

The Thinking Trap:
The Mental Minefield.

Your greatest opponent is
between your ears. Stay fluffy!

KayfaBIZARRO!

Why The Thinking Trap?

The Antagonist isn't a virus;
it is the Doctor's own brain.
In the heat of the Brawl, the
mind takes shortcuts straight
into a Diagnostic Dead-End.
We debug the human bias.
Act as the Mind-Warden and
identify Reasoning-Ruptures.

Diagnosis?!

What Is MedKayfab?

MedKayfab is a medical
learning card system that
merges collaborative
narrative card games with
visual medical education.
Every concept becomes
a character. You remember
stories, not lists. MedKayfab
turns lists into stories.

Diagnosis?!

The Card Anatomy Blueprint

Top Left:
Character name
+ Subtitle

Top Right: STAT block
(Error data, incidence)

Center: Visual Prompt
(Surrealist animal doing
cognitive work)

Bottom POWER:
The Psychological
Sabotage

Bottom LORE:
The mechanistic Why.

Brain Brawl!

Rethink!

Don't get pinned!

Call Doc Frizzle!

GW Georg v. Westphalen

ANCHOR-THE-HEAVY (ANCHORING BIAS)

STAT: Found in 50% of diagnostic errors
High Lock-on strength.

POWER: The First-Impression-Hook. Grabs the first piece of data and chains the Differential-Engine to it, ignoring everything else.

LORE: Tendency to rely too heavily on the first piece of information offered. Once dropped, the Mental-Ship stops moving.

PREMATUR-THE-CLOSURE (PREMATURE CLOSURE)

STAT: Most common cognitive error
Diagnosis-Satisfied trigger.

POWER: The Final-Bell-Ringer. Rings the Victory-Bell upon finding one possible answer, stopping the search for the Lethal-Reggie still in the ring.

LORE: Search-Satisfaction effect. The brain hates uncertainty and closes the case to save energy. The Good-Enough-Trap.

FRAMING-THE-PHANTOM (FRAMING EFFECT)

STAT: Decision shift > 30% based on presentation / Loss-Aversion logic.

POWER: The Lens-Warp. Changes how Arena-Stats look. If triage says drug-seeker, you only see Behavioral-Moves instead of Sepsis-Signals.

LORE: Information is never neutral. The Frame dictates the Power-Move chosen.

DIAGNOSTIC-MOMENTUM-THE-TRAIN

STAT: High Social-Pressure
Hard to stop once started.

POWER: The Unstoppable-Slide. Once a diagnosis is in the Chart-Scroll, Momentum keeps it going. No one wants to say the train is on the wrong track.

LORE: Labels stick. If the previous doctor wrote Pneumonia, everyone treats Pneumonia without re-evaluating the Heart-Fail.

Availab-the-Recent (Availability Bias)

STAT: Driven by Vividness and Recency
Bypasses Preval-the-Prior

POWER: The Flashback-Strike. Because you saw a Rare-Zebra yesterday, Availab makes you see that same Zebra in every Common-Horse today.
LORE: Things easy to remember are judged as being more likely than they actually are.

Base-Rate-the-Neglecter

STAT: Ignores Hoofbeats /
Focuses on Zebra-Odds

POWER: The Probability-Blindness. Ignores Preval-the-Prior and focuses only on the High-Tech-Test, even if known for False-Alarms.
LORE: Failing to consider how common a disease is in the population. Statistical-Sabotage.

Represent-the-Stereotype

STAT: Looks like a duck heuristic /
Ignores variance

POWER: The Identity-Lock. If the wrestler doesn't Look like a heart-attack patient, Represent tells you it's impossible, ignoring the Troponin-Scream.
LORE: Judging a situation based on similarity to a Mental-Prototype rather than actual probability.

Recall-the-Vivid

STAT: Emotional weight > Statistical weight

POWER: The Trauma-Filter. A single Lethal-Miss from the past becomes a permanent Mental-Scar, causing over-ordering of High-Tech-Scans for minor scuffs.
LORE: Emotional memory hijacks System-2-the-Thinker, leading to Defensive-Wrestling.

Confirma-the-Filter (Confirmation Bias)

STAT: Found in almost 80% of diagnostic brawls.

POWER: The Data-Sieve. Only lets Stats through that prove his current theory is right. He Crushes any Red-Flag-Reggie that says he is wrong.

LORE: The mind likes to be right. Actively avoids Cognitive-Dissonance by ignoring contradictory evidence.

Cherry-the-Picker (Selective Evidence)

STAT: Fragmented reasoning
High Ego-Protection.

POWER: The Buffet-Move. Walks through the Lab-Labyrinth picking only the one abnormal result that fits the story, ignoring ten Normal-Baselines that disprove it.

LORE: Focus on a small subset of data to support a Pre-conceived-Match-Outcome.

Oversimpli-the-Smooth (Reductionism)

STAT: Ignores Multi-Morb-Max
/ Forced parsimony.

POWER: The Narrative-Flattening. Takes a complex Multi-System-Riot and forces it into a single Simple-Story, missing the Hidden-Secondary-Attack.

LORE: Misusing Occam-the-Razor. Sometimes a wrestler really does have three different enemies at once.

Backfire-the-Stubborn

STAT: Belief-persistence /
Resistance to Second-Opinions.

POWER: The Double-Down. When a Lab-Decoder proves the diagnosis wrong, Backfire becomes more convinced he is right, claiming the lab is Glitched.

LORE: Challenging a core belief activates maximum Ego-Shields, making the false belief str

GW

Georg v. Westphalen

HUMBUG!

HUMBING!

KayfabINGOI!

KayfabINGOI!

ZEBRA-the-Distraction (Base Rate Neglect)

STAT: Rare-Disease-Lust / High-Tech bias.

POWER: The Exotic-Hunt. Spending all Value-Tokens hunting a 1-in-a-million Genetic-Glitch while the Common-Infection wins the match.

LORE: When you hear hoofbeats, think horses, not zebras. The allure of the Rare-Discovery trap.

Sunk-Cost-the-Stayer

STAT: Commitment bias / Escalation of commitment.

POWER: The Investment-Trap. We've spent 3 hours and 5 scans on this Liver-Path, we can't stop now!—even though the Lung-Path is the real fight.

LORE: Inability to abandon a failing strategy because of the Tokens already spent.

Blind-Spot-the-Expert (Overconfidence)

STAT: Calibration error / Expert Aura effect.

POWER: The Knowledge-Shield. Pattern-Match confidence is so high they don't check Red-Flag-Reggies. I've seen this 100 times; I don't need the stats.

LORE: Experts are highly prone to Anchoring by trusting their System-1 far too much.

Omission-the-Passive (Omission Bias)

STAT: First, do no harm taken to the extreme.

POWER: The Paralysis-Move. Fear of the Side-Effect-Saboteur drives No-Action, allowing the Primary-Antagonist to win.

LORE: Judging an Action that causes harm as worse than an Inaction that allows harm, even with the same outcome.

Gambler-the-Fallacy

STAT: Belief in Law of Small Numbers.

POWER: The Sequence-Lie. The last three wrstlers had Muscle-Scuffs, so the next **MUST** have something else! Assuming independent events are linked.

LORE: Misunderstanding probabily. Every Match is a fresh Coin-Flip for the Diagnostic-Engine.

Hindsight-the-Historian

STAT: I knew it all along effect.

POWER: The Review-Warp. After the Post-Mortem-Verdict, claims the anwer was Obvious, making the original team look like Rookies.

LORE: Seeing the past as more predictable than it was. Prevents learning from real Uncertainty-Gaps.

Outcome-the-Judge (Outcome Bias)

STAT: Quality of decision judged by quality of outcome.

POWER: The Results-Mask. If a Bad-Decision results in a Good-Outcome, it's judged a Great-Move, reinforcing Lethal-Habits.

LORE: A good outcome doesn't prove the process was sound. Sometimes you just get Lucky-Rolls.

Triage-the-Tunnel (Premature Triage)

STAT: Early labeling in high-pressure arenas.

POWER: The Pathway-Lock. Once Triage applies the Psych-Label, the Emergency-Team stops looking for Organic-Enemies, ignoring crashing Vitals-Stats.

LORE: Early categorization creates a Mental-Ghetto for the patient where new data is ignored.

Wait, what?!

GW

Georg v. Westphalen

Pause-the-Circuit-Breaker (Forced Reflection)

STAT: Cognitive Time-out /
Debias maneuver.

POWER: The Thinking-Reset. Forces the team to stop the System-1-Flash and ask: What else could this be?
LORE: Deliberate System-2 activation. Breaks the Momentum-Train before it hits the cliff.

Devil-the-Advocate (Cognitive Forcing)

STAT: Forced Counter-
Hypothesis generation.

POWER: The Theory-Smasher. Sole job is to Disprove the current diagnosis. Hunts for the One-Fact that breaks-Lock.
LORE: Falsification-logic. If the theory survives the Advocate, It's a Strong-Hypothesis.

Checklist-the-Sentinel

STAT: Reduces Omission-Errors
by 30-50%.

POWER: The Memory-Anchor. Doesn't allow the Brain-Bunker to skip steps. Every Red-Flag-Reggie must be
LORE: Externalizing memory to prevent Focus-Tunneling. The Mechanical-Conscience of the team.

Group-the-Think (Collective Bias)

STAT: Hierarchy pressure /
Attending-Aura impact.

POWER: The Consensus-Crush. No one wants to disagree with the Lead-Wrestler, so everyone ignores the Glitch-in-the-Logic together.
LORE: Social pressure overrides individual reasoning. The Collective-Blindness of the arena

Gestalt-the-Glance (Pattern Recognition)

STAT: System-1 /
Expert Gut-Feeling.

POWER: The 2-Second-Verdict. One look at the Wrestler's-Posture and Arena-Smell, and Gestalt knows the enemy. The Flash of the Thinking-Engine.

LORE: Highly efficient for Typical-Matches. Caveat: Becomes a Thinking-Trap if the Atypical-Trickster is in the ring.

Rule-the-Thumber (Rules of Thumb)

STAT: Clinical Prediction
Rules (e.g., Wells, PERC).

POWER: The Calculation-Shield. Uses Validated-Math to decide the Odds-of-the-End, protecting from Availability-Bias.

LORE: Externalized System-2. Pre-calculated-Logic for high-speed arenas.

Red-Flag-the-Ranger (Risk-Screening)

STAT: Sensitivity-focused /
Must-not-miss logic.

POWER: The Safety-Search. Scans the Timeline specifically for Alarm-Signals. If found, halts the Simple-Story for High-Tech-Backup.

LORE: Prioritizing High-Morbidity-Exclusion over High-Probability-Inclusion.

Occam-the-Slicer (Parsimony)

STAT: Lex Parsimoniae /
Simpler is better.

POWER: The Unified-Field. Cuts through three Minor-Infections to show they are actually one Lupus-Lucy autoimmune war.

LORE: Entities should not be multiplied without necessity. Caveat: Don't let Slicer Smooth away a Dual-Diagnosis-

Ambigu-the-Anxiety (Uncertainty Intolerance)

STAT: High Order-Rate for Low-Yield scans.

POWER: The Resource-Drain. Cannot stand not knowing 100%, so they order every Lab-Decoder, even if it won't change the match.

LORE: The Need-for-Certainty drives over-testing and Inciden-the-Oma hunts.

Gestalt-the-Doubt (Sense of Alarm)

STAT: Something is wrong signal / Expert intuition.

POWER: The Gut-Churn. Even if Stats look Normal-Baseline, Doubt whispers: The wrestler doesn't look right. The Vigilance-Trigger.

LORE: Subconscious pattern recognition of Impending-Crash signals.

Wait-the-Watcher (The Power of Time)

STAT: Test-of-Time heuristic.

POWER: The Slow-Reveal. Reminds the team: Wait 2 hours, and the Enemy-Name-Tag will become visible.

LORE: Managing the Acute-vs-Chronic timeline. Sometimes the best Diagnostic Move is Observation-and-Re-evaluation.

Probability-the-Cloud (Bayesian Thinking)

STAT: Non-binary thinking / Confidence intervals.

POWER: The Shifting-Mist. Shows that every diagnosis is just a Percentage-of-Certainty. New labs just shift the Mist.

LORE: Defeating Binary-Bias (Yes/No). Thinking in Likelihoods instead of Verdicts.

Hand-the-Off-Hole (Handoff Error)

STAT: Responsible for 80%
of serious medical brawls.

POWER: The Data-Gap. During the Tag-Team-Switch, the Vital-Stats and Red-Flags fall to the floor, leaving the new wrestler blind.

LORE: Information Decay during transitions. The-Story-of-the-Match is lost in translation.

Hierarchy-the-Halt (Authority Bias)

STAT: Speak-up culture failure
/ Junior-Senior dynamic.

POWER: The Silent-Witness. The Junior sees a monster, but because the Attending-Boss says Pneumonia, he keeps his mouth shut.

LORE: Social-Power overrides Logical-Truth. The Alpha-Aura prevents Course-Correction.

Echo-the-Chamber (Groupthink)

STAT: High in tight-knit
Specialty-Squads

POWER: The Consensus-Trap. The Cardio-Clan thinks it's a Heart-Halt, so they stop looking for Lung-Drown, despite clear x-rays.

LORE: Reinforcement of shared biases within a group. Team-Unity becomes a Thinking-Cage.

Patient-the-Voice-Ignore (Dismissal Bias)

STAT: Especially high in
Geri-Silver and
Psych-Daze cases

POWER: The Narrative-Exclusion. The wrestler says This pain is different, but the team ignores him for their Better-Story based on Old-Stats.

LORE: Failing to incorporate the Subjective-Experience into the Objective-Differential.

KING-CRASH!

KING-CRASH!

Flash-the-Intuition (System 1)

STAT: Fast / Automatic /
Emotional / Effortless.

POWER: The Rapid-Reaction. Perfect for Sepsis-Storms where there is no time to think. The Instinct-of-the-Arena.

LORE: Pattern-matching based on Hard-Wired-Experience.

Thinker-the-Analytic (System 2)

STAT: Slow / Logical /
Rational / High Effort.

POWER: The Deep-Dive. Slows down time to analyze every Stat-and-Lore detail when facing Mystery-Mayhem.

LORE: Rule-based reasoning. The Correction-Tape for Flash's mistakes.

Toggl-the-Switch (Cognitive Flexibility)

STAT: Ability to shift
between S1 and S2.

POWER: The Strategic-Shift. Knowing when to use Flash (action) and when to call in the Thinker (analysis).

LORE: The Master-Heuristic. Recognizing the Complexity-Tier and choosing the right Thinking-Tool.

Fatig-the-Decision-Drain

STAT: Error rate rises by 50%
after 12 hours in the arena.

POWER: The Mental-Exhaustion. As the Mental-Energy-Bar drains, the team drops Thinker and relies 100% on Flash, triggering Anchor-Traps.

LORE: Cognitive load exhaustion. The Prefrontal-Fortress runs out of Glucose-Fuel.

Disconfirm-the-Hunter (Falsification)

STAT: Actively seeking evidence against the theory.

POWER: The Hypothesis-Killer. Instead of trying to prove It's Pneumonia, the Hunter tries to prove It's NOT Heart Failure.

LORE: Science-logic. A theory is only strong if it survives an Attack-on-its-Logic.

Reflection-the-Mirror (Meta-Cognition)

STAT: Thinking about thinking / Self-audit.

POWER: The Bias-Detector. Asks: Why do I think this is the answer? Am I anchoring? Am I tired?

LORE: Internalized Overseer. Creates a Gap between the Impulse and the Action.

Outsider-the-Perspective (Fresh Eyes)

STAT: Cognitive diversity / Consultant logic.

POWER: The Blind-Spot-Viewer. Enters the ring and sees the Red-Flag-Reggie team has been Anchored away from for 4 hours.

LORE: Breaking Groupthink and Context-Lock with a Neutral-Arena-View.

Probabil-the-Calibrator

STAT: Assigning numeric values to Verdicts.

POWER: The Logic-Sharpening. Instead of I think it's cancer, says I am 70% sure. Leaves Mental-Space for the 30% that it's Infection-lan.

LORE: Prevents Binary-Lockdown and keeps the Differential-Engine open

The Second-Diagnosis Secret (Hickam's Dictum)

POWER: The Dual-Strike.
You found the UTI-Uprising,
but missed the Heart-Halt
because you stopped looking.

LORE: Slaying Prematur-
the-Closure. Always ask: Is
there a second match
happening at the same time?

STAT: Patients can have
multiple unrelated enemies.

The Atypical-Trickster (Non-Textbook Case)

STAT: 30% of Lethal-Monsters
don't follow the Manual.

POWER: The Camouflage.
Heart-Halt presents with
Shoulder-Ache only.
Pneumonia-Punk presents
with only Confusion.

LORE: Biology doesn't read
the Textbook-Scrolls. Exploits
Pattern-Recognition-Bias.

The Negative-Data Nugget

STAT: The importance of
what ISN'T there.

POWER: The Silence-Signal.
The lack of a fever
is the key to
proving it's NOT
Infection-Ian.

LORE: Learning to read
the Absence-of-Stats.
Sherlock Holmes logic:
The dog that didn't bark.

The Vitals-Anchor (Reality Check)

STAT: Basic stats override
complex theories.

POWER: The Foundation-Guard.
While the team argues
over a Rare-Zebra, points to
the Heart-Rate-140 and
says: The wrestler is
crashing NOW.

LORE: Prevents
Intellectual-Distraktion.
Vitals are the ground
truth of the arena.

The Mortality-and-Morbidity Meeting (M&M)

STAT: Systematic review of Lethal-Misses.

POWER: The Lesson-Extractor.
Gathering after the Final-Bell at the Mirror-of-Mistakes to identify which Thinking-Trap killed the wrestler.

LORE: Cultural De-Biasing.
Turning Trauma into Tactics for the next match.

The Safety-Net Discharge

STAT: Communication of Uncertainty-Gaps.

POWER: The Exit-Strategy.
If your Chest-Arena starts to Drown, come back instantly.

LORE: Protecting against Prematur-the-Closure by making the patient part of the Monitoring-Squad.

The Second-Opinion Culture

STAT: Psychological Safety / Flat hierarchy.

POWER: The Voice-Enabler
A culture where the Junior-Rookie can stop the Lead-Wrestler to correct the Nomogram.

LORE: Systemic De-Biasing
Reducing the power of Hierarchy-the-Halt.

The Diagnostic-Journal (Reflection)

STAT: Deliberate practice / Feedback loops.

POWER: The Memory-Sharpening
Recording every Diagnostic-Guess and comparing it to the Final-Verdict to find the Glitch.

LORE: Calibration
Reducing Overconfidence-the-Ego through actual Stats-o

The Thinking Attending (Doc FrizzleBob)

STAT: Master of Meta-Cognition / Bias-Slayer.

"Logic-Loops"

POWER: The Cognitive-Coach.

LORE: What else could this be? Are you anchored? Don't trust your brain—it's trying to save energy, not the patient! Stay fluffy!

Synthesis Quest 2: The Zebra Chase

POWER: QUEST: Identify the Bias-Trap (Availab-the-Recent) and restore the Grounding-Force (Base-Rate-the-Neglecter).

LORE: Young wrestler has a Joint-Ache. Team just read about Rare-Genetic-Zebra and orders a 5,000-Token scan.

Synthesis Quest 1: The Anchored Drunk

POWER: QUEST: Identify the Bias-Trap (Anchor-the-Heavy) and use the Circuit-Breaker (Pause).

LORE: A wrestler arrives Confused-and-Vomiting, smelling like beer. System-1-Flash calls it Al-the-Alcoholic, ignoring the Subdural Crescent.

Synthesis Quest 3: The Satisfied Search

POWER: QUEST: Identify the Thinking-Error (Prematur-the-Closure) and apply the Sentinel-Checklist for Total-Body-Inventory.

LORE: Trauma wrestler has a Broken-Arm. Team fixes it and sends him to the Waiting-Room, missing the fatal bleed.

Doc FrizzleBob
