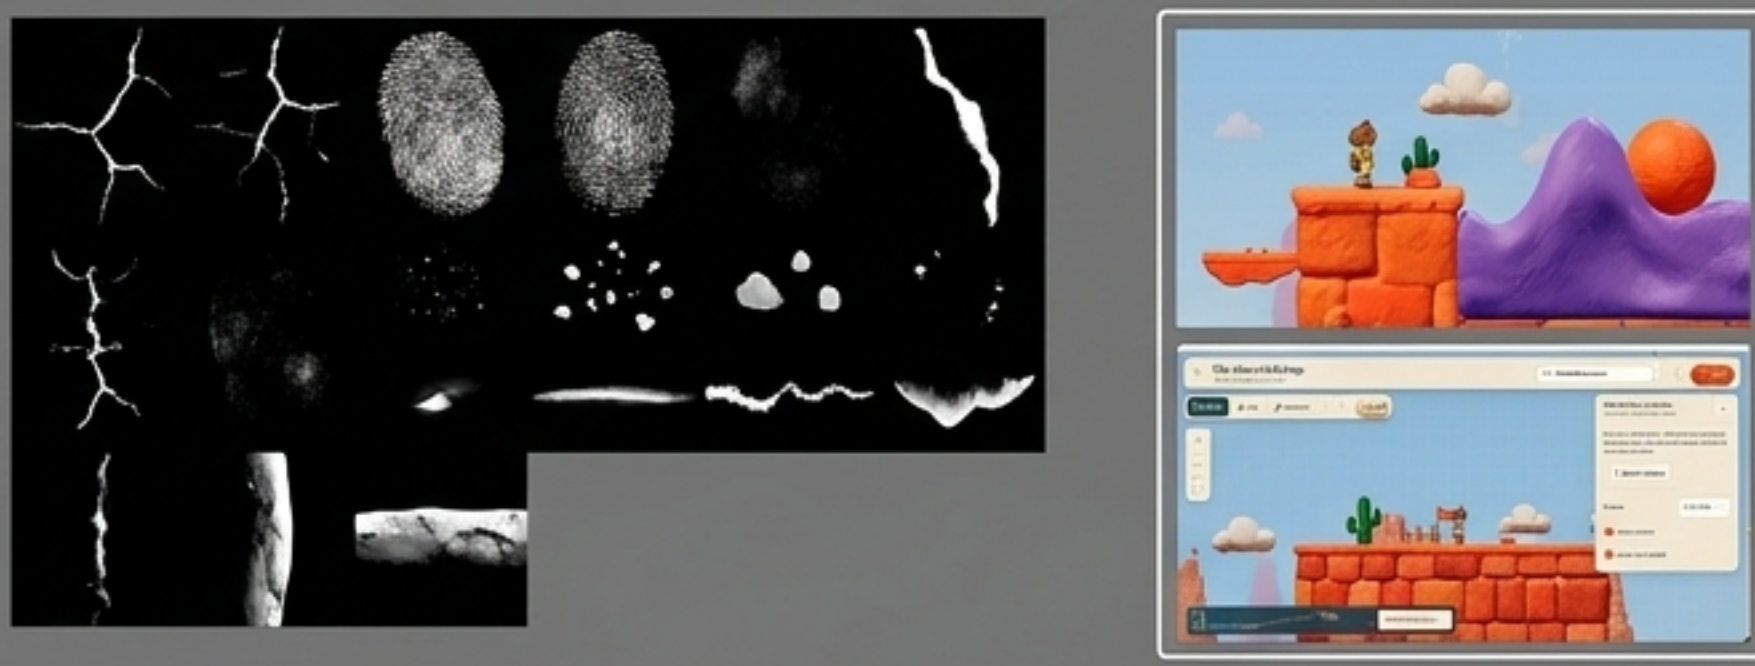

CRAFT MATERIALS

SHADER UTILITY MAPS

ALPHA CUTOUT DETAILS

Albedo / Base Color Roughness / Height Normal Maps Alpha Decals / Extraction Masks

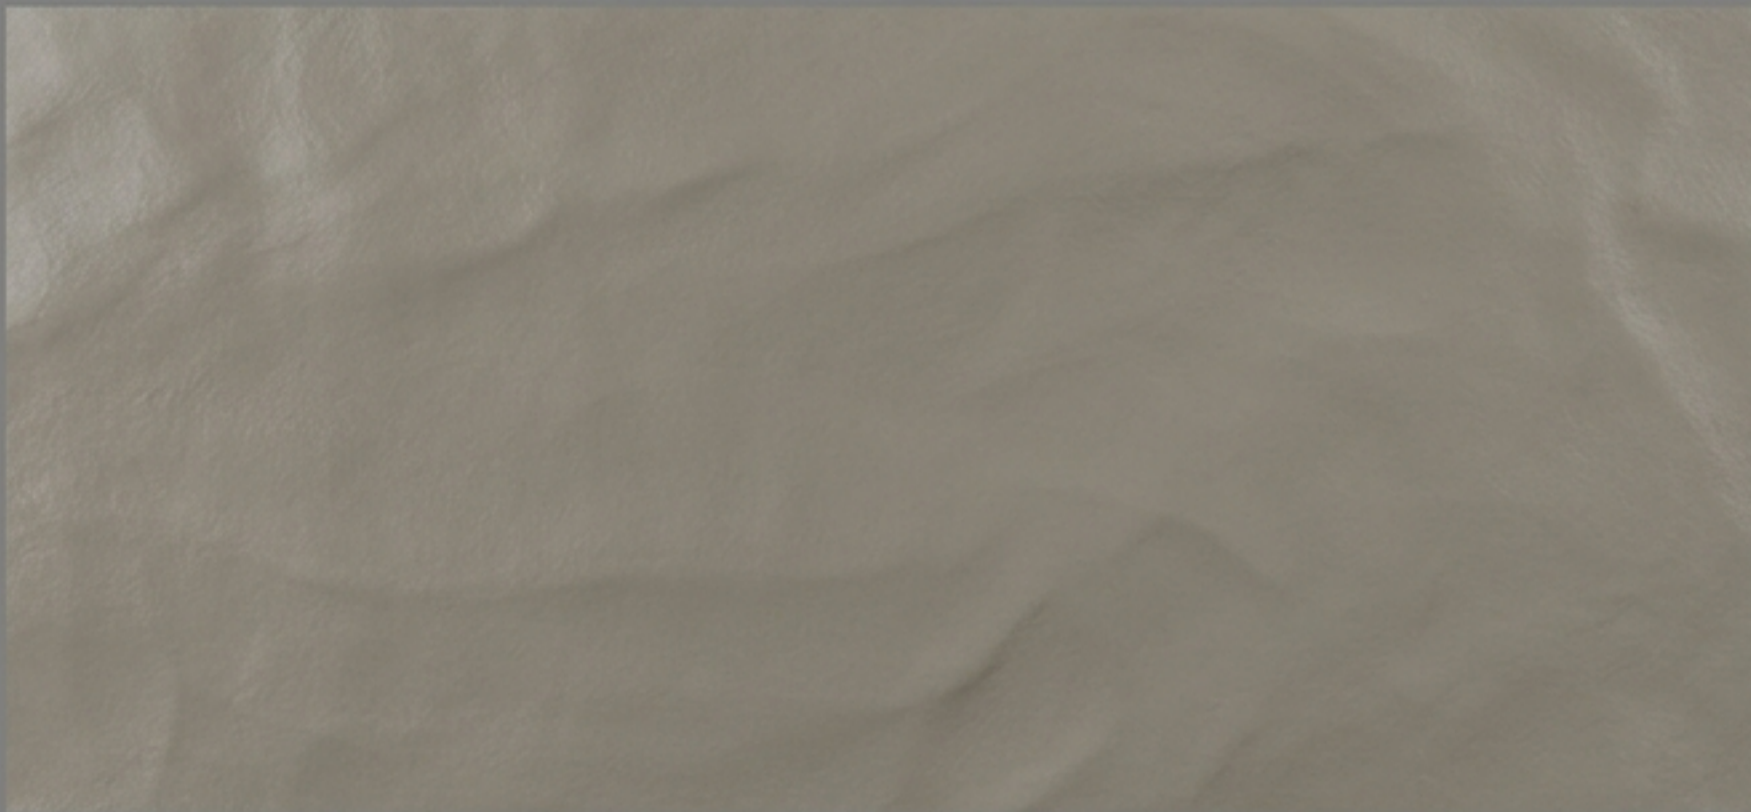

GLOBAL RULE: ZERO DECORATIVE ELEMENTS. EVERY PIXEL IS DEDICATED TO USABLE PRODUCTION

SWATCH A: MATTE STARCH CLAY

SWATCH B: SOFT PLASTICINE

SWATCH C: CONDITIONED CLAY

SWATCH D: DUST-SETTLED CLAY

SWATCH A: AERATED CLAY

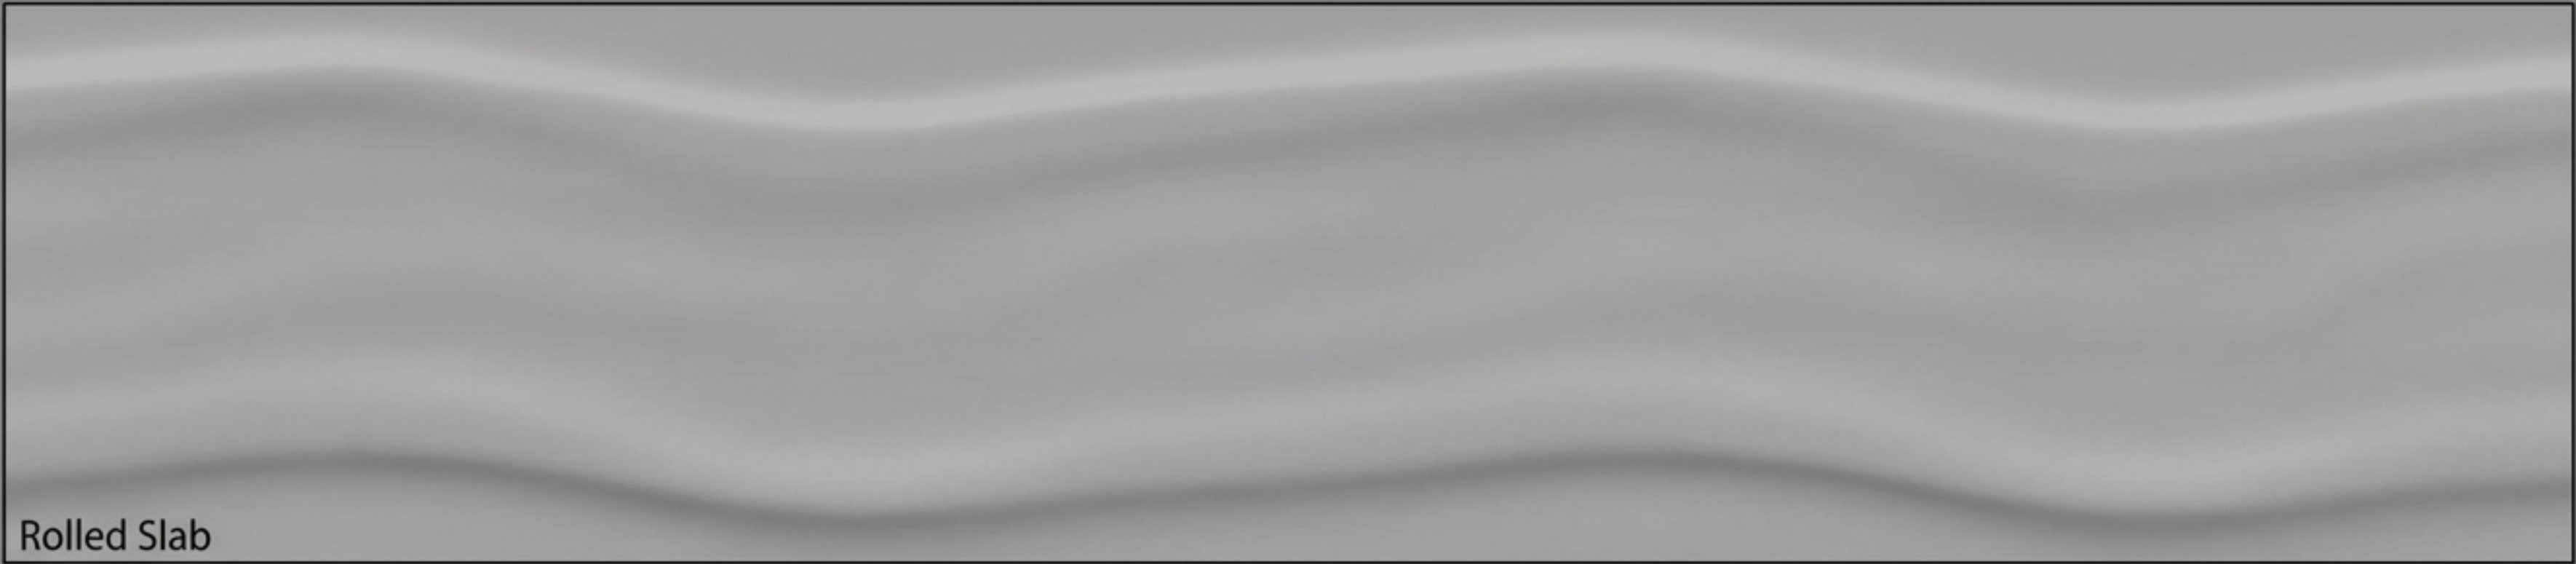

SWATCH B: DRY/CRACKED EDGES

SWATCH C: CHALKY/EARTHEN CLAY

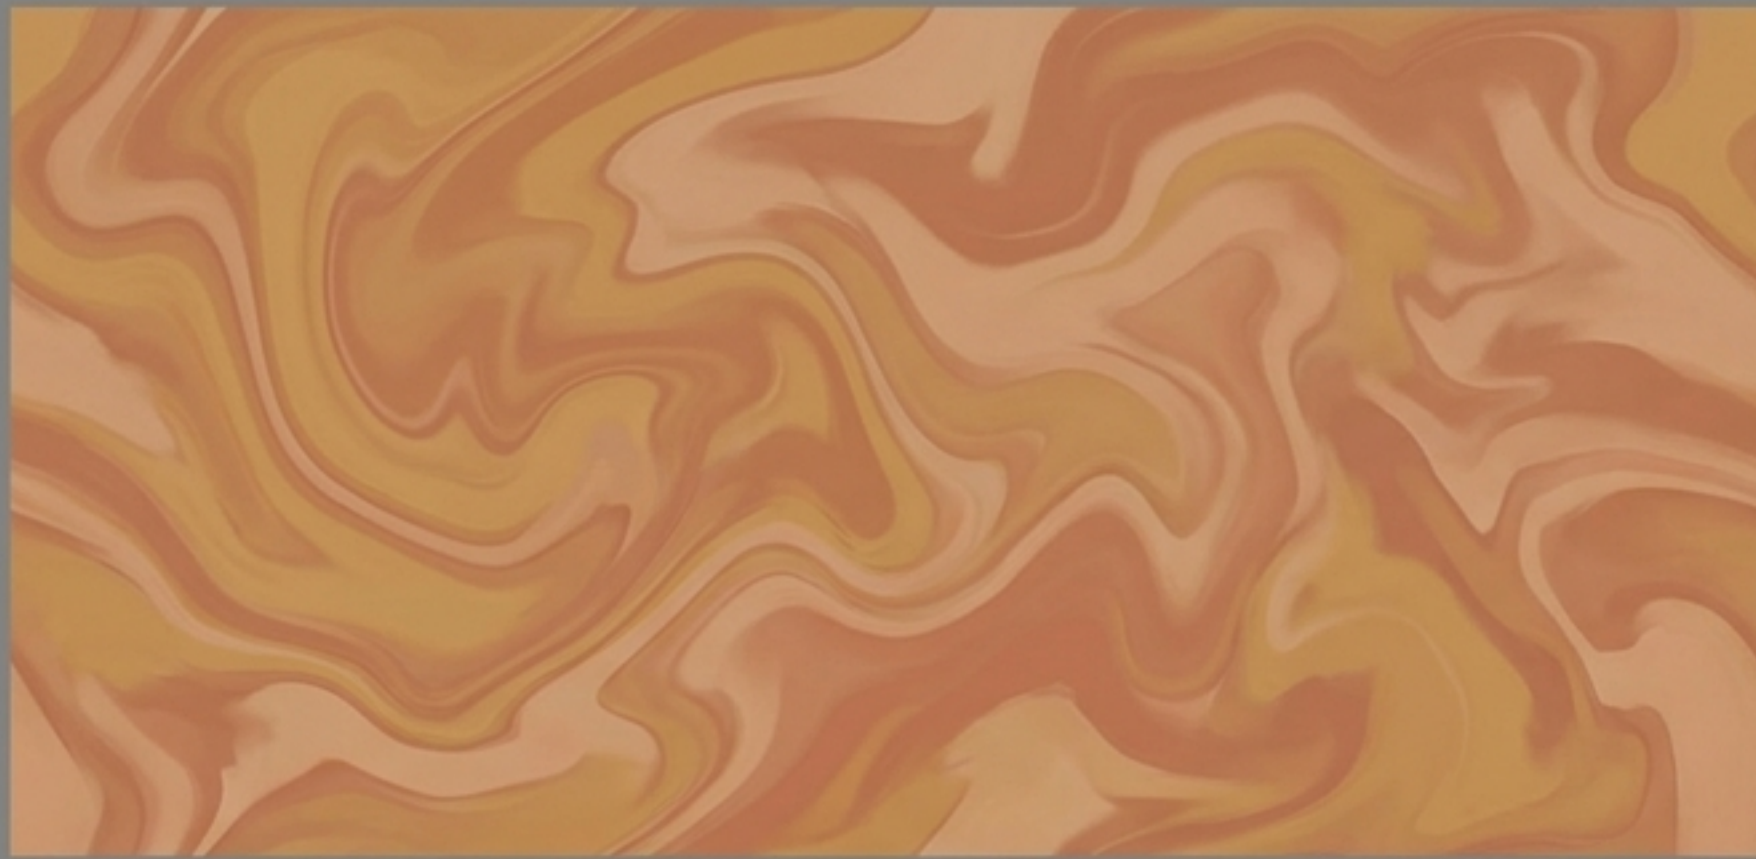

SWATCH D: OVER-WORKED CLAY

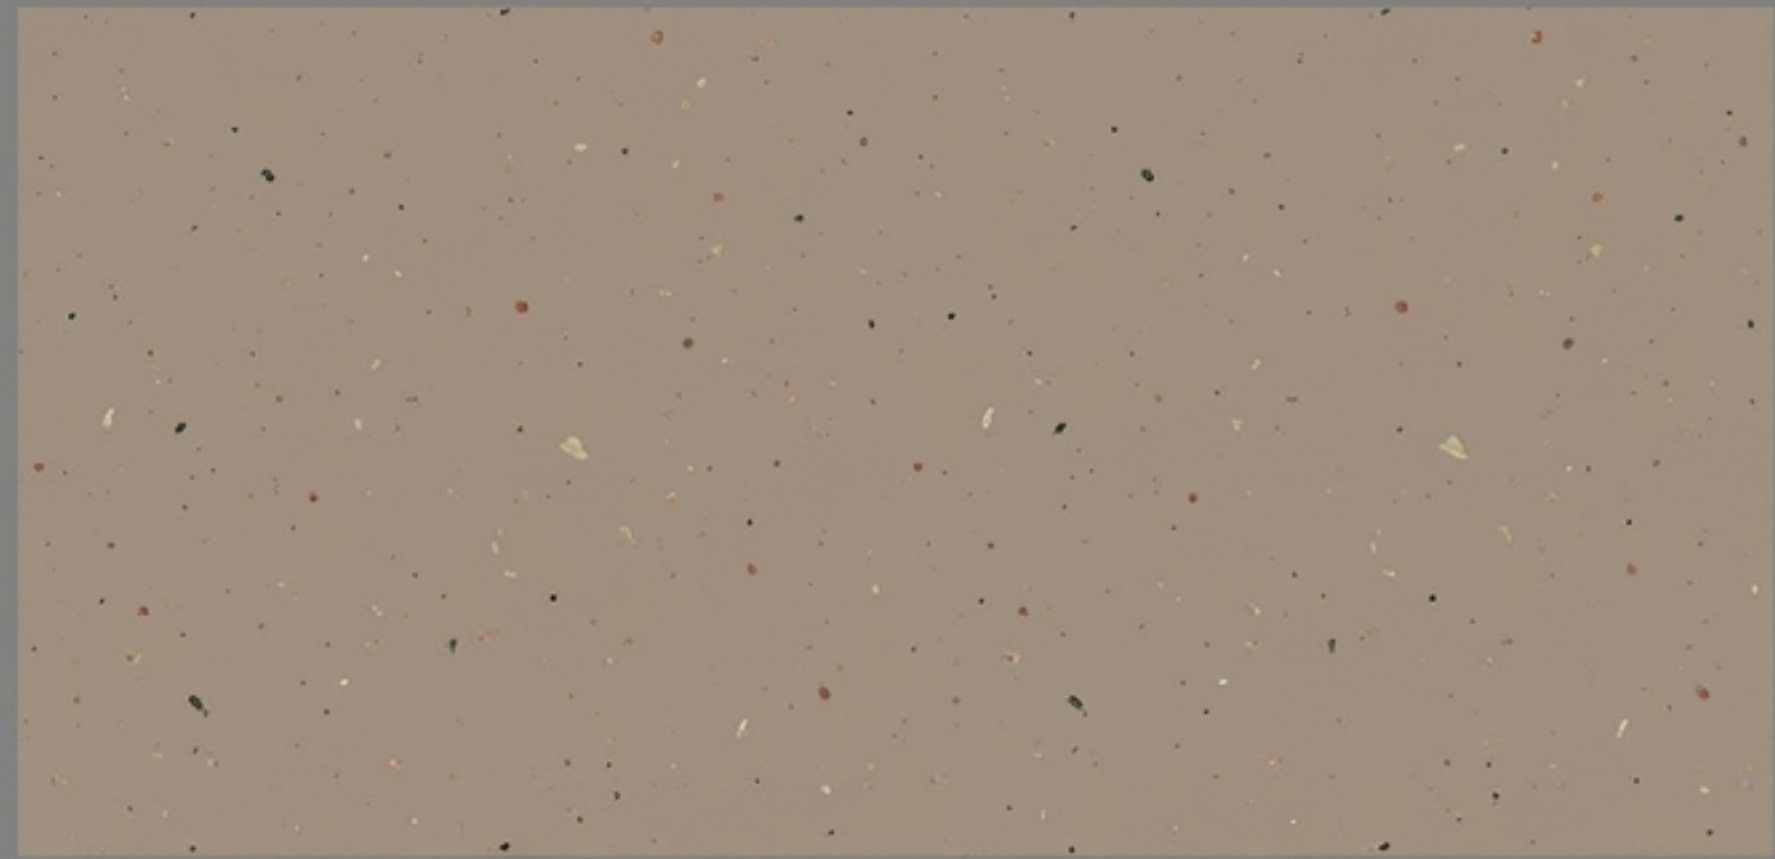

Designation: Meso-Sculpt Maps
Normal Strength: 0.30
UV Scale: Low-Frequency (3x repeat)

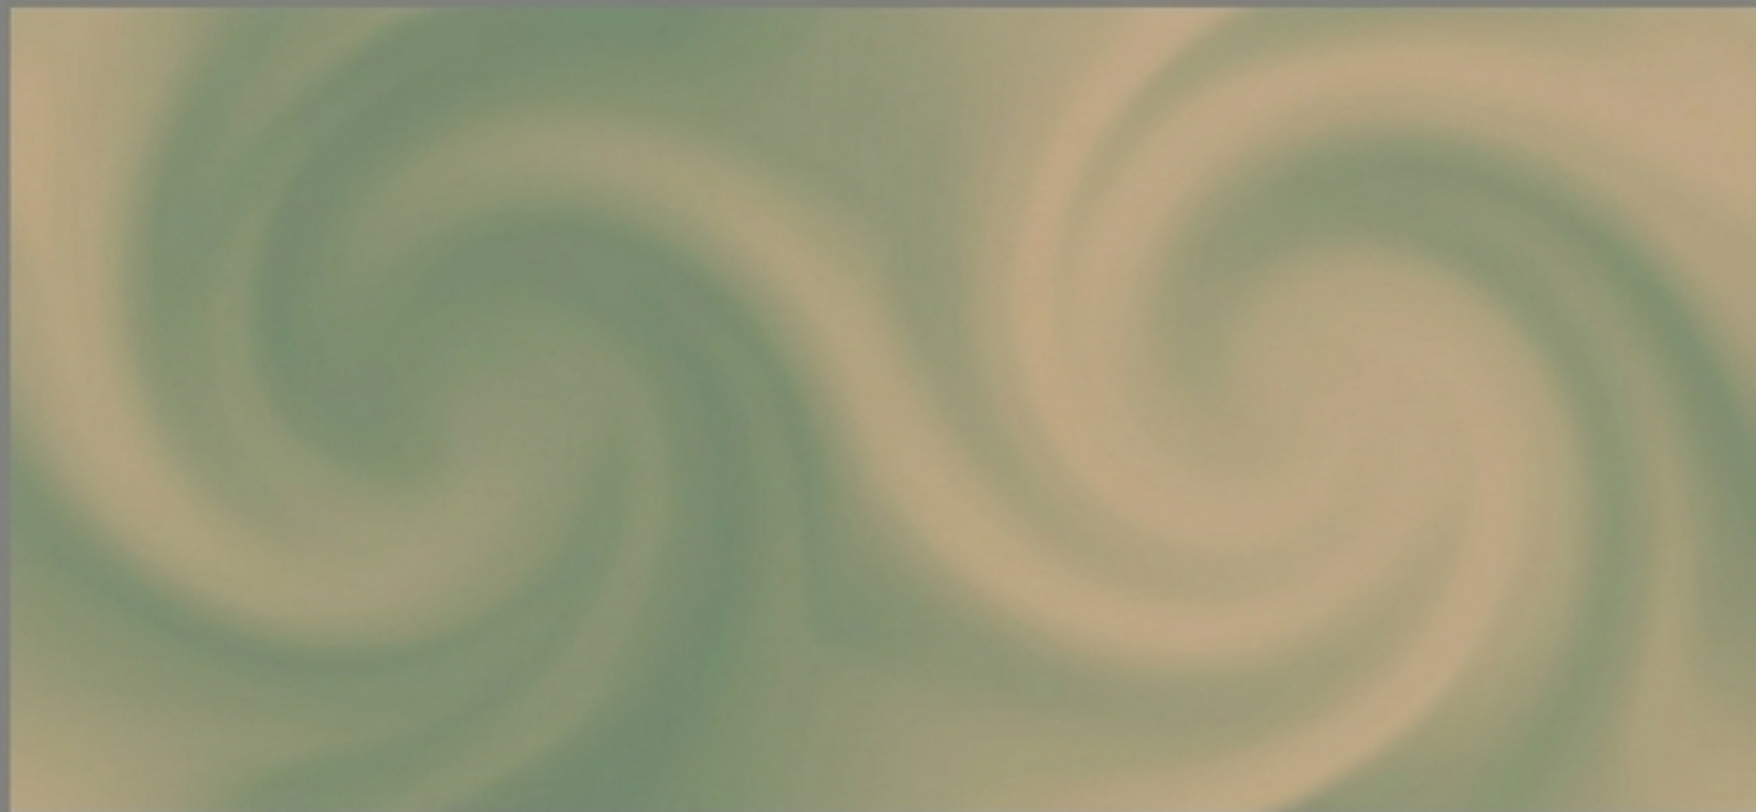

APPLICATION NOTE: Designed specifically to break up flat polygonal surfaces and complement the procedural Bevel shader (0.010m radius).

SWATCH A: MARBLED CLAY

SWATCH B: IMPURITY CLAY

SWATCH C: DUAL-TONE SWIRL

SWATCH D: BAKED CLAY

BASE COLOR / ALBEDO STRICTLY.

EMBEDDED RULE: Zero baked lighting. Do not embed AO into these albedo maps; all contact shadowing must be calculated dynamically via Eevee/Cycles AC

STRIP A: CRAFT FELT

STRIP B: ROUGH WOVEN BURLAP

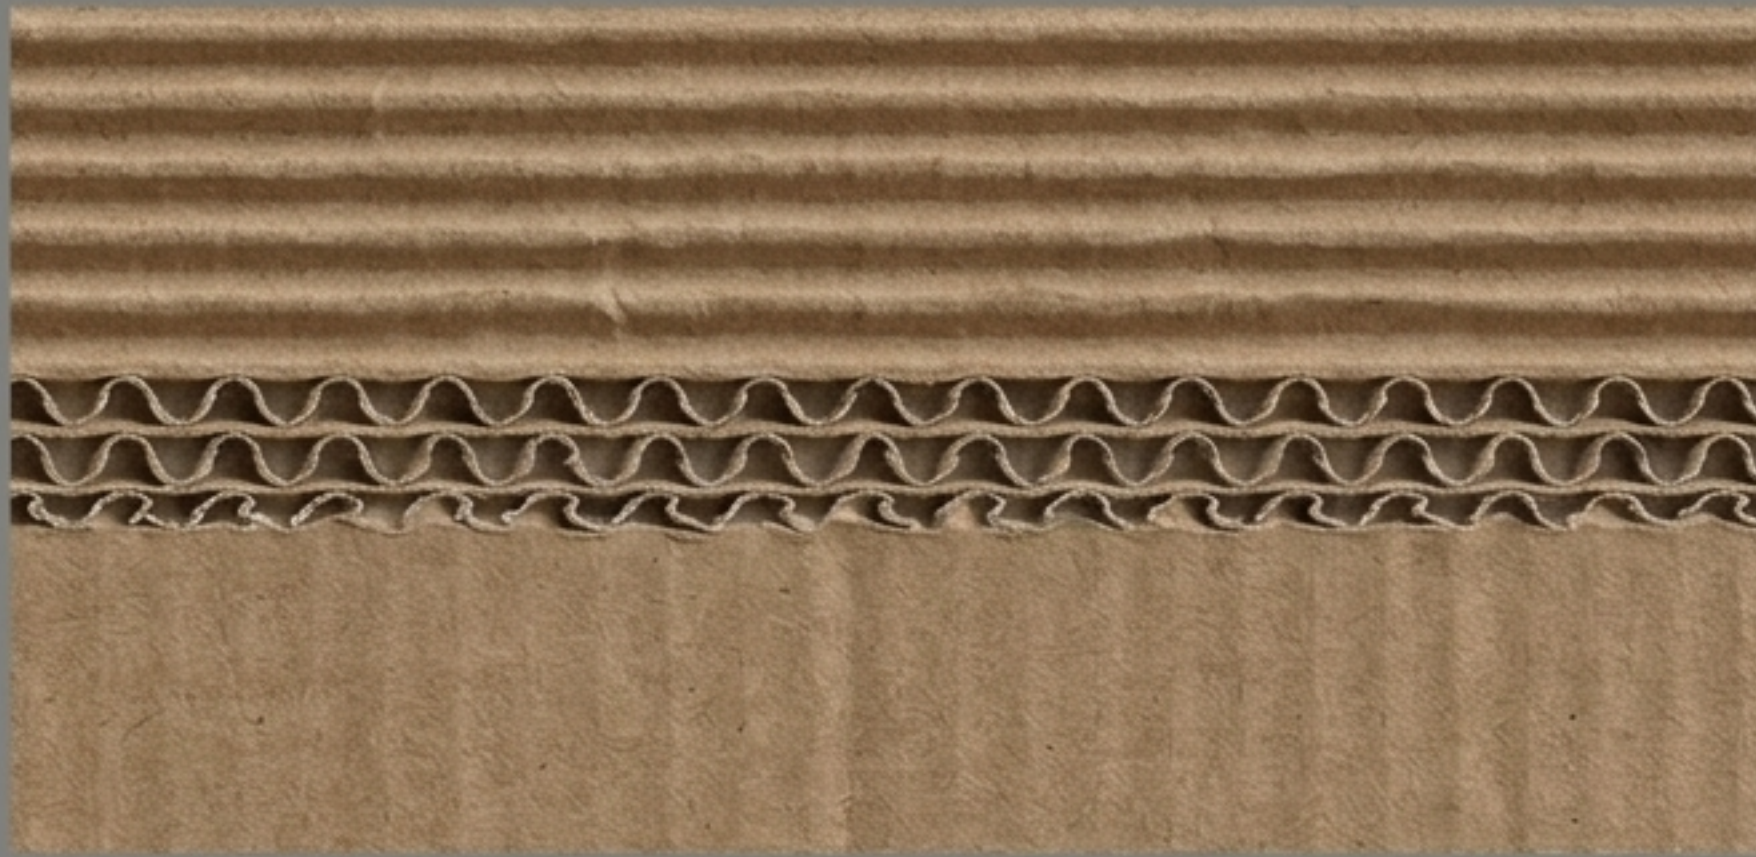

STRIP C: CONSTRUCTION PAPER

Felt/Cloth: Sheen Weight: 0.50+, Roughness: 0.90

Paper: Subsurface Weight: 0.00, Roughness: 0.85

Metallic: 0.00 for all variants.

SWATCH A: CORRUGATED CARDBOARD

SWATCH B: CRAFT CORK

SWATCH C: CRAFT EVA FOAM

SWATCH D: BALSA / ROUGH MDF WOOD

Class: Dielectric Environmental | Metalness: 0.00 | Subsurface Weight: 0.00 (Unlike core clays)

Primary Use: Contrast materials strictly aligned to a miniature DIY aesthetic.

Look-Dev Lightbox

USABILITY WARNING: Map via Object Coordinates anchored to a root bone to prevent texture swimming during skeletal animation

MAP A: ISOTROPIC CLAY BASE

MAP B: ISOTROPIC CRAFT FOAM BASE

SAFE FOR: Static environmental diorama assets using Triplanar (Box) mapping.

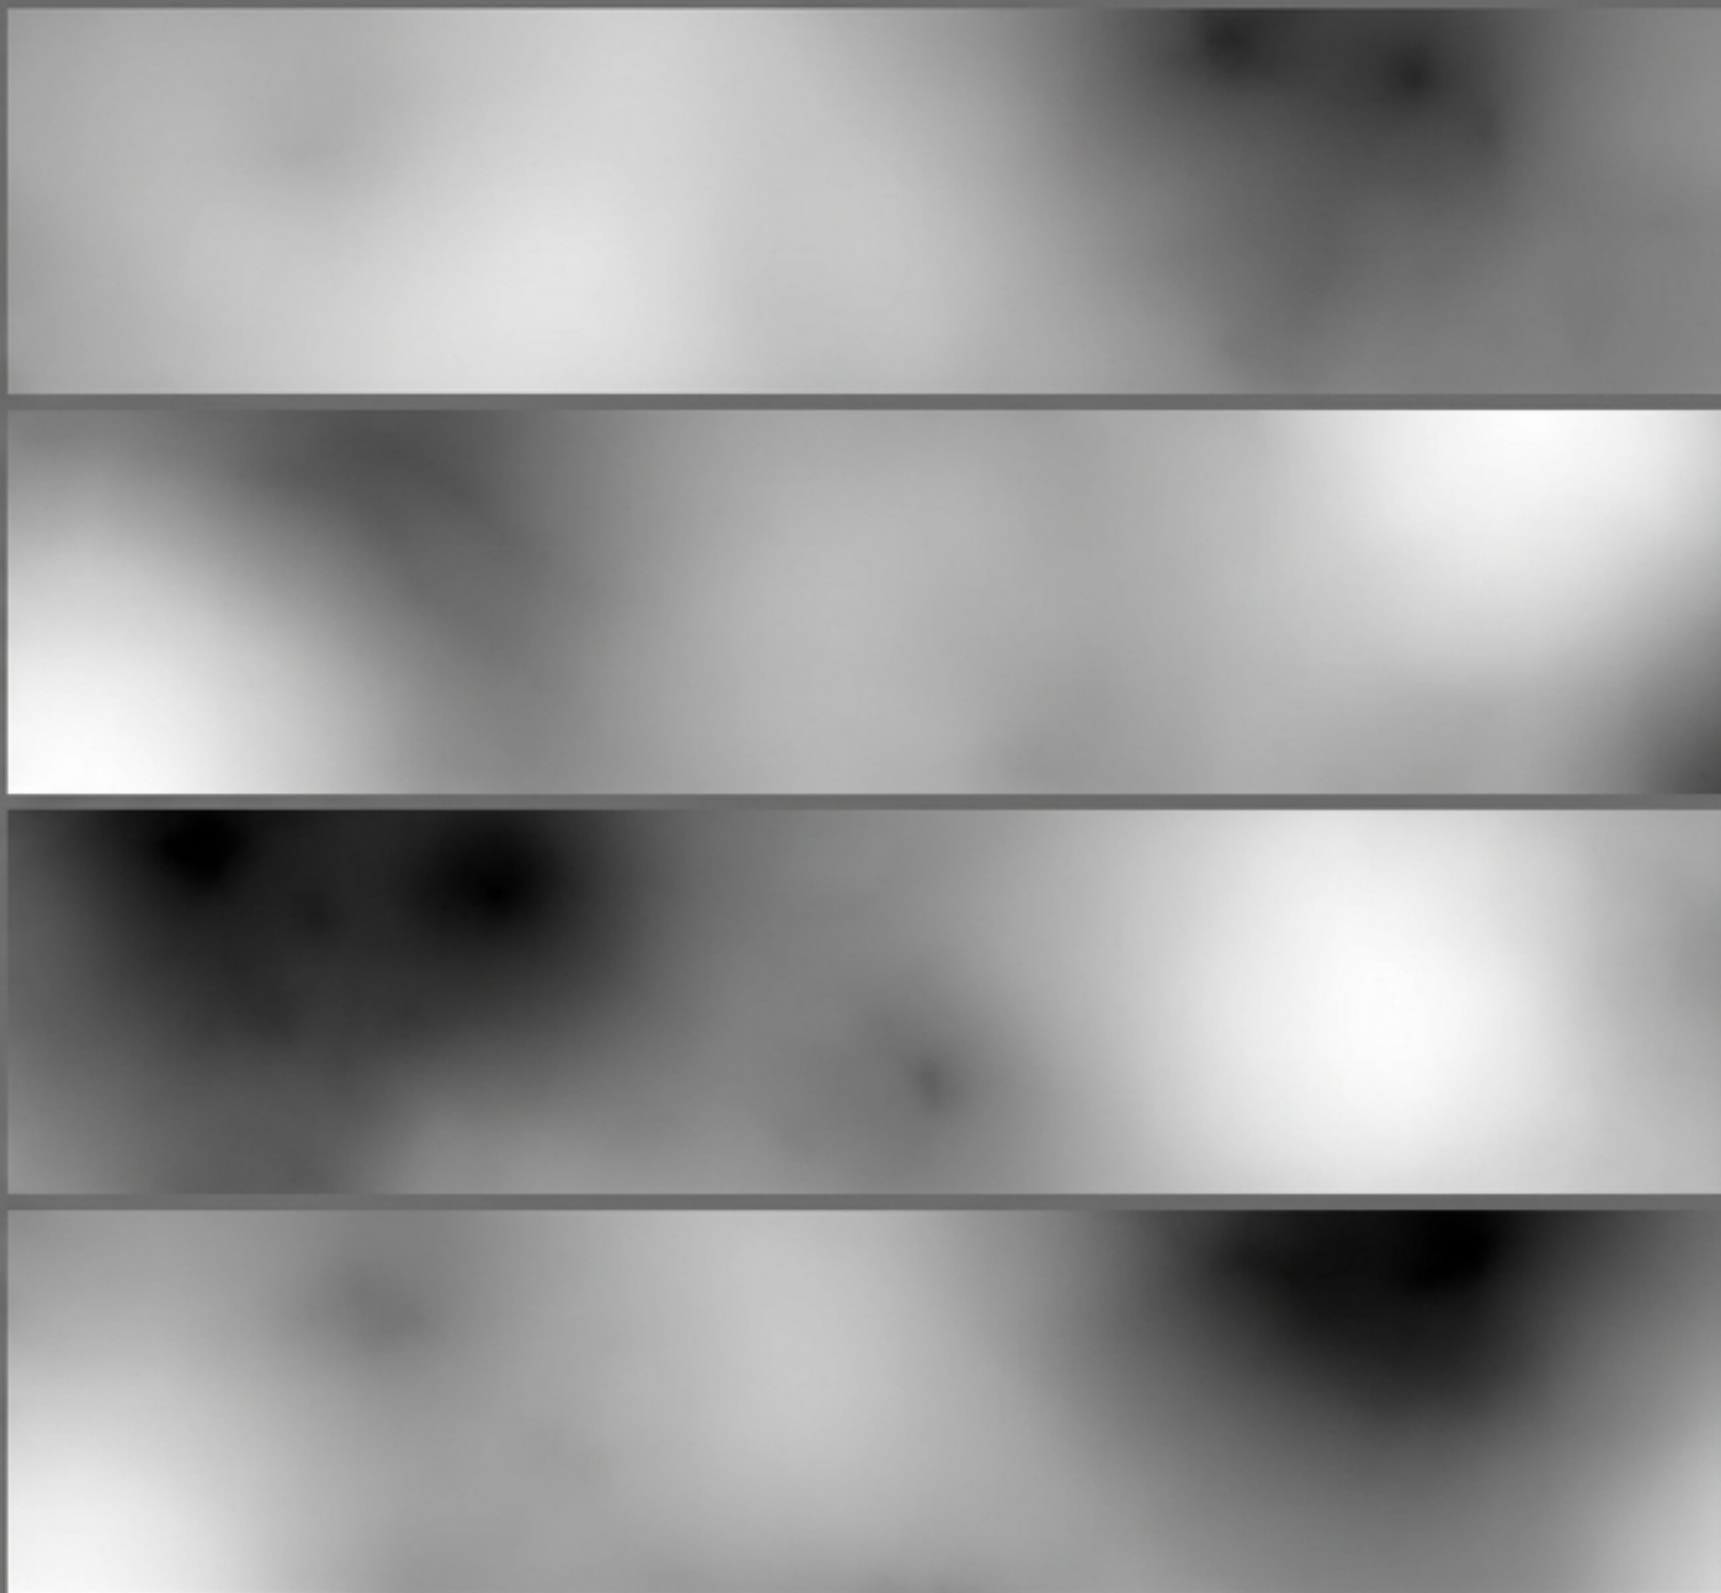

DO NOT USE: Triplanar mapping on deforming skeletal meshes (characters). Tangent-space UVs are strictly required for rigged assets to prevent texture distortion.

Look-Dev Lightbox

ROUGHNESS ATLAS

HEIGHT ATLAS

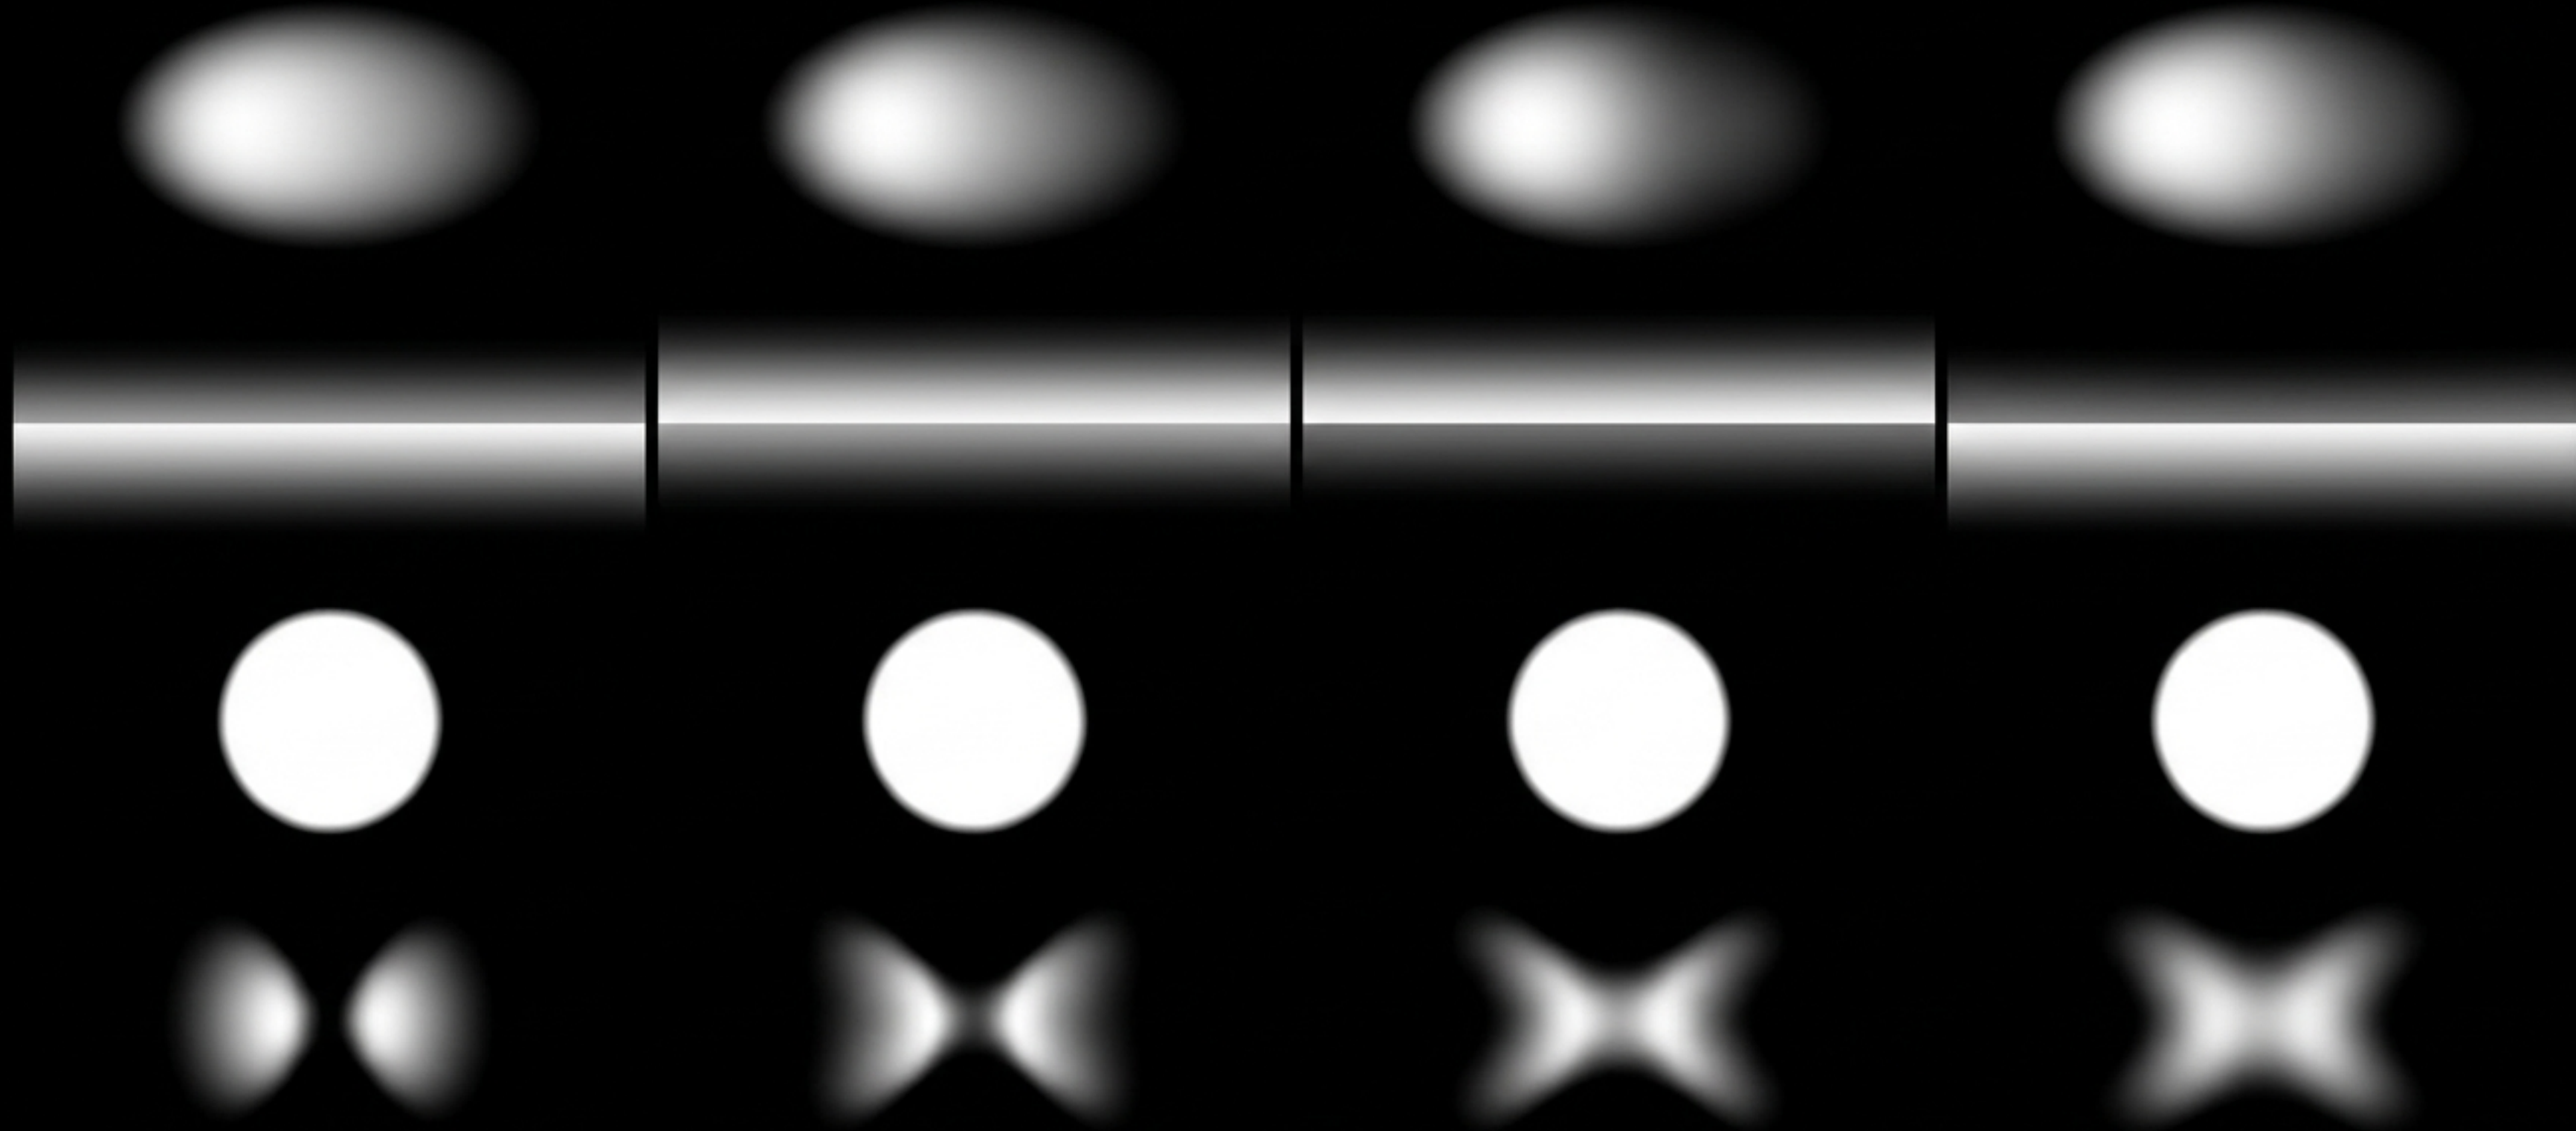

COLOR SPACE: NON-COLOR (LINEAR). DO NOT USE sRGB.

Extraction: Ready for immediate crop to drive Principled BSDF Roughness and Bump nodes.

Look-Dev Lightbox

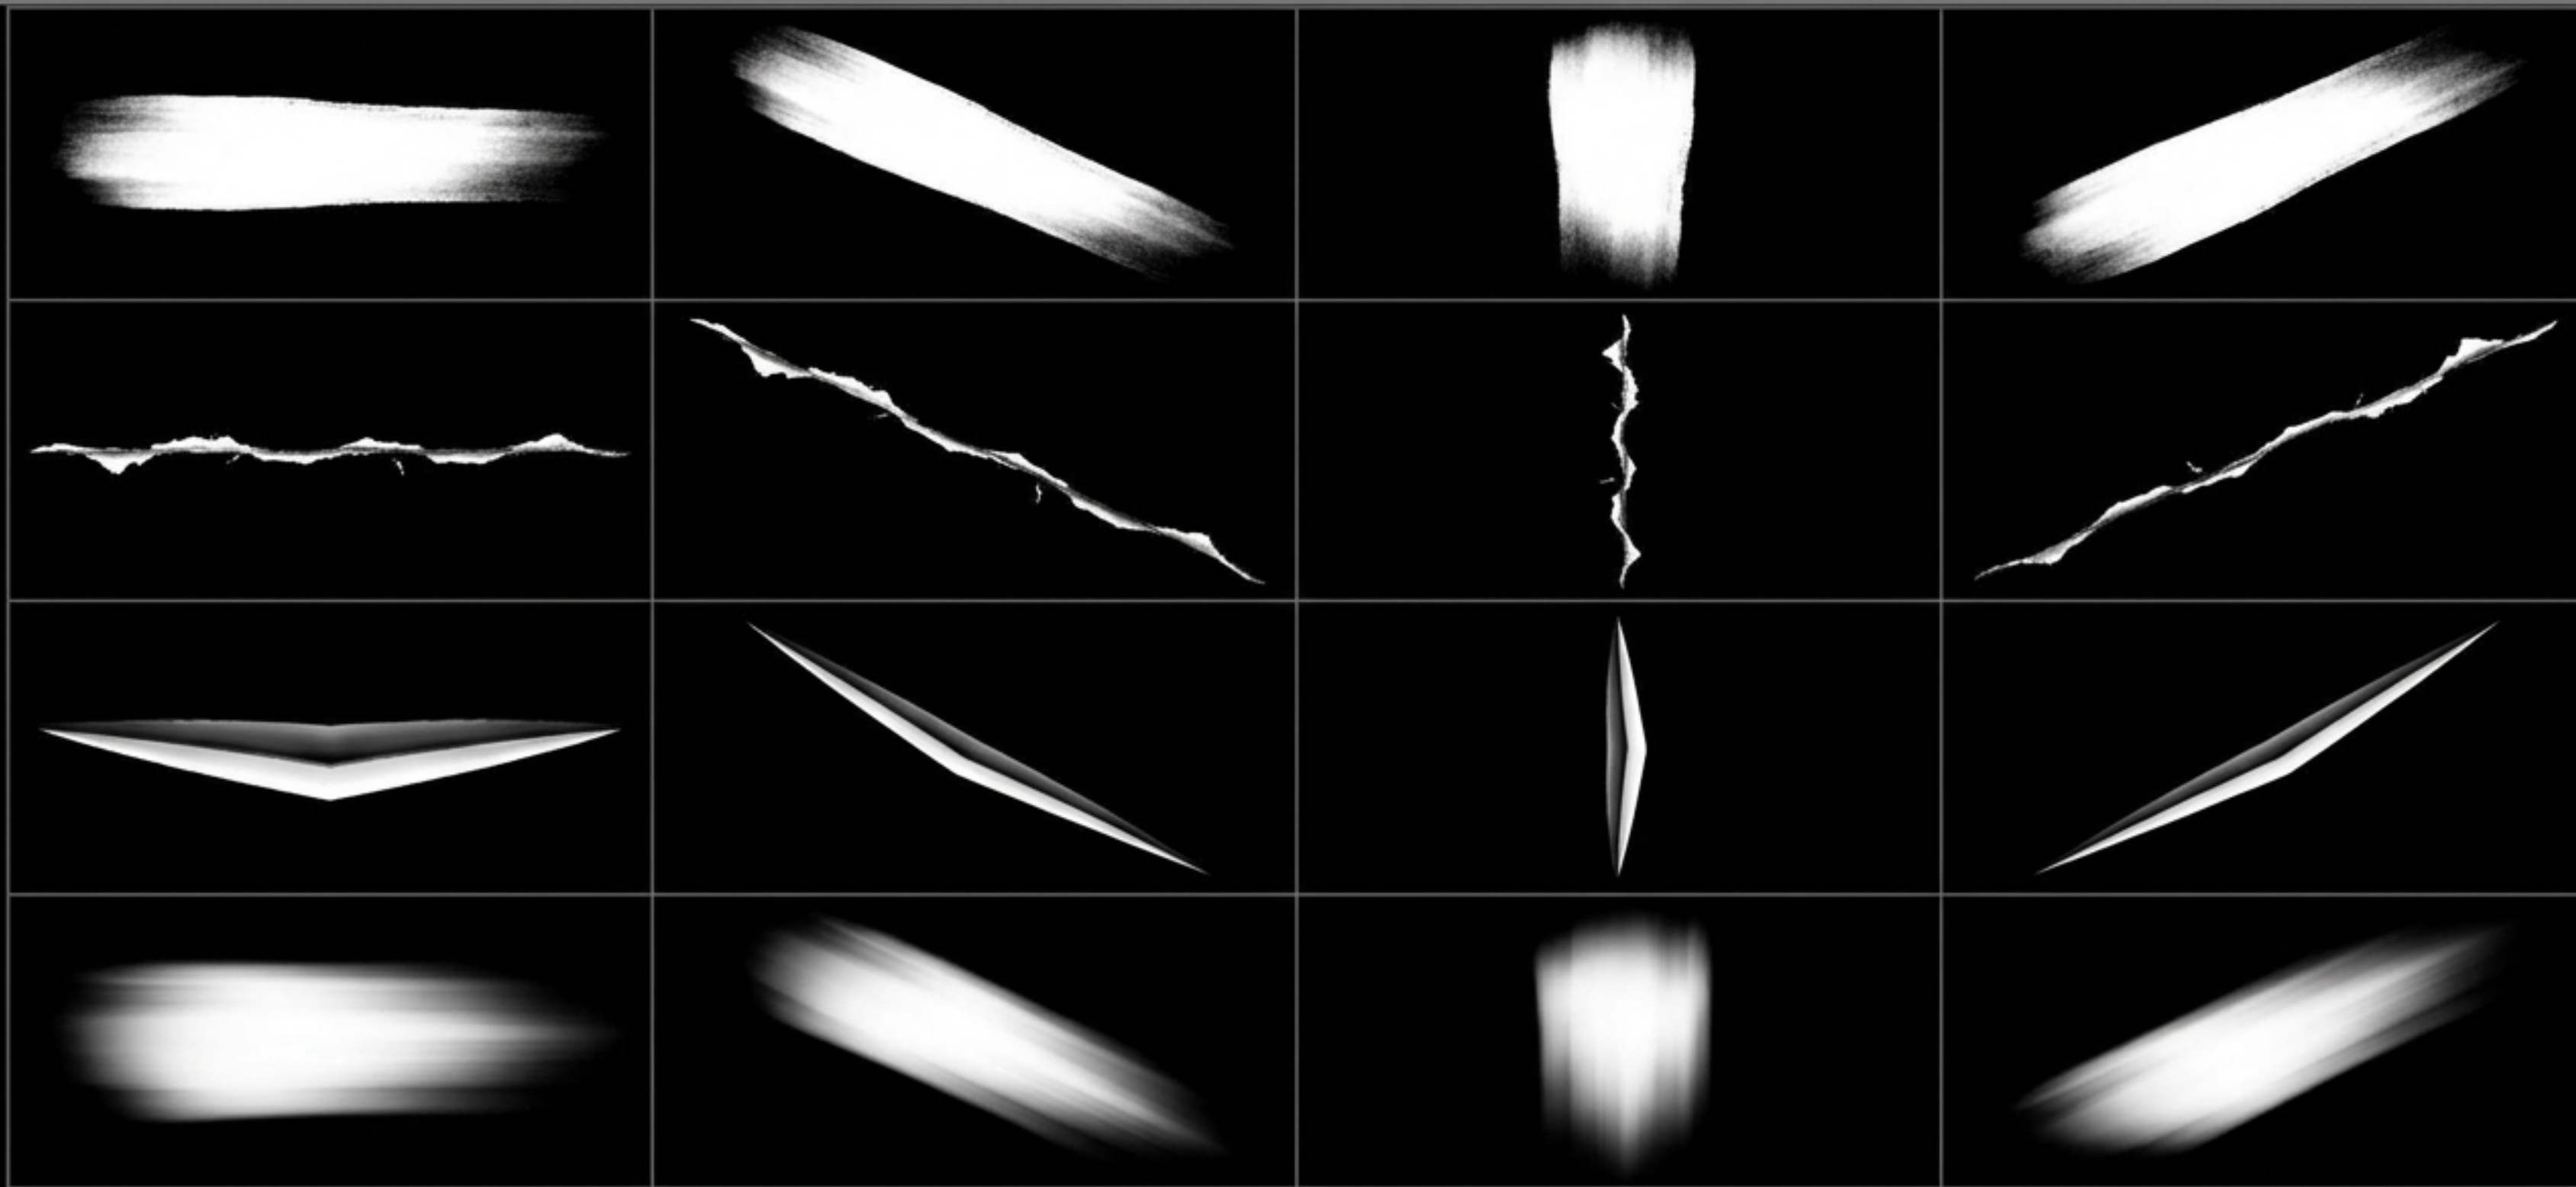

TEXTURE ATLAS

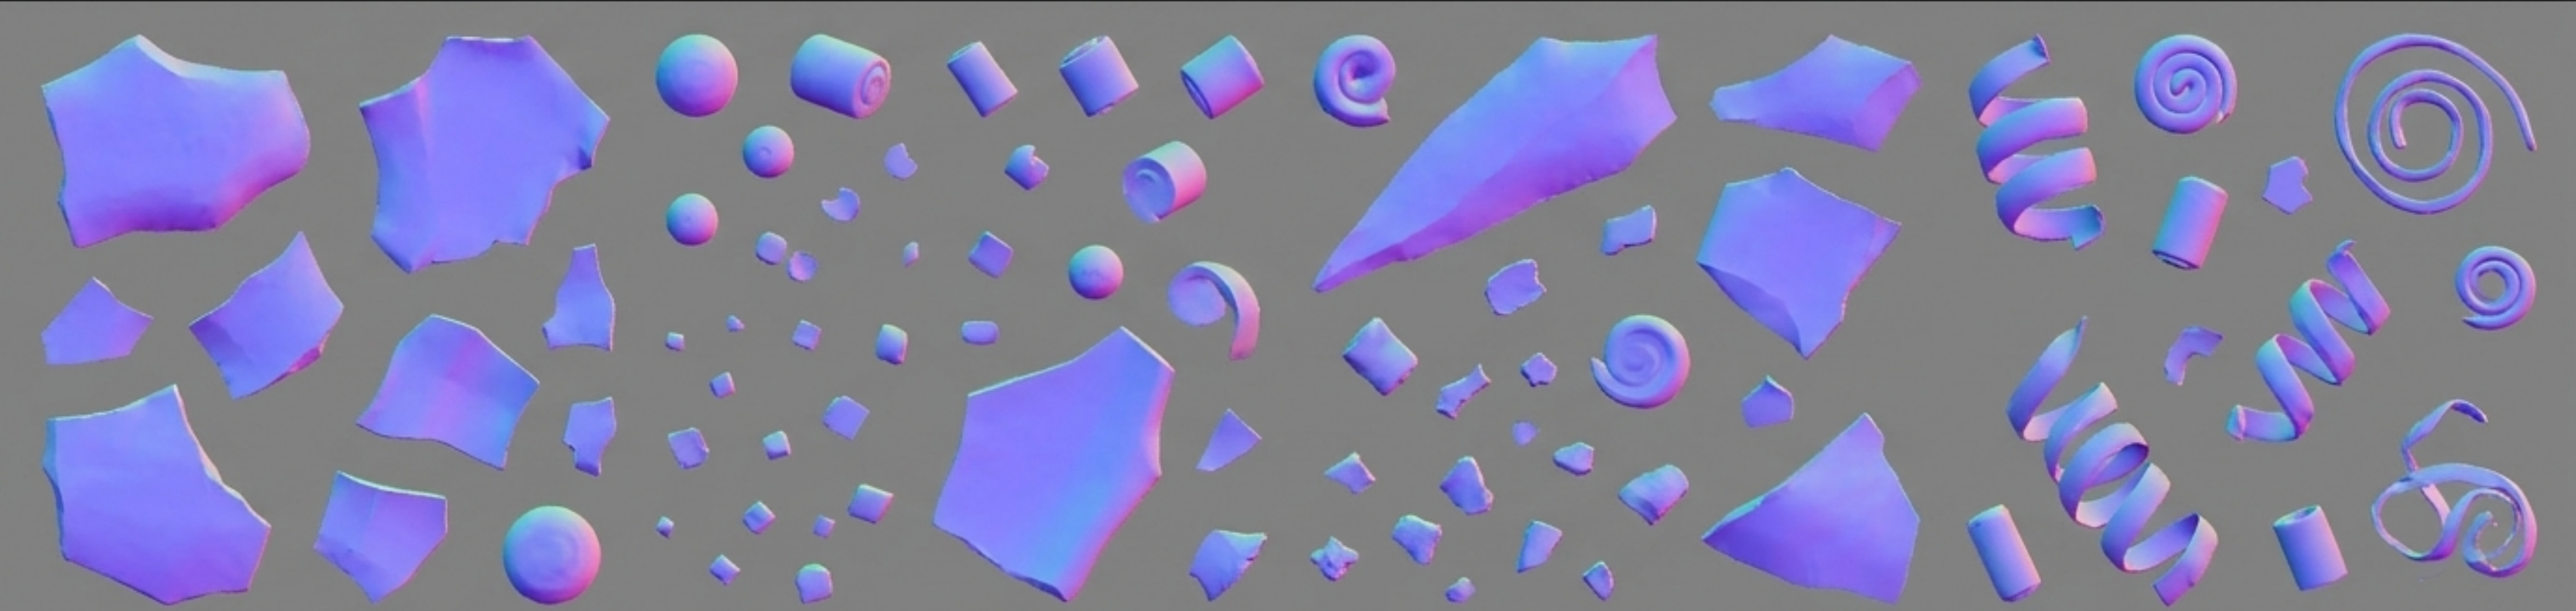

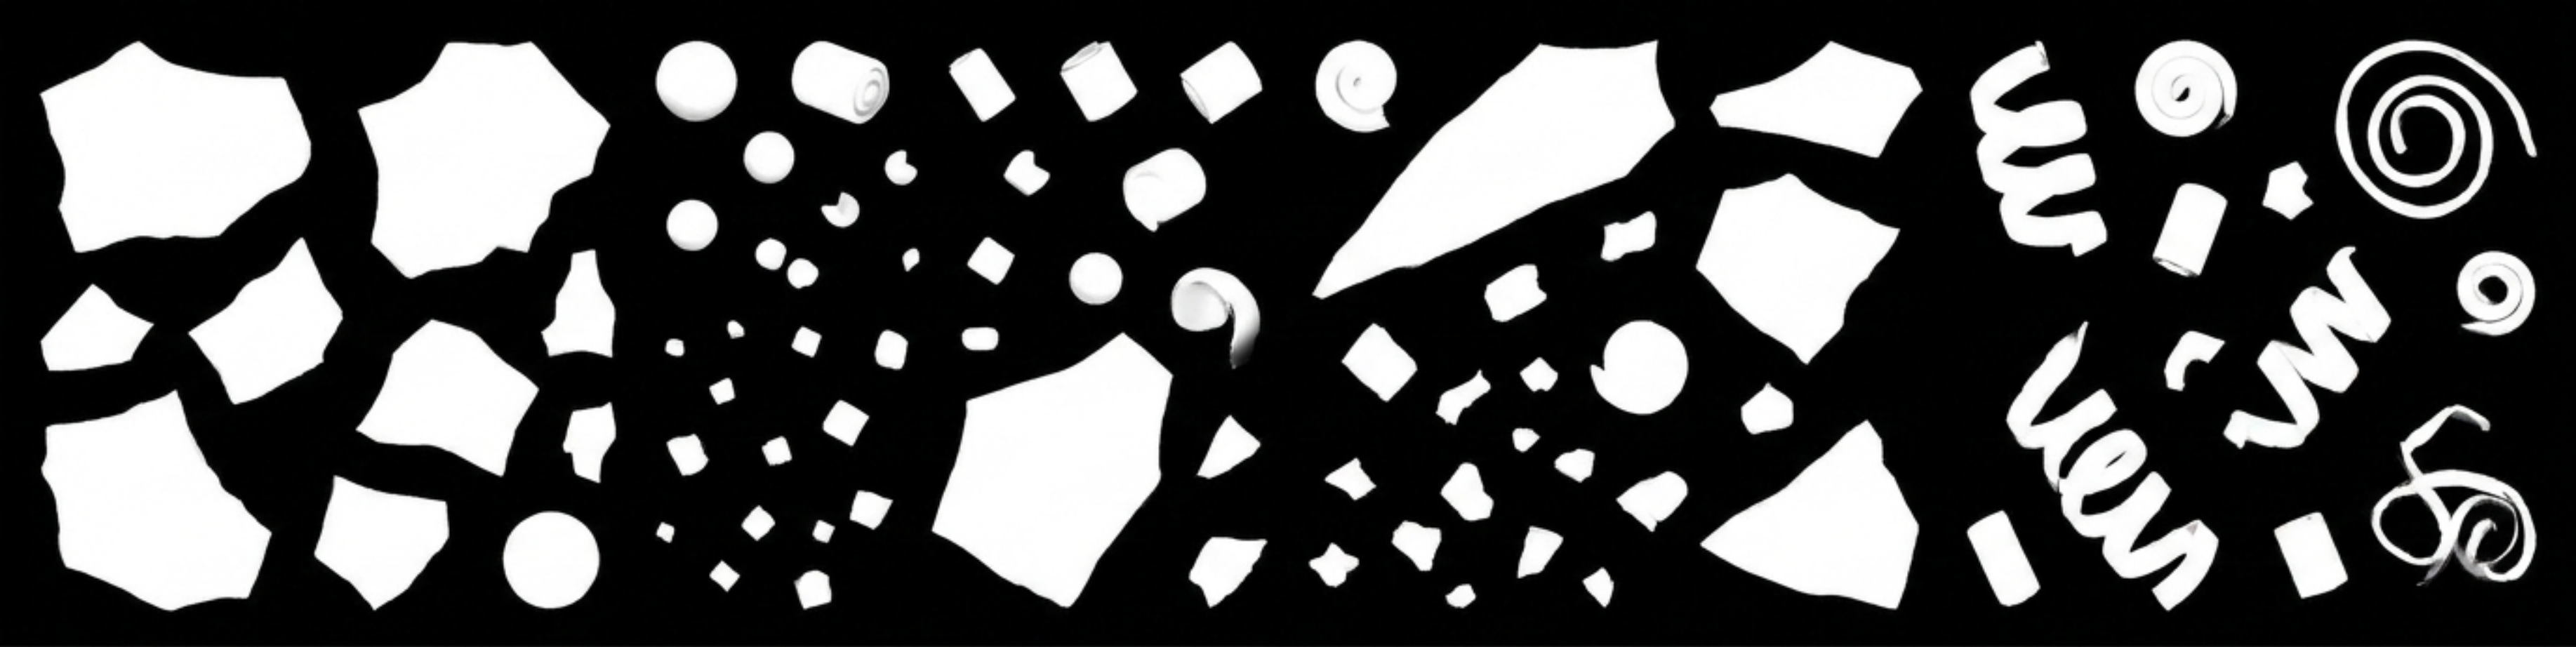

APPLICATION NOTE: Tagged for use as Height/Displacement decals or as custom sculpting alpha brushes in Blender. This slide is a functional 4x4 alpha mask atlas.

Look-Dev Lightbox

DIRECTIONAL ALPHA DECALS

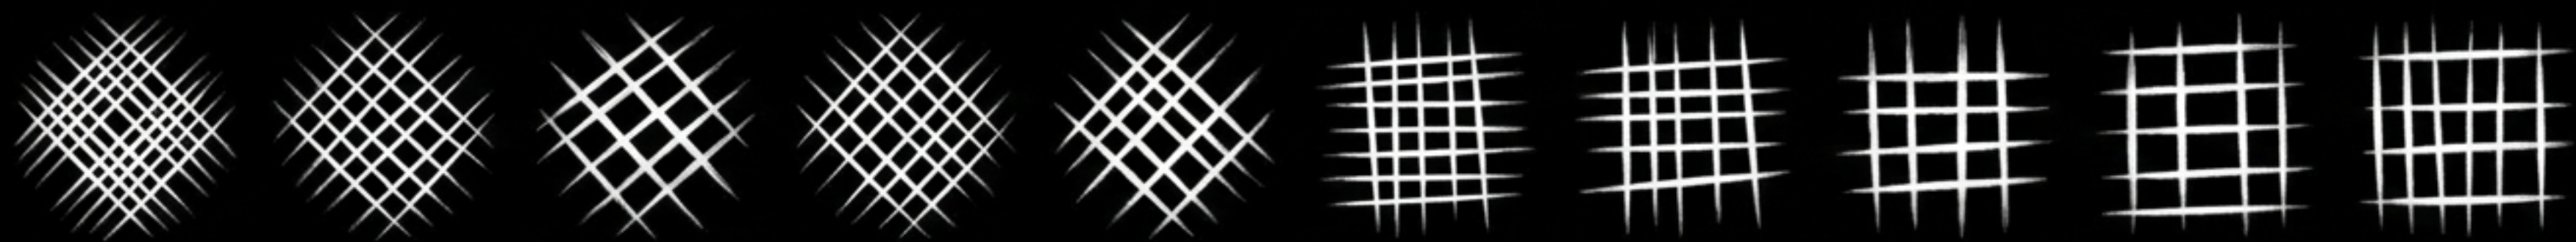

APPLICATION NOTE: Emphasizes Meso-scale application. Use as directional alphas mapped via decals to specific character locations (clothing folds, mechanical joints) to break up perfect digital geometry.

ASSET TYPES: Isolated shapes of clay flakes, rolled pellets, crumbs, and leftover snips of material.

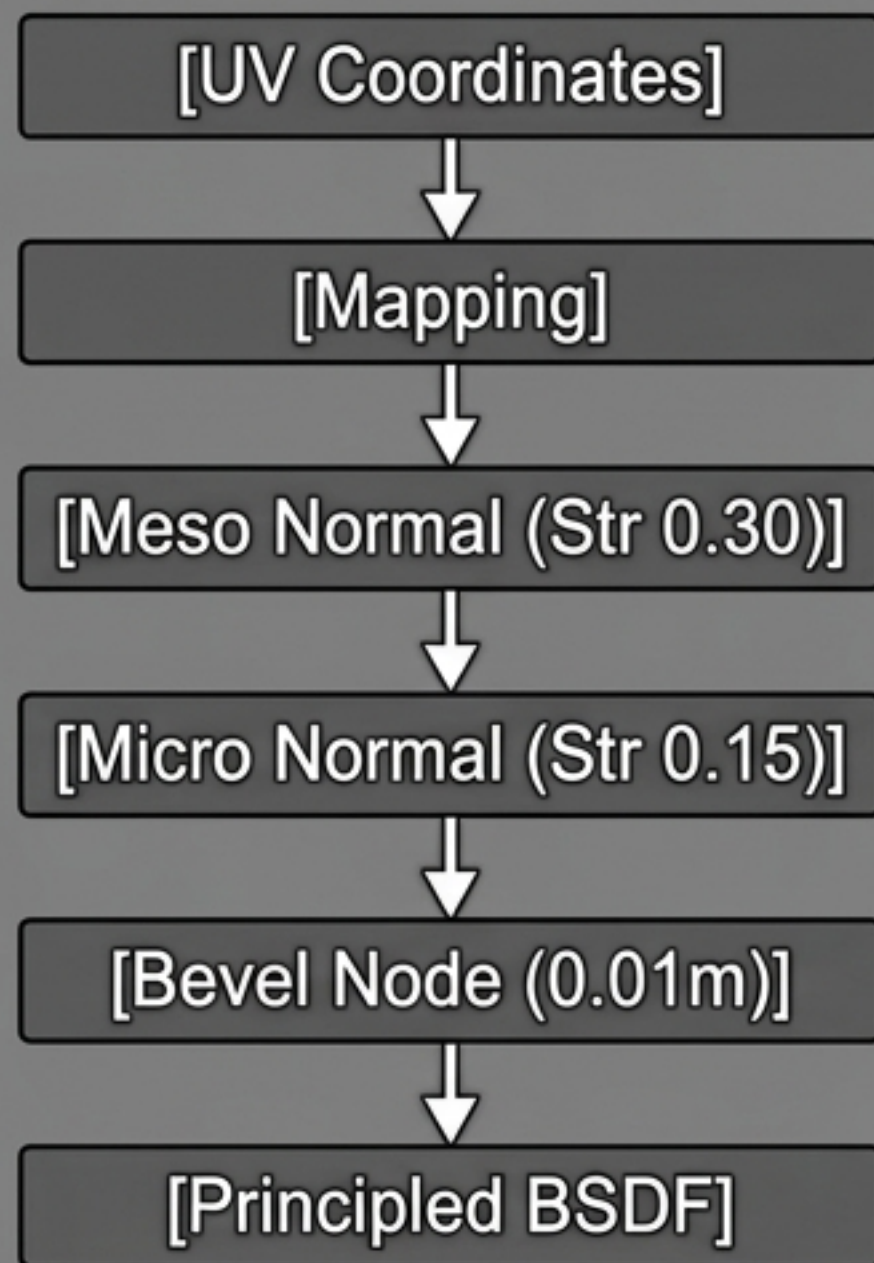

APPLICATION PIPELINE: Use as 2D decals (Normal/Height) OR as reference instance shapes for Blender

Geometry Nodes to scatter around the base of a diorama. Eliminates the need to model microscopic details.

APPLICATION NOTE: Extraction-ready masks. Use to add character history and scale to otherwise blank, unbroken diorama surfaces.

SHADER ARCHITECTURE NODE-GRAPH SUMMARY

Stop-Motion Jitter Driver:

Offset = floor(Frame / 2) * 13.37

Extraction Guide:

Crop Slides 11-14 into 1024x1024 alpha maps.

PRODUCTION QA CHECKLIST

- ☐ Are all 90-degree geometric edges beveled (0.005m)?
- ☐ Is texture swimming eliminated on rigged assets (Tangent UVs used)?
- ☐ Are Roughness and Normal maps set to Non-Color data?
- ☐ Is Subsurface scattering dialed to accurate character scale (0.02m)?
- ☐ Are high-frequency procedural fingerprints completely absent?
