

TYMPANIC-TY (THE DRUMMER)

STAT: PARS TENSA VS. FLACCIDA
/ CONE OF LIGHT

POWER: THE SOUND-VIBRATION. Ty catches the airwaves and kicks the OSSICLE-ORCHESTRA into gear.

LORE: If Ty is perforated (Tymp-Tear), the bridge is broken. If he's sucked in (Retraction), Choles-the-Steatoma might be growing behind him.

EUSTACHIAN-EARL (THE PRESSURE-VALVE)

STAT: MIDDLE EAR PRESSURE
= ATMOSPHERIC PRESSURE

POWER: THE POP. Earl opens up to let the middle ear breathe and equalize pressure.

LORE: If Earl goes on strike (Dysfunction), the ear fills with fluid (Serous-Sid), and Ty the Drummer gets pulled into a vacuum.

OSSICLE-OSCAR (THE BONE-CHAIN)

STAT: MALLEUS, INCUS, STAPES
20X AMPLIFICATION

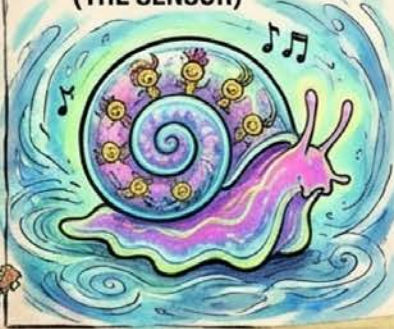

POWER: THE LEVER-FORCE. Oscar takes Ty's vibration and concentrates it onto the tiny Oval Window.

LORE: If Oscar gets stiff (Otosclerosis), the Stapes-Footplate gets stuck. The music stops before it hits the brain.

COCHLEA-CORA (THE SENSOR)

STAT: ORGAN OF CORTI
20Hz - 20kHz RANGE

POWER: THE FLUID-WAVE. Cora turns mechanical waves into electrical Brain-Currents.

LORE: Cora is lined with Hair-Cell-Soldiers. If they are shell-shocked by loud noise or aged out, the high frequencies die first.

BLÖDSINN!

BLÖDSINN!

BLÖDSINN!

OTITIS-EXTERNA-EX (THE SWIMMER'S EAR)

STAT: TRAGUS TENDERNESS
/ PSEUDOMONAS AERUGINOSA

POWER: THE CANAL-CLOG.
Ex makes the outer ear canal red, swollen, and agonizingly tender to the touch.

LORE: Moisture breaks down the wax-shield, letting the Bacterial Punks move in. Ex is a surface-riot.

CHOLESTHEATOMA (THE BONE-EATER)

STAT: ATTIC RETRACTION
/ PEARLY WHITE MASS

POWER: THE DESTRUCTIVE PEARL. Choles is a skin-sac that grows where it doesn't belong, eating the Ossicle-Oscar bones as it expands.

LORE: Not a tumor, but a destructive cyst. If not evicted by surgery, Choles can break into the brain or the inner ear.

MEDIA-MITCH (ACUTE OTITIS MEDIA)

STAT: BULGING TM /
STREPTOCOCCUS PNEUMONIAE

POWER: THE PRESSURE-BURST. Mitch traps pus behind the drum. It hurts until the drum Pops and the pressure releases.

LORE: Usually follows a cold when Eustachian-Earl fails to drain the middle ear swamp.

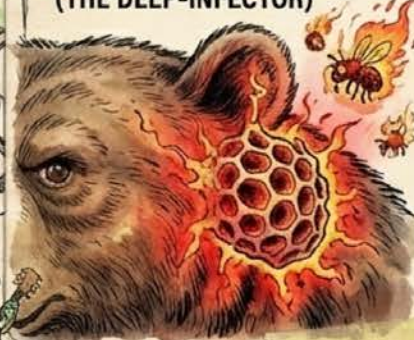

MASTOID-MAX (THE DEEP-INFECTOR)

STAT: POST-AURICULAR SWELLING
/ PROTRUDING EAR

POWER: THE BONE-STORM. Max is what happens when Mitch moves into the Air-Cells of the skull.

LORE: Mastoiditis is a surgical emergency. If the bone-honeycomb melts, the infection can reach the brain.

Diagnosis?!

BPPV-Benny (The Crystal-Slipper)

STAT: Dix-Hallpike (+) /
Rotary Nystagmus

POWER: The Room-Spin. Benny drops Ear-Crystals into the semicircular canals where they don't belong.

LORE: Gravity moves the crystals, telling the brain you're spinning when you're just lying down. Fix it with the Epley-Adjustment.

Vestibular-Vince (The Neuritis)

STAT: Constant Vertigo /
Positive Head Impulse

POWER: The Balance-Blackout. Vince inflames the balance-nerve, causing days of intense dizziness and nausea.

LORE: Usually viral. Unlike Monty, Vince doesn't mess with the hearing—he only sabotages the Level-Sensor.

Meniere-Monty (The Pressure-Spike)

STAT: Vertigo + Tinnitus +
Hearing Loss (Triad)

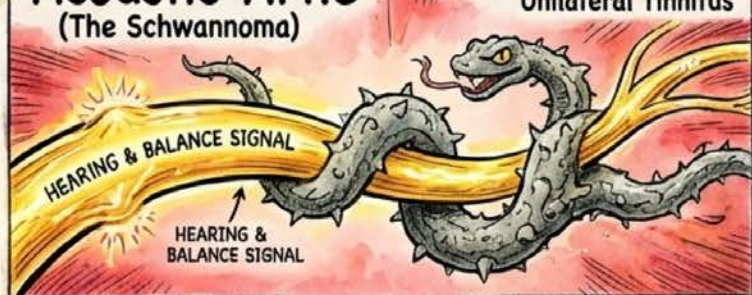

POWER: The Fluid-Flood. Monty builds up too much fluid in the inner ear until the system Overloads.

LORE: The Attacks can last for hours. Monty is the master of Fluctuating Hearing Loss.

Acoustic-Artie (The Schwannoma)

STAT: Unilateral SNHL /
Unilateral Tinnitus

POWER: The Slow-Growth Squeeze. Artie is a tumor on the nerve that slowly chokes the hearing and balance signals.

LORE: Rule of ENT: Unilateral hearing loss is Acoustic-Artie until proven otherwise by MRI.

What the
FLUFF?!

Septal-Sam (The Wrecked Wall)

STAT: Deviated Septum / Unilateral obstruction

POWER: The Airflow-Block. Sam is a crooked wall that makes breathing through one side of the Nose-Tunnel impossible.
LORE: Often a legacy of a previous Wrestling Match (Trauma). Requires a Septoplasty-Surgical-Rebuild.

Sinus-Sid (The Clogged Cave)

STAT: Maxillary > Ethmoid / Purulent

POWER: The Pressure-Headache. Sid traps mucus in the skull-caves until they turn into bacterial Bio-Reactors.
LORE: Occurs when the Ostium-Exit is blocked by swelling. If Sid stays chronic, Poly-Pete moves in.

Epistaxis-Eddie (The Bleeder)

STAT: Kiesselbach's vs. Sphenopalatine

POWER: The Red Leak. Eddie starts a blood-riot in the nose. Most often it's just a Surface-Scuff.
LORE: Posterior Eddie is the Heavyweight—he bleeds down the throat and needs Balloon-Packing to stop.

Poly-Pete (The Nasal Polyp)

STAT: Samter's Triad

POWER: The Grape-Clog. Pete is a fleshy, Grape-like growth that dangles in the nose, blocking smell and air.
LORE: Chronic inflammation-edema of the mucosa. Pete is the sign of an Allergy-War gone long-term.

KayfaBOGGLE!

Strep-Sgt (Pharyngitis)

STAT: Centor Criteria

POWER: The White-Coat Riot. The Sgt covers the tonsils in white Pus-Armor and makes swallowing feel like razor blades.
LORE: Usually Group A Strep. If the Sgt isn't defeated, he might send his Rheumatic-Ghost to attack the heart.

Peritonsillar-Phil (The Quinsy)

STAT: Hot Potato Voice

POWER: The Pus-Pocket. Phil builds a massive abscess behind the tonsil, pushing the Uvula-Punching-Bag to the side.
LORE: A surgical emergency! Phil needs a Needle-Aspiration-Drain or the airway might close.

Epiglottitis-Emma (The Choke-Point)

STAT: Tripod position

POWER: The Airway-Slam-Door. Emma swells up like a giant red cherry and shuts the Respiratory-Runway forever.
LORE: Usually Hib-driven. Do not look in the throat with a tongue depressor—you might cause the final Door-Slam.

Croup-Chris (The Barker)

STAT: Barking Cough / Steeple Sign

POWER: The Subglottic Squeeze. Chris narrows the pipe just below the vocal cords, making every breath sound like a whistle.
LORE: Viral (Parainfluenza). Chris loves cool night air and steroids to calm his Squeeze.

Cordy-the-Vocalist (The Folds)

STAT: True Folds
vs False Folds

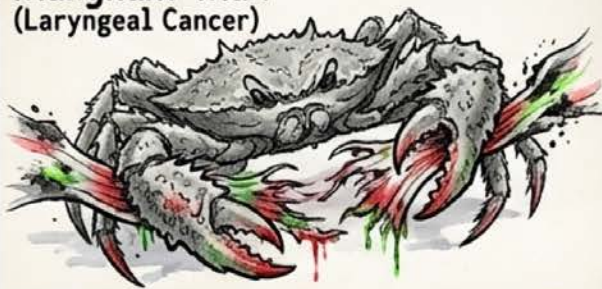

POWER: The Vibrate-Speak. Cordy flaps together at high speed to create the Voice-Current.

LORE: If one Cordy is paralyzed, the voice becomes a Breathy-Whisper.

Malignant-Max (Laryngeal Cancer)

STAT: Hoarseness > 3 weeks

POWER: The Invasive-Grit. Max is a crusty growth that eats the vocal cords and spreads to the Neck-Nodes.

LORE: Squamous Cell Carcinoma. If Max takes over, the whole Voice-Box might have to be evicted.

Singer-Sarah (Vocal Nodules)

STAT: Bilateral 1/3

POWER: The Callous-Raspy. Sarah builds Screamer's Nodules—small callouses from too much Acoustic-Wrestling.

LORE: Chronic vocal abuse. Sarah needs Voice-Rest and therapy, not surgery.

Reflux-Ray (LPR)

STAT: Globus /
Throat clearing

POWER: The Acid-Spill. Ray is the Silent Reflux—he spills stomach acid onto the vocal cords at night.

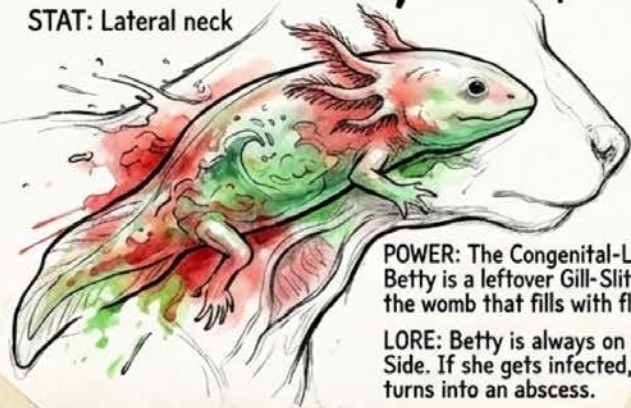

LORE: Unlike GERD, Ray doesn't always cause heartburn. He just irritates the Throat-Lining until it swells.

HUMBUG!

Branchial-Betty (The Cyst)

STAT: Lateral neck

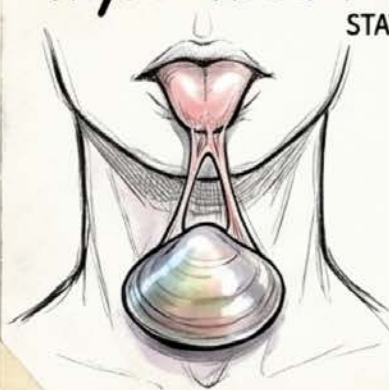

POWER: The Congenital-Lump. Betty is a leftover Gill-Slit from the womb that fills with fluid.

LORE: Betty is always on the Side. If she gets infected, she turns into an abscess.

Thyro-Thad (Duct Cyst)

STAT: Midline / Moves with tongue

POWER: The Rising-Lump. Thad is a leftover track from when the thyroid moved from the tongue to the neck.

LORE: If the lump moves up when you stick out your tongue, it's Thad. Requires the Sistrunk-Extraction.

Salivary-Stan (Sialadenitis)

STAT: Swelling with meals

POWER: The Gland-Block. Stan traps saliva behind a Stone-Obstruction until the gland explodes in pain.

LORE: Stan loves the Submandibular gland because the saliva there is thick and runs uphill.

Mumps-Molly (Parotitis)

STAT: Bilateral Parotid swelling

POWER: The Chipmunk-Cheek. Molly makes the face swell up so much the ears stick out.

LORE: Viral. Molly is the reason for the MMR-Shield.

MedKayfable!

CALL DOC
DOC FRIZZLE!

Weber & Rinne (The Tuning Forks)

STAT: 512 Hz

POWER: The Conduction-Test. They tell us if the problem is in the Bridge (Conductive) or the Sensor (Sensineural).

LORE: Rinne: Bone > Air = Conductive. **Weber:** Lateralizes to bad ear = Conductive; to good ear = Sensineural.

Otoscope-Oz (The Eye)

STAT: Speculum / Light source

POWER: The Canal-Vision. Oz allows us to look past the wax-guards and see Tympanic-Ty directly.

LORE: Oz is the gatekeeper. Without Oz, Mitch and Choles stay hidden in the dark.

Naso-Endo-Ned (The Scope)

STAT: Flexible fiber-optic

POWER: The Throat-Spy. Ned snakes through the nose to look at Emma-Epiglottis and Cordy-the-Vocalist in real-time.

LORE: The gold standard for seeing the Airway-Runway without the patient gagging.

Audiogram-Annie (The Mapper)

STAT: Air-Bone gap

POWER: The Hearing-Map. Annie draws the landscape of what the patient can hear and what is lost to the Silence-Shadows.

LORE: If the lines are far apart, there's an Air-Bone-Gap—proof of a conductive bridge failure.

Ciprodex-Cid (Ear Drops)

STAT: Cipro + Dexa

POWER: The Double-Strike. Cid kills the bacteria and cools down the swelling in Otitis-Externa-Ex.

LORE: Steroids + Antibiotics. Only use if the Drum (Ty) is intact, unless it's the Otic-Safe version!

Oxymetazoline-Oxy (Afrin)

STAT: Max 3 days!

POWER: The Instant-Open. Oxy shrinks the nasal pipes instantly for Emergency Breathing.

LORE: Use it for >3 days and you meet Rhinitis-Rebound-Rob—the nose becomes permanently clogged without the drug.

Fluticasone-Flo (Nasal Steroid)

STAT: 2-week warm-up

POWER: The Allergy-Brake. Flo calms the Mucosal-Riot in the nose, shrinking Poly-Pete and opening Sinus-Sid.

LORE: Works locally. Flo doesn't start the fight; she ends it by stopping the recruitment of inflammatory cells.

Meclizine-Mick (Antivert)

STAT: H1-Blocker

POWER: The Motion-Sickness Shield. Mick numbs the Balance-Center so the patient can stop vomiting.

LORE: Mick doesn't fix the crystals; he just turns down the Brain's-Spin-Alarm.

Stay fluffy!

Myringotomy-Mike (The Tube)

STAT: PE Tube

POWER: The Bypass-Drain. Mike cuts a hole in Tympanic-Ty and places a tiny pipe to do Eustachian-Earl's job.

LORE: Prevents Mitch-Media from returning by keeping the middle ear swamp dry and ventilated.

T&A-Tommy (Tonsillectomy)

STAT: >7/year

POWER: The Eviction. Tommy removes the Tonsil-Towers permanently to stop the Strep-Sgt from ever returning.

LORE: Post-op risk: The Day-7-Bleed. When the scabs fall off, things can get bloody!

FESS-Frank (Sinus Surgery)

STAT: Functional Endoscopic

POWER: The Cave-Rebuild. Frank uses Ned-the-Scope to widen the Ostium-Exits so Sinus-Sid can drain naturally.

LORE: Removing the clogs (tissue/polyps) to restore the Aero-Dynamics of the skull.

Tracheostomy-Tray (The Emergency Exit)

STAT: Below Cricoid

POWER: The Ultimate-Bypass. Tray creates a new airway door in the neck, bypassing Emma-Epiglottis and the Mouth-Traffic.

LORE: A life-saver for long-term Airway-Assassins or those who can't breathe through the Main-Entrance.

Baha-Bob (Bone Anchored Hearing Aid)

STAT: Bone conduction bypass

POWER: The Skull-Vibrator. Bob bypasses the Conductive-Bridge entirely by vibrating the skull to talk directly to Cochlea-Cora.
LORE: Perfect for patients with no canal or a destroyed Ossicle-Oscar.

Cochlear-Clara (The Bionic Ear)

STAT: Auditory Nerve probe

POWER: The Nerve-Pulse. Clara bypasses Cochlea-Cora entirely, using electrical probes to Talk to the brain.
LORE: For the Sensor-Failures. Clara doesn't make sound louder; she creates a new Electrical-Language.

Tinnitus-Tim (The Ghost-Ringer)

STAT: Subjective vs Objective

POWER: The Phantom-Scream. Tim creates a ringing or buzzing sound that only the patient can hear.
LORE: Often the Cry of dying hair cells in the cochlea. The brain makes up the sound to fill the silence.

Dysphagia-Dot (The Swallowing Glitch)

STAT: Aspiration risk

POWER: The Wrong-Pipe-Slide. Dot makes food go down the Respiratory-Runway instead of the Esophagus-Road.
LORE: Can lead to Pneumonia-Pete. Dot is the enemy of the Airway-Sentry.

KayfaBIZARRO!

Kayfa-BIZAR-ROI

Diagnosis?!

Foreign-Body-Felix

STAT: Bronchus vs Ear

POWER: The Object-Block. Felix is a bead, a bean, or a coin stuck where it doesn't belong.

LORE: In the ear: Do not get the bean wet (it will swell!).
In the lung: Unilateral-Wheeze is the clue.

Ludwig's-Luke (Angina)

STAT: Woody edema

POWER: The Tongue-Lift. Luke inflames the floor of the mouth until the tongue is pushed up and back, choking the patient.

LORE: Usually a Dental-Infection-Riot. Luke is an Airway-Assassin in disguise.

Septal-Hematoma-Hank

STAT: Saddle-Nose Threat

POWER: The Saddle-Nose-Threat. Hank traps blood under the septal skin, cutting off the Cartilage-Food-Supply.

LORE: Emergency! If Hank isn't drained, the septum dies, and the nose collapses into a Saddle shape.

Necrotizing-Nick (Malignant Otitis)

STAT: Diabetic elderly

POWER: The Bone-Rot. Nick is the Final-Evolution of Ex-Externa. He eats through the ear canal and into the skull.

LORE: Nick targets the cranial nerves. If Nick isn't stopped with IV antibiotics, the Brain-Fortress falls.

The Centor-Scribe (Diagnosis)

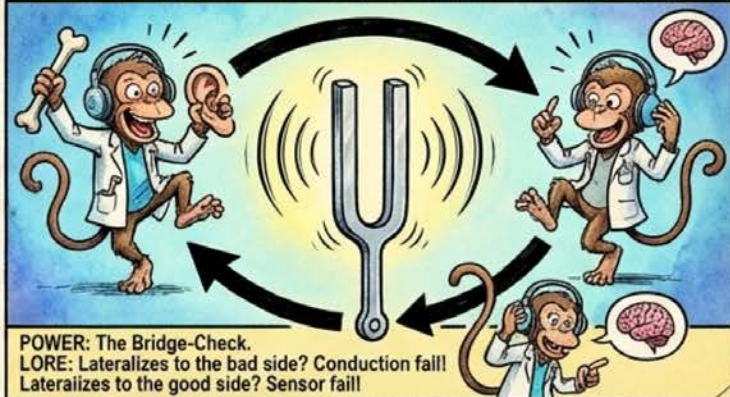

STAT: Scoring Strep-Sgt

POWER: The Antibiotic-Key. The Scribe tells us who gets the Penicillin-Pen and who just needs tea.
LORE: Prevents Resistance-Rob by only attacking the Sgt when he's actually present.

The Tuning-Fork-Trio

STAT: Weber/Rinne Logic

POWER: The Bridge-Check.
LORE: Lateralizes to the bad side? Conduction fail!
 Lateraliizes to the good side? Sensor fail!

The Hot-Potato Voice (Sign)

STAT: Abscess vs Epiglottitis

POWER: The Sound-Muffle. The patient sounds like they are trying to talk with a scorching hot potato in their throat.
LORE: Caused by massive swelling in the oropharynx, preventing normal Sound-Reflection.

The Steeple-Sign Sentry (Imaging)

STAT: Subglottic Narrowing

POWER: The Croup-Confirm.
LORE: The trachea looks like a church steeple instead of a square pillar.

MedKayfabe! Stay fluffy!

The ENT Attending (Doc FrizzleBob)

STAT: Master of the Head-Mirror

POWER: The Orifice-Oracle.

LORE: Look past the wax. Feel the neck. Is the airway safe? If not, why are you still holding a tongue depressor? Stay fluffy!

Synthesis Quest 1

STAT: The Drum-Pressure

POWER: Identify the Media-Mitch and explain why the pain vanished. Is Tympanic-Ty okay?

LORE: A 6-year-old wrestler has a fever and a red, bulging drum. Suddenly, the pain stops, and yellow fluid leaks out.

Synthesis Quest 2

♪ RASP!
GARBLE!
♪ RASP!
GARBLE!

STAT: The Screamer's Rasp

POWER: Identify Singer-Sarah and choose the plan: Surgery or Silence?

LORE: A lead singer has been hoarse for 3 months. Oz-the-Scope shows two small bumps on the edges of the white ribbons.

Synthesis Quest 3

STAT: The Vertigo-Vortex

POWER: Identify the Crystal-Slipper (BPPV-Benny) and perform the Epley-Adjustment.

LORE: A patient says the room spins for 30 seconds every time they roll over in bed. Weber lateralizes nowhere, Rinne is normal.
