THE
DIAGNOSIS!

GW

Georg v. Westphalen

Dopamine-Dino

(The Reward Beast)

POWER: The Euphoria Spike. Too much in the mesolimbic track = Hallucinations. Too little in the mesocortical track = Flat affect.

LORE: Dino drives the Reward Road. Block him to stop the voices, but watch out for the Parkinsonian Rust.

D2 Receptor /
Mesolimbic vs.
Mesocortical

Doc FrizzleBob's Notes!

Chloride channel
opener

GABA-Garry

(The Inhibitor)

POWER: The Big Chill. Tells the neurons to shut up and relax.

LORE: Benzodiazepines strengthen Garry's grip. A sudden withdrawal means brain on fire (seizures).

NEURON SOUP!

Don't Forget:
Study for Boards (or else!)

Serotonin-Sally

(The Mood Regulator)

POWER: The Rhythm Keeper. Controls sleep, appetite, and the will to wrestle.

LORE: When Sally leaves the ring, the world turns grey. SSRIs act as vacuum plugs to keep her in the synaptic gap longer.

5-HT receptors /
Raphe Nuclei

Don't Forget: Study
for Boards (or else!)

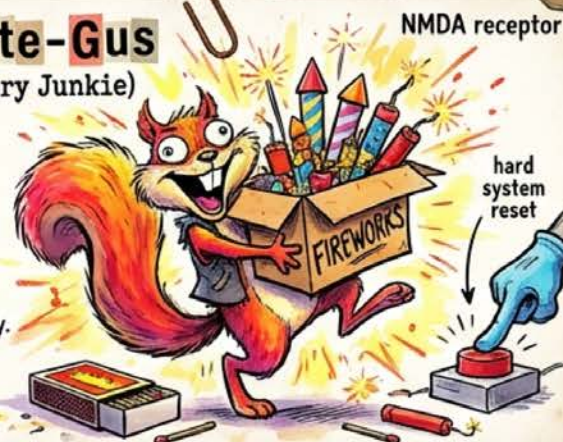

CHAOS!

Glutamate-Gus

(The Excitatory Junkie)

POWER: The Spark. Gus is Garry's arch-nemesis. He turns on the lights and lets the sparks fly.

LORE: Too much Gus leads to excitotoxicity. Ketamine blocks Gus to perform a hard system reset.

NMDA receptor

CHAOS!

Schizo-Sam

(The Split Reality)

POWER: The Delusion Bubble. Sam creates a reality where only he knows the rules.

LORE: Driven by Dino's rampage in the mesolimbic system. Requires at least 1 core symptom: delusion, hallucination, or disorganized speech.

Symptoms > 6 months
/ DSM-5 criteria

Doc FrizzleBob's Notes!

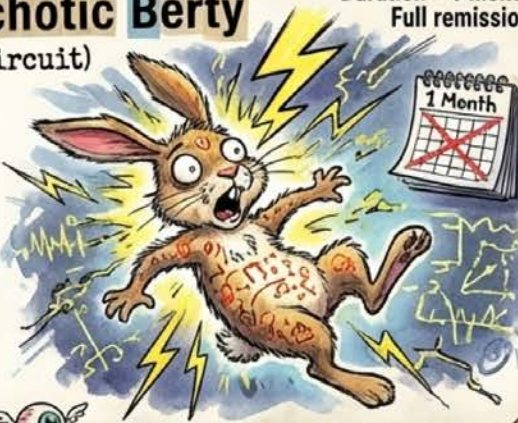

Brief Psychotic Bert

(The Short Circuit)

POWER: The Snap. A sudden break with reality, usually after a traumatic match.

LORE: A temporary system failure. Bert returns completely to his old self after the match concludes.

Duration < 1 month
Full remission

Diagnosis?!

Don't Forget:
Study for Boards (or else!)

Schizoaffective Sid

(The Hybrid)

Psychosis > 2 weeks
without mood symptoms

POWER: The Dual Threat. A dangerous mix of Sam's delusions and Barry's mood swings.

LORE: Sid is a border-crosser. He must prove his psychosis can exist even without the emotional roller coaster.

Don't Forget: Study
for Boards (or else!)

CHAOS!

Delusional Dan

(The Fixed Idea)

1 fixed delusion
No other psychosis signs

POWER: The Unshakable Belief. Dan firmly believes the referee loves him or the FBI is hunting him.

LORE: Aside from his one quirk, Dan functions perfectly. He's not schizophrenic; he's just extremely stubborn.

What the FLUFF?!

GW

Georg v. Westphalen

BIPOLAR BARRY (The Seesaw)

STAT: Type I (Mania) vs.
Type II (Hypomania + Depression)

POWER: The Flight of Ideas.
Builds a skyscraper ego in one night
or feels like a crushed bug.

LORE: During mania, Barry needs no sleep and spends all his gold tokens.
He thinks he is the invincible champion.

PERSISTENT POLLY (Dysthymia)

STAT: Duration > 2 years /
Low-grade depression

POWER: The Eternal Grey. Polly isn't as heavy as Debbie, but she never goes away.

LORE: A chronic state of not-quite-happiness. She is the rain that never stops.

MAJOR DEPRESSIVE DEBBIE (The Weight)

STAT: SIGECAPS score /
5 of 9 criteria for 2 weeks

POWER: The Gravity Well. Debbie makes every movement an ordeal.
Even breathing feels like wrestling against lead.

LORE: Massive withdrawal of Sally and Nora. The world loses its color and value.

CYCLOTHYMIC CY (The Mini-Bipolar)

STAT: 2 years fluctuation /
Never reaches full mania/MDD

POWER: The Constant Ripple. Cy is never stable, but his waves are small enough to stay out of the hospital.

LORE: The lite version of Barry. Most unstable character on the roster, but always stays in the zone.

KayfaBIZARRO!

GW

Georg v. Westphalen

Panic-Pete

(The 10-Minute Terror)

Peak in < 10 mins
/ Autonomic hyperactivity

POWER: The Suffocator. Pete makes the heart race and the throat tighten with no opponent in the ring.

POWER: The Suffocator. Pete makes the heart race and the throat tighten with no opponent in the ring.

LORE: A false alarm from Norepi-Nora. Pete thinks he's dying even though he's just standing in a supermarket.

Agoraphobic Abby

(The Prison of Walls)

Fear of > 2 situations
(Public transport,
open spaces)

POWER: The Locker Room Lockdown. Abby fears places where she cannot escape quickly.
LORE: Often the result of Pete's attacks. Abby shrinks her world until only her house remains.

OCD-Otto

(The Ritual Loop)

Obsessions (thoughts) vs.
Compulsions (actions)

POWER: The Endless Reset. Otto must tie his shoes 50 times, otherwise the stadium will explode.
LORE: The action (compulsion) only serves to temporarily silence the agonizing thought (obsession).

PTSD-Paul

(The Flashback Trap)

Symptoms > 1 month
post-trauma / Intrusions

POWER: The Time Warp. Paul is catapulted back into his worst match by a sound or a smell.
LORE: The brain has not archived the trauma. It remains an open wound that can tear again at any time.

HUMBUG!

BLÖDSINN!

Brain Moolah!

Hali the Haloperidol

(The Old Hammer)

STAT: High-potency neuroleptic /
Strong D2 blockade

POWER: The Dopamine Handcuffs.
Hali chains up the Dino and stops
delusions immediately.

LORE: Effective but brutal. Causes EPS
(extrapyramidal symptoms) — the
wrestler becomes stiff as a statue.

Don't Forget:
Study for Boards
(or else)

Clozie the Queen

(Clozapine)

STAT: Agranulocytosis risk /
Weekly blood counts

POWER: The Ultimate Override.
The only one who wins when all other
antipsychotics have failed.

LORE: She is the queen, but dangerous.
Can eat white blood cells. For expert
matches under supervision only!

Brain Moolah!

Rizzy the Risperidone

(The Balancer)

STAT: D2 + 5-HT_{2A} antagonist

POWER: The Prolactin Leak.
Dampens psychosis but lets hormones
go wild (gynecomastia/lactation).

LORE: Blocks dopamine and
serotonin simultaneously. Modern
approach with less rust than Hali.

Don't Forget:
Study for
Boards
(or else)

Humbug!

Ollly the Olanzapine

(The Weight Gainer)

STAT: Massive metabolic risk /
H1 blockade

POWER: The Metabolic Expansion.
Stops voices but makes the wrestler
twice as heavy within weeks.

LORE: Blocks histamine receptors,
leading to insatiable hunger and
insulin resistance.

MedKayfabe!

Urrrgh...
So heavy...

GW

Georg v. Westphalen

Lexy the SSRI (Escitalopram)

STAT: Selective Serotonin Reuptake Inhibitor

POWER: The Vacuum Plug. Plugs the drains so Sally can stay in the ring longer.
 LORE: Needs 4-6 weeks to warm up.
 Side effect: the Sexual Snag (loss of libido).

Ty the TCA (Amitriptyline)

STAT: Non-selective / 3 C's (Coma, Convulsions, Cardiotoxicity)

POWER: The Dirty Bomb. Hits everything: serotonin, norepi, histamine, acetylcholine. Extremely effective but toxic in overdose.
 LORE: The Old Guard. Unpopular due to anticholinergic effects (dry mouth, constipation).

KayfaBONGO!

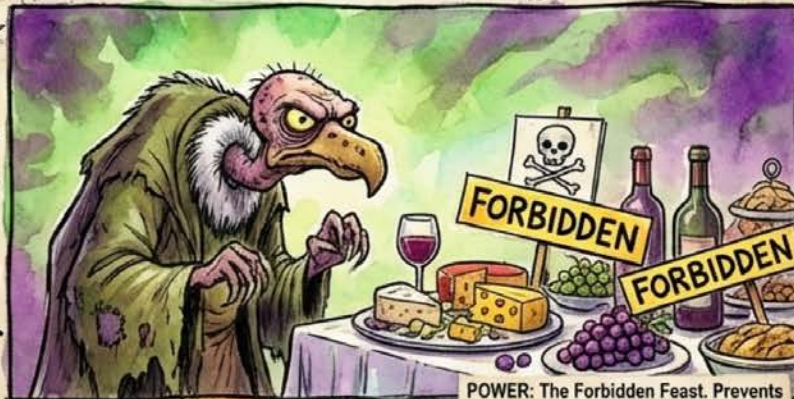

Venny the SNRI (Venlafaxine)

STAT: Serotonin + Norepinephrine / Dose-dependent

POWER: The Double Boost. Brings both Sally AND Nora back into the fight.
 LORE: At high doses, Venny pushes blood pressure up. Good for Debbie when she has no energy left.

KayfaBONGO!

Mao the MAOI (Phenelzine)

STAT: Irreversible inhibition of Monoamine Oxidase

POWER: The Forbidden Feast. Prevents breakdown of all transmitters.
 Warning: no cheese, no wine!
 LORE: Tyramine danger! If Mao blocks tyramine breakdown, blood pressure explodes (hypertensive crisis).

LITHIUM LOU

(The Mood Anchor)

STAT: Levels 0.6 - 1.2 mmol/L /
GFR-dependent

POWER: The Suicidal Shield. The only one who can truly anchor Barry's seesaw to the

LORE: Lou hates the thyroid and kidneys. Narrow therapeutic window — too much Lou is pure poison.

LORA the LORAZEPAM

(The Benzo-Bouncer)

STAT: Short to medium acting /
GABA-A allosteric modulator

POWER: The Instant Off-Switch. When Pete panics or Barry riots, Lora sends them to sleep immediately.

LORE: High addiction potential! Like a loan — solves the problem now, but you pay with interest (withdrawal).

VAL THE VALPROATE

(The GABA Boost)

STAT: Teratogenic (neural tube defects) /
Inhibits GABA breakdown

POWER: The Mania Muzzler. Helps Garry calm the ring down. Especially good for mixed states.

LORE: Absolute ban for pregnant wrestlers! Causes hair loss and weight gain.

DIAZ the DIAZEPAM

(The Long Haul)

STAT: Very long half-life /
Active metabolites

POWER: The Smooth Landing. Used to bring wrestlers safely through alcohol withdrawal.

LORE: Because of the long action, Diaz accumulates in the body. He is the marathon runner of benzos.

← Stay fluffy!

Paranoid Pat (The Spy)

STAT: Cluster A /
The Weird

POWER: The Conspiracy Theory. Thinks everyone in the crowd and his partner wants to betray him.
LORE: Not psychotic; just extremely suspicious. Reads hostile intent into harmless comments.

↑ TRUST NO ONE!

Schizotypal Skip (The Shaman)

STAT: Cluster A /
Magical thinking

POWER: The Strange Vibe. Wears odd clothes and claims he can read the thoughts of the ring posts.
LORE: Sam's eccentric cousin. No hallucinations, but his reality is very... specific.

Sergio Aragónés: bizare's eaha: fmy bizarre aliens, grotesque
ancebe aliens, umcqux nioses, caving, unsence: marginalid.)

Schizoid Sid (The Lone Wolf)

STAT: Cluster A /
Voluntary social
isolation

POWER: The Void of Interest. Wants no friends, no dates, no fans. Prefers wrestling in an empty stadium.
LORE: Isn't shy — he just doesn't care. Considers neither praise nor criticism important.

Cluster A Summary (The Eccentrics)

STAT: Paranoia,
Isolation, Eccentricity

POWER: The Social Detachment.
LORE: The weird group. Paranoia, isolation, and eccentricity define this wrestling stable.

THEY ARE
WATCHING!

Antisocial Artie (The Heel)

STAT: Cluster B / The Wild

POWER: The Rule Breaker. Strikes when the ref isn't looking. Feels no remorse and loves risk.
LORE: Before age 13, called Conduct Disorder Charlie. Has no respect for the laws of the ring.

Borderline Bella (The Storm)

STAT: Cluster B / Unstable Identity & relationships

POWER: The Splitting Move. Today you are Bella's hero; tomorrow her worst enemy. Nothing in between.
LORE: Massive fear of abandonment. Uses self-harm to dampen the inner pain.

Histrionic Honey (The Drama Queen)

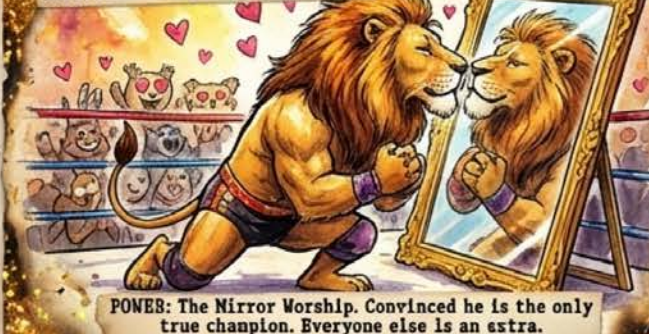

STAT: Cluster B / Attention-seeking

POWER: The Spotlight Stealer. Cries, screams, or undresses — as long as all cameras are on her.
LORE: Her feelings are like stage props: loud, colorful, but shallow. Needs validation like oxygen.

Narcissistic Nick (The Ego-Maniac)

STAT: Cluster B / Grandiosity

POWER: The Mirror Worship. Convinced he is the only true champion. Everyone else is an extra.
LORE: Under his giant ego hides a tiny self-esteem that breaks at the slightest criticism.

BLÖDSINN!

BLÖDSINN!

© Georg v. Westphalen

© Georg v. Westphalen

Avoidant Ava (The Shy Soul)

STAT: Cluster C /
The Worried

POWER: The Rejection Fear. Would love to join in, but convinced everyone will laugh at her.
LORE: Unlike Sid, Ava WANTS closeness, but her inferiority complexes keep her in the locker room.

Dependent Debbie (The Clinger)

STAT: Cluster C /
Inability to decide

POWER: The Decision Trap. Can't even choose which boots to wear without asking her coach.
LORE: Needs someone to take responsibility for her life. Alone, she feels completely helpless.

OCPD-Oliver (The Rule-Enforcer)

STAT: Cluster C /
Perfectionism & control

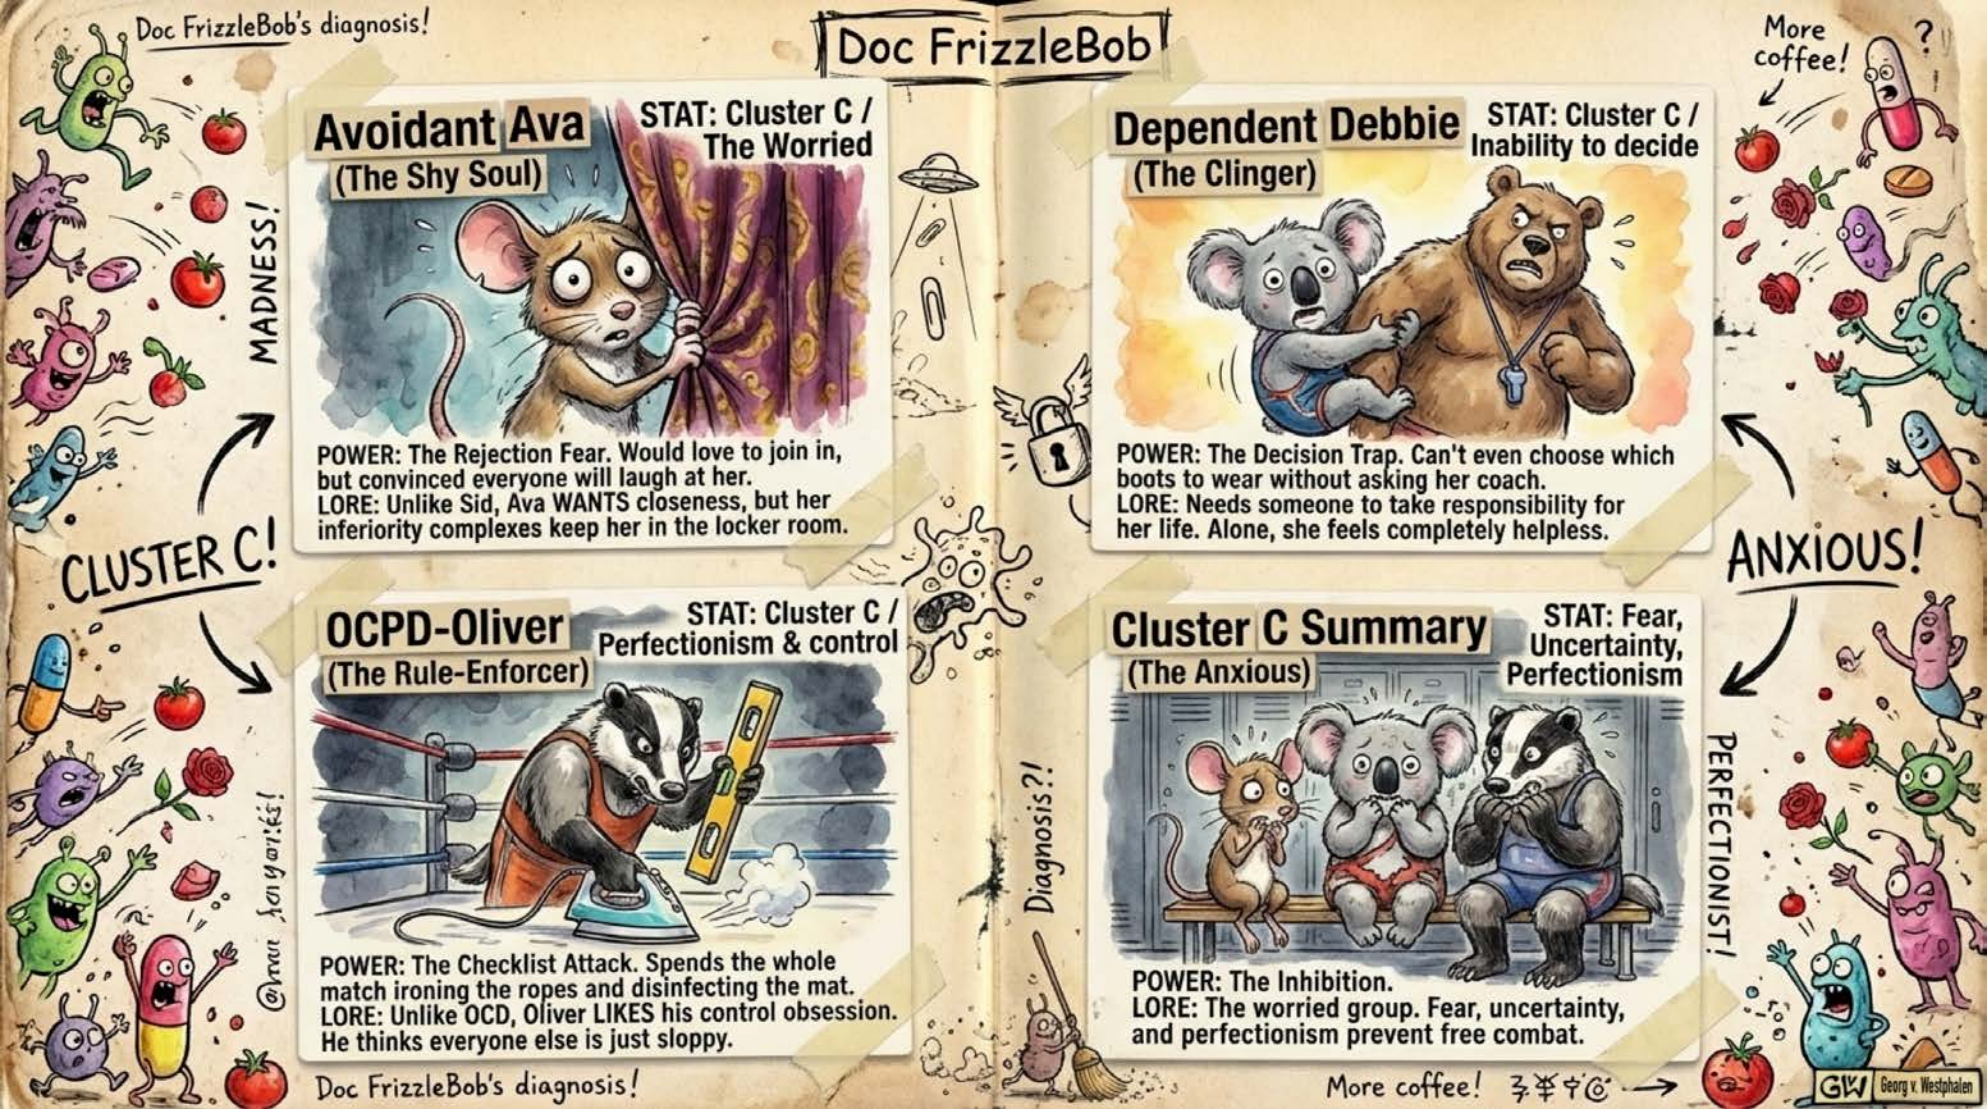

POWER: The Checklist Attack. Spends the whole match ironing the ropes and disinfecting the mat.
LORE: Unlike OCD, Oliver LIKES his control obsession. He thinks everyone else is just sloppy.

Cluster C Summary (The Anxious)

STAT: Fear,
Uncertainty,
Perfectionism

POWER: The Inhibition.
LORE: The worried group. Fear, uncertainty, and perfectionism prevent free combat.

Doc FrizzleBob's diagnosis!

Al-the-Alcoholic (Withdrawal Warrior)

STAT: 6h(Tremor)->24h(Halluc)
->48h(Seizure)->72h(DTs)

POWER: The DT-Shake. When Al runs out of juice, the ring shakes. Confusion, fever, hallucinations.
LORE: Alcohol withdrawal is the most dangerous. Without Ganry (GABA), the brain goes haywire.

Opiate-Ollie (The Nod)

STAT: Miosis (pinpoint pupils)
/ Respiratory depression

POWER: The Slow Motion. Feels no more pain, but barely breathes. Drifts away.
LORE: Blocks pain signals in the spinal cord and dampens the respiratory center in the brainstem.

Narcan-Nancy (The Opiate Evictor)

STAT: Opioid antagonist
/ Naloxone

POWER: The Instant Wake-Up. Kicks the door down and throws Ollie off the receptors immediately.
LORE: Saves lives but triggers brutal, instant withdrawal. The wrestler wakes up screaming and vomiting.

Cokie the Stimulant (Cocaine)

STAT: Mydriasis (wide pupils)
/ Inhibits DA/NE reuptake

POWER: The Heart Race. Infinite energy but makes the wrestler paranoid and aggressive.
LORE: Warning: Never give beta-blockers! Leads to an unopposed alpha strike — blood pressure shoots through the roof.

Doc FrizzleBob's diagnosis!

More coffee! ☕ →

SPLITTING-SPIDEY

(THE BINARY DEFENSE)

STAT
Defense mechanism
Classic for Bella

POWER: The Black & White Vision. Divides the world into heroes and traitors. No grey zone.
LORE: A primitive defense to reduce the complexity of feelings.

DISPLACEMENT-DAN

(THE SCAPEGOAT-SEEKER)

STAT
Anger at boss →
kick the locker

POWER: The Angry Slide. Takes out his frustration on someone weaker or blameless.
LORE: Rage is shifted from the dangerous source to a safe target.

Doc FrizzleBob's
diagnosis!

PROJECTION-PHIL

(THE FINGER POINTER)

STAT
I don't hate you,
YOU hate me!

POWER: The Mirror Toss. Throws his own unacceptable impulses onto his opponent.
LORE: Protects his ego by searching for and fighting his own faults in others.

SUBLIMATION-SUE

(THE PRO-COPER)

STAT
Mature defense /
Socially acceptable
channels

POWER: The Rage Reform. Transforms her aggression into training and mastery.
LORE: The only healthy way. Dark energy is used for something good.

MORE
COFFEE!

KayfaBIZARRO!

GW Georg v. Westphalen

DOC FRIZZLEBOB'S DIAGNOSIS!

ADHD-ALEX (The Distraction Demon)

STAT: Dopamine deficiency
in prefrontal cortex

POWER: The Squirrel Chase. Cannot focus on his opponent because a butterfly is flying by.
LORE: Stimulants (methylphenidate) help switch his filter system back on.

ANOREXIA-ANNIE (The Starving Saint)

STAT: BMI < 17.5 / Body
dysmorphic disorder

POWER: The Mirror Lie. Sees a giant in the mirror, though she's just skin and bones.
LORE: Danger: refeeding syndrome! If she eats after a long time, phosphate drops and the heart fails.

NMS-MEL (Neuroleptic Malignant Syndrome)

STAT: Fever + lead-pipe
rigidity + elevated CK

POWER: The Rigor Mortis Attack. Makes muscles as hard as iron bars. Life-threatening emergency!
LORE: Violent reaction to D2 blockers (Hali). Therapy: stop med, cool down, give dantrolene.

SEROTONIN-SYD (Syndrome)

STAT: Hyperreflexia +
clonus + sweating

POWER: The Shiver Shake. Too much Sally in the soup. Legs tremble uncontrollably (clonus).
LORE: Combo of SSRIs and MAOIs. Muscles over-cranked but not rigid like Mel's.

MORE COFFEE!

?! ?!

The Suicide Sentry (The Gatekeeper)

STAT: SAD PERSONS scale
Plan, means, intent

POWER: The Risk Check. Before the match begins, must check: Is the wrestler a danger to himself?
LORE: If the Sentry says YES, the fight ends immediately — safety first!

Walt & Ken (The B1 Tragedy)

STAT: Walt(Ataxia, confusion)
→ Ken(Amnesia, confabulation)

POWER: The Memory Eraser. Walt is the emergency (give thiamine!); Ken is the lasting damage (invents stories).
LORE: Without vitamin B1, the brain dies. Ken doesn't lie intentionally — he just fills the holes.

MedKayfabe!

The Attending (The Boss)

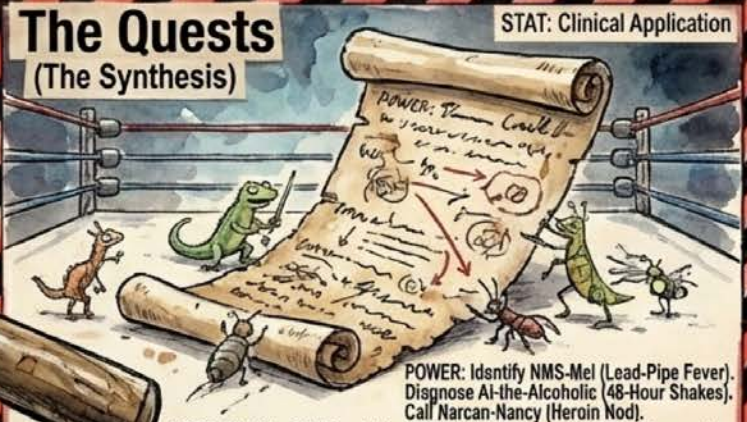

STAT: DSM-5 Master
100% Phenomenology

POWER: The Systemic Diagnosis.
LORE: Is it organic or psychiatric? Rule out the body before you blame the mind. Gestalt is dead. Stay fluffy!

The Quests (The Synthesis)

STAT: Clinical Application

POWER: Identify NMS-Mel (Lead-Pipe Fever). Diagnose Al-the-Alcoholic (48-Hour Shakes). Call Narcan-Nancy (Heroin Nod).
LORE: MedKayfab Psychiatry Edition v1.0 complete. Mind the gap!

MORE COFFEE!

Stay fluffy!

midw, sceog!
