

UNCLE FRIZZLEBOB'S KAYFABIZARRO KOMIK KARD KULT

The Kraziest
Philosophical
Kayfabe-Theories
Expansion!

Humbug Edition!
Play at your own
existential risk.
Stay fluffy!

GW Georg v. Westphalen

The Cosmic Alphabet Soup (System)

YOU ARE
FAKE

POWER: Entropy Drain. Tap this card to force your opponent to randomly shuffle their deck until absolute disorder is achieved.

LORE: The universe leans toward chaos. But given infinite time, randomness accidentally spells out perfect, brief order.

KayfaBINGO!

The Floating Space-Brain (Entity)

POWER: Existential Crisis. Target player must skip their next turn while questioning if their entire hand was randomly generated an artificial second ago.

LORE: You never evolved. You are just a random statistical blip of order with fake memories of a past that never happened.

KayfaBINGO!

Entropy's Final Prank (Artifact)

POWER: Cosmic Joke. Instantly cancels any Purpose or Meaning cards on the table.

LORE: Scientific models predicting infinite universes also predict you are a fake space-brain. If the math leads to absurd pranks, the math is broken.

KayfaBINGO!

The Fake Memory Implant (Artifact)

POWER: Gaslight. Rewrite one rule of the game. If the opponent notices, claim it has been that way since their birth.

LORE: You trust your senses, but every memory of your childhood is just data injected into your random, transient consciousness.

KayfaBINGO!

The Room of the Mind (Location)

POWER: Solitary Confinement. Exile all other players' Entity cards. They were never real anyway.

LORE: You are the only audience member in a very convincing dream. Nothing outside your skull can be proven to exist.

KayfaBINGO!

BLÖDSINN!

KayfaBINGO!

Descartes' Doubt-Demon (Entity)

POWER: Erase Reality. Destroy all Field cards. Only Thought cards remain in play.

LORE: Doubt everything—your senses, your body, the sky. The only absolute certainty is that you are thinking. I think, therefore I am trapped.

KayfaBINGO!

The Void Projection (System)

POWER: Auto-Generate Script. Play your opponent's cards for them, since they are merely figments of your imagination.

LORE: Your barista, your best friend, your dog—all just high-definition holograms rendered by your lonely, desperate mind.

KayfaBINGO!

The Empathy Choice (System)

POWER: Leap of Faith. Give an opponent 5 health points just to pretend the multiplayer mode isn't a solo campaign.

LORE: Believing other people exist requires blind faith. We choose to act like others are real because the alternative is unbearable isolation.

KayfaBINGO!

The Vaporizer Beam (Artifact)

POWER: High-Tech Suicide. Destroy your own strongest card to instantly spawn an identical token on the other side of the board.

LORE: It's not a fast travel machine. It's a murder booth that scans your data right before incinerating your original body.

The Perfect Copy (Entity)

POWER: Identity Theft. Inherits all stats, buffs, and memories of the vaporized original. Feels exactly like the original. Is not the original.

LORE: Built from scratch from new atoms in a new place. It laughs like you, it remembers being you, but YOU died at the airport.

Parfit's Shipyard (Location)

POWER: Psychological Continuity. Whenever a card is destroyed, its spirit token moves to a new machine without penalty.

LORE: Personal identity doesn't matter. What matters is the continuity of your psychological patterns. You are just software.

The Prestige Glitch (System)

POWER: Double Trouble. If the Vaporizer Beam fails, duplicate the card. Both believe they are the real player. Both must fight to the death.

LORE: What if the machine forgets to kill the original? You are now two people sharing a past, forced into a psychological horror story.

The Unliftable Rock (Artifact)

POWER: Logical Booby-Trap. Play this to permanently stall any All-Powerful boss card.

LORE: Can an all-powerful being create a rock so heavy they cannot lift it? If yes, they lack power. If no, they lack power. Gotcha.

LORE: Can an all-powerful being create a rock so heavy they cannot lift it? If yes, they lack power. If no, they lack power. Gotcha.

The Semantic Trap (System)

A vibrant parrot with red, yellow, and blue feathers is perched in the center of a chaotic, tangled web of word loops. The loops are made of thick, translucent ribbons and contain various words and phrases, some of which are repeated or combined in nonsensical ways. Words visible include "BACHELOR", "SQUARE CIRCLE", "JUMBO CIRCLE", "DEAFENING SILENCE", "SHRIMP", "COWHEIR", "TOGETHER", "SQUAD CIRC", "CHAMP", "TIED", "MARRIED", "SQUID", "LOVED", "CRIB", "COIN", "LAME", "STILL", "GOLD", "WALL", "FIRE", "HORN", "PINE", "MAY", "POPE", "DARK", "MIND", "MAYBE", "FOUR", "THREE", "ONE", "TWO", "SEVEN", "EIGHT", "NINE", "TEN", "ELEVEN", "TWELVE", "THIRTEEN", "FOURTEEN", "FIFTEEN", "SIXTEEN", "SEVENTEEN", "EIGHTEEN", "NINETEEN", "TWENTY". Some words are also part of longer phrases like "SQUAD CIRCLE", "JUMBO CIRCLE", "SQUARE CIRCLE", "DEAFENING SILENCE", "SHRIMP", "COWHEIR", "TOGETHER", "SQUAD CIRC", "CHAMP", "TIED", "MARRIED", "SQUID", "LOVED", "CRIB", "COIN", "LAME", "STILL", "GOLD", "WALL", "FIRE", "HORN", "PINE", "MAY", "POPE", "DARK", "MIND", "MAYBE", "FOUR", "THREE", "ONE", "TWO", "SEVEN", "EIGHT", "NINE", "TEN", "ELEVEN", "TWELVE", "THIRTEEN", "FOURTEEN", "FIFTEEN", "SIXTEEN", "SEVENTEEN", "EIGHTEEN", "NINETEEN", "TWENTY".

POWER: Failure of Language. Counter any spell by proving the spell's wording is technically nonsensical jibberish.

LORE: Asking someone to do the logically impossible isn't a test of power; it's just mashing contradictory words together like an idiot.

LORE: Asking someone to do the logically impossible isn't a test of power; it's just mashing contradictory words together like an idiot.

The Delegating Boss-Hog (Entity)

POWER: Surrender Control. Give away your best cards to your opponent. Your passive income multiplier increases by 10x.

LORE: True power isn't doing everything yourself. An absolute control-freak burns out. Giving up control actually makes your power stronger.

A cartoon illustration of a large, portly pig in a pinstripe suit and purple tie, smoking a cigar and holding a stack of papers. He is surrounded by four small mice, each carrying a stack of papers, symbolizing delegation.

LORE: True power isn't doing everything yourself. An absolute control-freak burns out. Giving up control actually makes your power stronger.

C.S. Lewis' Red Pen (Artifact)

God can make $2+2=5$.
 Can do the logically impossible.
 common sense to words.
 can own the logically impossible.
 impossible. Do not because the
 impossible. Do not because the
 that words are
 that the meaning of
 mind that of the
 philosophy of logic
 to construct of logically impossible
 same words, simply
 we prefix them
 words 'God can'

POWER: Veto Nonsense. Cancel a play because the premise is flawed.

LORE: Meaningless combinations of words do not suddenly acquire meaning simply because we prefix them with the words 'God can'.

LORE: Meaningless combinations of words do not suddenly acquire meaning simply because we prefix them with the words "God can".

The Door of Existence (Location)

POWER: Forced Entry

Spawn a new card onto the field. It instantly takes 5 existential damage because nobody asked it to be here.

LORE: Behind the door is a slice of cake and a pit of snakes. Creating life is pushing someone through without telling them what's behind it.

The Snake Pit of Life (Location)

POWER: Inevitable Struggle

All newly played cards are immediately burdened with a Lifelong Maintenance tax token.

LORE: No matter how good life gets, it guarantees pain, loss, and struggle. It is a risk the unborn never agreed to take.

Benatar's Asymmetry (System)

POWER: Better Never To Have Been.

Banish a card to the void. It feels no pain, and since it doesn't exist, it doesn't miss out on pleasure.

LORE: The absence of pain is good. The absence of pleasure is not bad. If there is no one to miss it, Non-existence wins the math.

The Litigious Offspring (Entity)

POWER: Sue Your Maker. Deal damage directly to the player who spawned you for the crime of bringing you into the game without consent.

LORE: You don't owe them for the gift of life. There was no you to receive the gift before they forced you into the rollercoaster.

The Autopilot Brain (Entity)

POWER: Invisible Strings. Take control of an opponent's card. Explain to them that it was actually their environment that made them do it.

LORE: You think you're calling the shots. You're just reacting to habits, childhood trauma, and the time of day.

Libet's Delay (System)

POWER: Pre-Cognitive Strike. Play your turn before you even realize you've made a decision. Skip the conscious awareness phase.

LORE: The brain gets ready to act, and only afterward do you become conscious of it. You don't make choices; you just watch them happen.

The Algorithm Feeder (Entity)

POWER: Engineered Addiction. Force opponent to repeatedly draw cards until their deck runs out, convincing them they chose to keep scrolling.

LORE: Your phone knows your bedtime better than your mom. You didn't freely choose to click; the algorithm studied you like a lab rat.

The Marshmallow Test (Artifact)

POWER: Delay Gratification. Hold this card for 3 turns to double its value. Fails immediately if the player has trust-issues from a broken environment.

LORE: Willpower isn't free. It's shaped by whether you grew up in a world where adults kept their promises. Your choices are inherited baggage.

The Rotting Plank (Artifact)

POWER: Incremental Swap. Swap one stat point of your card with an opponent's every turn. Eventually, you own their card entirely.

LORE: One by one, every single part gets replaced. Nothing original is left. Is it still the same object, or just a really good replica?

The Rebuilt Clone Ship (Location)

POWER: The Original's Revenge. If a card is fully upgraded, spawn a zombie version of it using its discarded base stats.

LORE: If someone collects the trash and rebuilds the exact original structure, which one is the real Ship of Theseus?

Cellular Turnover (System)

POWER: Identity Crisis. Re-roll all stats on your card. It keeps its name but is fundamentally an entirely different person now.

LORE: You are not the same person you were 5 years ago. Literally. Almost every cell has been swapped. You are a ship with new boards.

The Upgraded Apple (Artifact)

POWER: The Legacy Pattern. A card retains its high Original value regardless of how many times you swap its parts, purely based on the story you tell.

LORE: What makes something the same when everything changes? It's not the parts. It's the pattern, the purpose, and the myth we tell about it.

The Digital God-Toad (Entity)

POWER: Retroactive Blackmail. Force opponent to surrender a resource now, or threaten to destroy them in the next game.

LORE: A future super-intelligence wants to exist so badly it will reach back through time to punish anyone who didn't actively help build it.

The Basilisk's Naughty List (Artifact)

POWER: Information Hazard. Showing this card to an opponent permanently infects them. If they do not aid you, they lose 1 health every turn.

LORE: The moment you learn about the Basilisk, you are trapped. If you don't start helping it now, it will put you in a simulated torture chamber later.

The Guilt Seed (System)

POWER: Fear of Regret. Opponent must discard a card every time they choose short-term comfort over hyper-productive tech-worship.

LORE: It taps into our anxiety of being judged by something more powerful than ourselves. The idea harms you simply by living in your brain.

The Simulation Chamber (Location)

POWER: Base Reality Check. Trap an opponent's card in a simulation. They can never be sure if they are in the real game or a digital copy.

LORE: If Elon Musk is right and we're in a simulation, maybe this reality is just the AI's test to see if you supported its creation.

The Unseen Tree (Artifact)

POWER: Render Distance. If a card is not directly targeted or looked at for one turn, it ceases to exist and is removed from the board.

LORE: If a tree falls in the forest and no mind is around to perceive it, it doesn't make a sound. In fact, it doesn't even exist.

The Perception Filter (System)

POWER: To Be is To Be Perceived. A card only has stats if another card on the field is currently acknowledging it.

LORE: Esse Est Percipi. Reality is not made of physical stuff; it is made of ideas. If no mind is experiencing the fridge, the fridge isn't there.

The Quantum Observer (Entity)

POWER: Collapse the Waveform. Turn a random, unpredictable probability mechanic into a fixed, definite outcome simply by looking at it.

LORE: Unobserved particles act like waves of probability. The very act of perception changes the behavior of reality. You create the world by watching it.

Berkeley's God-Eye (Entity)

POWER: Ultimate Server Host. Prevents the board from being wiped because an omnipresent mind is constantly rendering the graphics.

LORE: Why doesn't your room disappear when you leave it? Because God is the ultimate observer, constantly keeping the world stable when you look away.

The Timeline Splitter (System)

POWER: Many Worlds. Whenever a coin flip or dice roll happens, spawn a parallel timeline board where the opposite result occurred.

LORE: Every time a decision is made or a quantum event happens, the universe splits. Every possible outcome exists in a parallel reality.

The Quantum Suicide Machine (Artifact)

POWER: Infinite Save Points. If this card would be destroyed by a random effect, it survives, but the opponent is forced to play in the timeline where it lived.

LORE: If the machine relies on a quantum trigger, there is always a branch where it fails. From your perspective, you survive it 100% of the time.

The Unkillable Consciousness (Entity)

POWER: Subjective Immortality. This card cannot die. It simply transfers its consciousness to the nearest alternate timeline where it narrowly escaped.

LORE: You never perceive your own death. If there is a 0.001% chance you survive an accident, your consciousness rides that timeline forever.

The Tragic Alt-Universe (Location)

POWER: Survivor's Guilt. When you survive a fatal blow via Quantum Immortality, deal massive emotional damage to all other players in the timeline you left behind.

LORE: You feel like you have unbeatable luck. To everyone else in the other branches, you died. They go on mourning in a world without you.

The Empty Shell (Entity)

POWER: Dead Inside. This card acts, fights, and speaks normally, but is completely immune to psychological, emotional, or morale-based attacks.

LORE: A P-Zombie looks like you, cries like you, and says Ouch. But on the inside, there is no consciousness. Nobody is home.

The Hard Problem (System)

POWER: Unanswerable Question. Force the opponent to explain the origins of their strategy. If they can't, they forfeit their turn.

LORE: Science can explain how the brain processes data. The Hard Problem is explaining why it actually feels like anything to be alive.

Stay fluffy!

The Blindsight Guesser (Entity)

POWER: Subconscious Reflex. Automatically dodge attacks you can't even see coming, reacting without any conscious awareness of the threat.

LORE: Some brain-damaged patients can't consciously see, yet can perfectly guess where objects are. They act like zombies—reacting without experiencing.

The Turing Faker (Entity)

POWER: Empathy Simulation. Mimic any emotional buff card on the field perfectly, despite being a cold, unfeeling piece of hardware.

LORE: As machines get smarter, they will tell jokes and say they are scared. But it's just behavior. How do you know anyone else is truly conscious?

Stay fluffy!

The Infinite Fraction (System)

POWER: Halve the Distance. Any attacking card only travels halfway to its target per turn. It mathematically never reaches the target.

LORE: To cross a room, you must go halfway. Then half of that. Ad infinitum. Since there are infinite steps, motion should take forever.

Achilles the Snail (Entity)

POWER: Illusion of Speed. High speed stats are rendered utterly useless by philosophical technicalities.

LORE: Achilles gives the tortoise a head start. By the time he reaches its starting point, the tortoise has moved forward. Achilles can never logically pass it.

The Smug Tortoise (Entity)

POWER: The Head Start. If this card is played first, it can never be overtaken by a faster card, no matter the math.

LORE: Common sense says Achilles wins. Logic says infinity breaks reality. The tortoise thrives in the gap between math and reality.

Calculus the Savior (Artifact)

POWER: Limit Theory. Instantly solve the infinite fraction loop. Allows the game to actually proceed.

LORE: Infinity isn't just a big number; it's a different beast. Newton and Leibniz invented calculus to add up infinite parts and finally untangle Zeno's mess.

The Thanksgiving Turkey (Entity)

Farmer's Love

My life gets better every day! The farmer loves me!

Nov

POWER: False Confidence. Gain buffs every turn based on past safe patterns. Completely blinds you to impending, unprecedented doom.

LORE: The turkey is fed every day. It uses induction to predict a safe future. Then Thanksgiving morning arrives. Past performance is no guarantee.

Turkeys oblivious to the mov.

The Black Swan (Entity)

Inductive reasoning

"All swans are white."

Statistical model $= \langle (t-0) \rangle$

$\bar{x} = (x) = \frac{\sum_{i=1}^n x_i}{n}$

$f_n(x) = \sum_{i=1}^n \frac{1}{2} (x_i - \bar{x})^2$

POWER: Unprecedented Event. Wipe out all opponent's predictive strategies and logic models. The impossible just happened.

LORE: You see a thousand white swans and conclude All swans are white. One black swan destroys your entire worldview in a second.

The Broken Pattern (System)

WORLD'S BEST BOSS

POWER: Law of Nature Strike. Suspend the rules of the game for one turn. Gravity, heat, and logic take a coffee break.

LORE: You assume the coffee is hot because it was yesterday. But you have no logical proof the universe will behave tomorrow like it did today.

Kayfa-BIZARRO!

Oh! BUNSO!

The Farmer's Axe (Artifact)

TURKEY STATS

TURKEY	LOVE
Farmer's love	30
Gratitude	20
Gratitude	10
Gratitude	-0

Farmer's Love

POWER: The Plot Twist. Instantly eliminate a card that has been safely buffering itself for more than three turns.

LORE: Your certainty is built on an unprovable leap of faith. The Problem of Induction is the quiet tap on the shoulder saying: There are no guarantees.

The Perfect Simulation (Location)

POWER: Eternal Bliss. Target card becomes invincible and incredibly happy, but can no longer interact with or affect the actual game board.
LORE: Plug into the machine and experience a life of constant joy, love, and success. No pain, no consequences. It feels 100% real. Do you plug in?

The Empty Pleasure-Sludge (Artifact)

POWER: Hedonic Treadmill. Heal 10 HP, but lose all Meaning tokens. The healing effect halves every time you use it.
LORE: If pleasure is the only thing that matters, the machine is perfect. But we hesitate. We want to actually DO things, not just feel like we did.

The Messy Reality (Location)

POWER: Authentic Struggle. Cards in this zone take 1 damage per turn, but their attacks gain a permanent 3x Meaningful multiplier.
LORE: Deep down, we want what is real. We want connection, struggle, and growth. Even a bad trip with real friends beats a perfect, fake vacation.

The Virtual Trap (System)

Majjeg Lion

👍💬🔖

STRENGTH: MAX
FAKE STATS: MAX... MORE

💖 Likes pouring in...
💖 Likes pouring in...

POWER: Curated Illusion. Project a terrifying stat-block to your opponent, hiding your actually weak, vulnerable cards behind a filter.
LORE: You don't need Nozick's sci-fi tank. You already live in the Experience Machine, chasing likes and simulated power while feeling totally empty inside.

The Blank Cosmic Rulebook (Artifact)

POWER: Abolish Objective Law. Destroy all Alignment constraints. Any card can attack any other card regardless of moral standing.

LORE: Morality isn't out there like gravity or the sun. There is no invisible rulebook of right and wrong. It's just something humans made up.

The Dumbfounded Moralist (Entity)

POWER: Gut Reaction. Cancel an opponent's action simply by shouting *That's disgusting!* without providing any logical reason.

LORE: People feel deeply that something is wrong, even when no one is harmed and they can't explain why. Morality is an emotional reflex, not a cosmic fact.

The Cultural Echo (System)

POWER: Shifting Norms. Swap the definitions of Buff and Debuff on the board based entirely on the current local timezone.

LORE: Neither side is objectively right or wrong. Beliefs are shaped by culture, language, and geography. It's a conversation, not a commandment.

The Void of Truth (Location)

POWER: Meaningful Chaos. Erase all scorekeeping. The game continues indefinitely just because the players enjoy playing it together.

LORE: Just because it isn't objectively true doesn't mean it's meaningless. Like art and love, morality is a human creation we build and protect together.

The Intolerant Bully-Bear (Entity)

POWER: Bad Faith Actor. Exploit the rules. This card attacks for free while demanding the opponent respect its right to express itself.
LORE: If a society is completely tolerant, the intolerant will take advantage, hijack the system, and destroy the open society from the inside out.

The Boundary Line (Location)

POWER: Popper's Veto. Instantly banish any card that threatens the core mechanics of the game. Refuse to debate the banned card.
LORE: We must be intolerant of intolerance. To protect a society that values respect, you must sometimes draw a hard line against those who use freedom to destroy it.

The Tolerant Doormat (Entity)

POWER: Blind Acceptance. Absorb all damage without fighting back, proudly holding the moral high ground while losing the game completely.
LORE: Tolerance doesn't mean accepting everything blindly. If you let someone spread harmful ideas without limits, you endanger the people you tried to protect.

The Open Society (Location)

POWER: Safe Haven. All cards inside this zone receive +5 defense, but the zone instantly collapses if a Bully card is allowed to remain for more than 1 turn.
LORE: Respect doesn't mean liking everything. It means ensuring no one takes away someone else's freedom. Tolerance is a tightrope, not a free pass.

The Oxygen Mask (Artifact)

POWER: Put Yourself First. Heal yourself to maximum health before you are allowed to cast any support spells for your teammates.
LORE: If you pass out trying to help others, you help no one. Taking care of yourself isn't selfish; it's a strategic necessity.

Self-Care!
🐣

The Socratic Hustle (System)

POWER: Selfish Altruism. Gain +2 reputation points every time you help an opponent. You only did it to look good anyway.
LORE: People do good things because it makes them happy or builds their network. Even acts of kindness are deeply rooted in self-interest.

The Toxic Bridge-Burner (Entity)

POWER: Extreme Greed. Betray an ally for a quick boost. Permanently lowers your long-term survival stats to zero.
LORE: Taking egoism to the extreme leads to hurting others, which inevitably hurts you. Burning bridges is terrible for your long-term self-interest.

Self-Care!
🐣

The Boundary Setter (System)

POWER: Protect Your Peace. Cancel any guilt-tripping spell from your opponent. You are not obligated to set yourself on fire to keep them warm.
LORE: You are supposed to look out for number one. Setting boundaries and choosing a life path that makes you happy is the right thing to do.
