Georg v. Westphalen

Apoptosis-Arnie (The Clean Exit)

STAT: Caspase activation
DNA laddering
Pyknosis

POWER: The Programmed Suicide.
Arnie shrinks and packs his
bags without waking the
Immune-Police.

LORE: Follows orders (BCL-2/TP53).
The Quiet Sacrifice
preventing viral punks or
cancerous revolts.

KayBIZARRO!

Atrophy-Artie (The Shrinker)

STAT: Ubiquitin-Proteasome
pathway / Autophagic vacuoles

POWER: The Size-Reduction.
Gets smaller to survive
a Famine-Hatch.

LORE: Digests his own
organelles to lower
metabolic rent.
Efficient but weak.

← KayfaBIZARRO!

Necrosis-Nick (The Messy Death)

STAT: Cell swelling
Membrane rupture
Massive inflammation

POWER: The Toxic Explosion.
Spills DAMP-Guns everywhere.

LORE: Result of ischemia/toxins.
Triggers a Neutrophil-Riot
causing secondary
neighbor damage.

RIOT!

DECAY!

Metaplasia-Mel (The Shape-Shifter)

STAT: Columnar to Squamous
(Smokers) / Squamous to
Columnar (Barrett's)

POWER: The Tissue-Swap.
Replaces a sensitive wall
with tough armor to survive
chronic irritation.

LORE: A defensive move,
but a Pre-Cancer-Risk that
can evolve into
Malignant-Max.

SENSITIVE

Neutro-Nathan (The First Responder)

STAT: Segmented Nuclei
24-48 hour window
Myeloperoxidase

POWER: The Kamikaze Attack.
Arrives first to spray
Oxygen-Bleach
(Free Radicals).

LORE: Short-lived. Dies
in the trenches, forming
the Pus-Puddle of acute
inflammation.

Macro-Maggie (The Cleaner)

STAT: CD68+
Arrives after 48 hours
Phagocytosis

PONER: The Garbage-Eater.
Cleans Nathan's mess and
decides if it's time for
Healing-Henry.

LORE: The Director who
presents the enemy's head
to the T-Cell-Tacticians.

Granuloma-Gerry (The Lockdown)

STAT: Epithelioid Histiocytes
Langhans Giant Cells
Caseous Necrosis

POWER: The Eternal Prison.
Builds a wall when
Stubborn-Strep or Tuberculo-
Toby can't be killed.

LORE: Type IV hypersensitivity
cage. If the wall breaks
via immunosuppression,
prisoners escape.

Fibro-Fiona (The Scar-Maker)

STAT: Collagen Type III -> Type I
TGF-beta signal

POWER: The Permanent Patch.
Fills holes with
Biological-Cement (Scar
tissue).

LORE: Provides strength
but loses function. A
heart patched by Fiona
won't pump.

BLÖDSINN!

RIOT!

SURVIVE!

Benign-Benny (The Localist)

STAT: Well-differentiated
Encapsulated
Slow growth

POWER: The Slow-Crowding.
Just wants to grow in his
own little bubble.

LORE: Only danger is Pressure (e.g., in
the Brain-Bunker where space is limited).

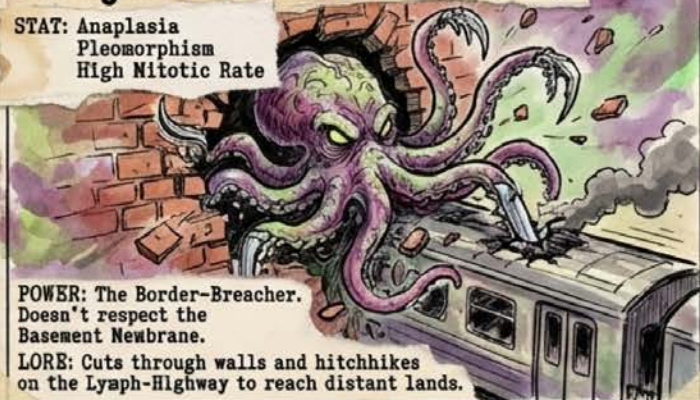

Malignant-Max (The Invader)

STAT: Anaplasia
Pleomorphism
High Mitotic Rate

POWER: The Border-Breacher.
Doesn't respect the
Basement Newbrane.

LORE: Cuts through walls and hitchhikes
on the Lymph-Highway to reach distant lands.

Metastasis-Mitch (The Traveler)

STAT: Seed and Soil theory /
Lymphatic vs. Hematogenous
spread

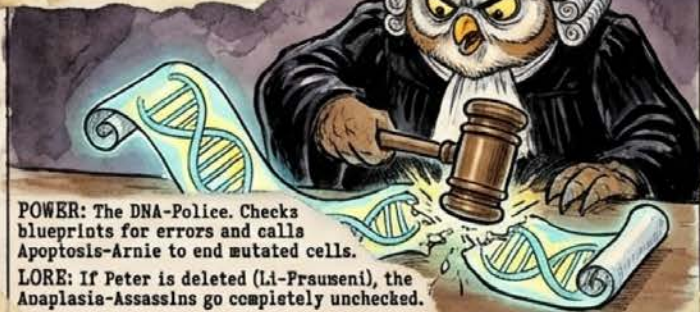

POWER: The Global Colonialist. Sets
up Sub-Matches in distant organs.

LORE: Stage IV war. Once Mitch colonizes,
the Blade-Brigade rarely wins alone.

P53-Peter (The Guardian)

STAT: Tumor Suppressor Gene /
Chromosome 17p

POWER: The DNA-Police. Checks
blueprints for errors and calls
Apoptosis-Arnie to end mutated cells.

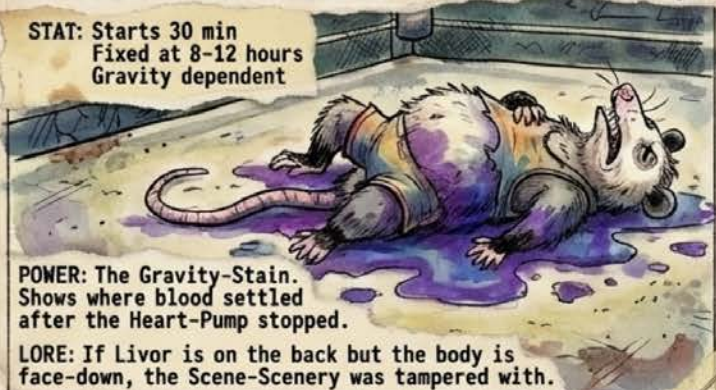

LORE: If Peter is deleted (Li-Fraumeni), the
Anaplasia-Assassins go completely unchecked.

What the
FLUFF?!

13

LIVOR-THE-LIVID (Post-Mortem Lividity)

STAT: Starts 30 min
Fixed at 8-12 hours
Gravity dependent

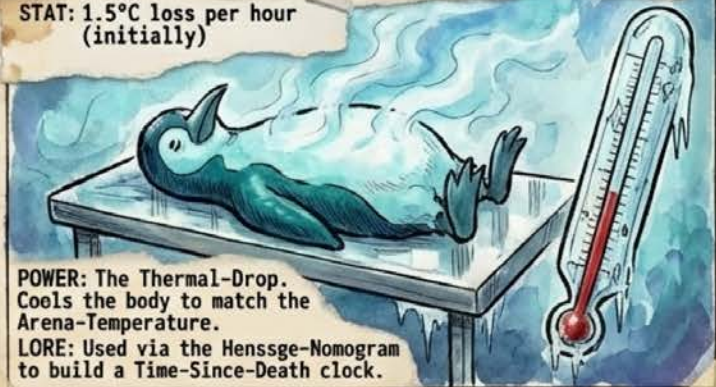

POWER: The Gravity-Stain.
Shows where blood settled
after the Heart-Pump stopped.

LORE: If Livor is on the back but the body is
face-down, the Scene-Scenery was tampered with.

ALGOR-THE-COLD (Post-Mortem Cooling)

STAT: 1.5°C loss per hour
(initially)

POWER: The Thermal-Drop.
Cools the body to match the
Arena-Temperature.

LORE: Used via the Henssge-Nomogram
to build a Time-Since-Death clock.

RIGOR-THE-STIFF (Rigor Mortis)

STAT: Nysten's Law
Starts 2-4h
Max 12h
Resolves 36h

POWER: The Muscle-Lock.
ATP-Batteries run out,
and Calcium-Gates leak.

LORE: The Molecular-Handcuff
that starts at the jaw and
moves down.

PUTREFACTION-PAUL (The Decomposer)

STAT: Green discoloration
(Cecum) / Bloating /
Marbling

POWER: The Gas-Factory.
Uses Internal-Bacteria-
Punks to digest from
the inside out.

LORE: The natural
Cleanup-Crew that turns
the body green and
distended.

Abrasion-Abby (The Scuff)

STAT: Antemortem (Red/Scab) vs.
Postmortem (Yellow/Parchment)

POWER: The Friction-Sign.
Shows the direction
of the Slide from a
Scrape-Match.

LORE: Yellow/dry =
happened after the bell.
Red/crusty = happened
during the fight.

OUCH!

Call Doc Frizzle!

OUCH!

GRIME!

Laceration-Larry (The Tear)

STAT: Tissue bridging /
Irregular edges /
Not a cut!

POWER: The Blunt-Force-Rip.
Caused by crushing,
leaving messy
bridges behind.

LORE: Hallmark of
the Hammer or Fist
(unlike an Incised
clean cut).

OUCH!

SUBVERT!

Contusion-Connie (The Bruise)

STAT: Color timeline:
Red -> Blue -> Green
-> Yellow

POWER: The Inner-Leak.
A Hemorrhage-in-Hiding.
Skin intact, but pipes
broken underneath.

LORE: Follows the Heme-
Breakdown-Road
(Hemoglobin -> Biliverdin
-> Bilirubin).

GRIME!

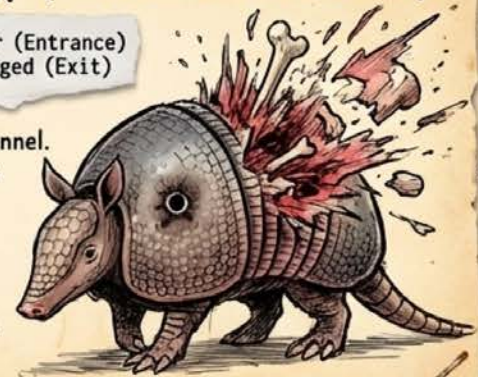

Bullet-Bill (The Entrance vs. Exit)

STAT: Abrasion collar (Entrance)
vs. Stellar/Ragged (Exit)

POWER: The Kinetic-Tunnel.
Entrance-Gate is neat;
Exit-Gate is a chaotic
mess.

LORE: Contact-Range
shots leave a Muzzle-
Stamp or Soot-Shadow
on the skin.

Hanging-Harry (The Ligature)

21

STAT: V-shaped mark
Above the Larynx
Pale furrow

POWER: The Gravity-Choke.
Uses body weight to shut the
Oxygen-Highway and Carotid-
Pipes.

LORE: Death is usually from
Brain-Ischemia, not a
broken neck.

PUNK
SCIENCE!

Strangling-Stella (The Manual Choke)

22

STAT: Fingernail scratches
Hyoid bone fracture
Petechiae

POWER: The Hands-on-Halt.
A Closer-Combat move.

LORE: Causes Tardieu-Spots
(petechiae) as veins are blocked
but arteries keep pumping.

DECAY!

Drowning-Drake (The Wet-Lung)

23

STAT: Mushroom of froth (Mouth/Nose)
Diatoms in the bone marrow

POWER: The Fluid-Invasion.
Fills the lungs with Arena-
Water.

LORE: Diatoms (algae) deep
in the bone marrow prove the
wrestler was breathing water
before dying.

HUMBUG!

PUNK
SCIENCE!

Cyanide-Cy (The Bitter Almond)

24

STAT: Bright pink lividity
Bitter almond smell

POWER: The Mitochondrial-Jam.
Stops Cellular-Engines from using
oxygen; blood stays red because
cells can't eat it.

LORE: Kills the Electron-Transport-
Chain. The victim suffocates
despite O₂-rich blood.

Nutmeg-Nancy (The Congested Liver) (25)

STAT: Red-and-tan speckled pattern
Heart failure sign

POWER: The Backflow-Stain.
Happens when Cardio-Carl fails and blood backs up into the liver-sponge.

LORE: Central-Veins flood with red while edges turn tan.

GRIME!

Diagnosis?!

GRIME!

Bread-and-Butter Bill (Pericarditis) (27)

STAT: Fibrinous exudate
Friction rub

POWER: The Rough-Surface.
Coats the heart in Fibrin-Glue.

LORE: The inflammation makes the heart Scratch against its housing (friction rub).

HUMBUG!

GWICHT!

Shrunken-Sheila (Chronic Pyelonephritis) (28)

STAT: Irregular scars
Blunted calyces
Thyroidization

POWER: The Kidney-Contractor.
Turns the kidney into a scarred lump after too many UTI-Uprisings.

LORE: Renal-Pipes block with pink goo, appearing like Thyroid-Tissue under the scope.

OUCH!

HUMBUG!

29

Shock-Shaun (MODS)

STAT:
Diffuse Alveolar Damage
Acute Tubular Necrosis

POWER: The Global Shutdown.
Occurs when Total-Pressure
fails and all organs
starve.

LORE: The Death-Spiral. If
lungs (ARDS) and kidneys (ATN)
fail, the match is lost.

30

Gouty-George (The Crystal-Stab)

STAT:
Needle-shaped crystals
Negative birefringence

POWER: The Toe-Torture.
Drops Uric-Acid-Needles
into joints, causing an
Inflammation-Riot.

LORE: Loves the Big-Toe-Ring
(Podagra). High-purine
snacks are his fuel.

SUBVERT!

31

Lupus-Lucy (SLE)

STAT:
ANA (+)
Anti-dsDNA (+)
Libaan-Sacks endocarditis

POWER: The Self-Sabotage.
Her immune-army gets
confused and attacks the
Kidney-Filters and
Skin-Shield.

LORE: A Type III hypersensi-
tivity Immune-Complex war.

32

Sarcoid-Sarah (The Non-Caseating)

STAT:
Bilateral hilar lymphadenopathy
ACE ↑
Calcium ↑

POWER: The Mystery-Lump.
Builds Granuloma-Gerrys
everywhere, but crucially
without the Cheese-Center.

LORE: A mysterious immune-
revolt that loves to hide in
the Lung-Gates.

KayfaBOGGLE!

33 Athero-AI (The Plaque)

STAT: Fatty streaks
→ Fibrous plaque
→ Calcification

POWER: The Pipe-Narrower.
Builds Gunk-Walls inside
arteries, slowing Oxygen-
Traffic.

LORE: If AI's wall pops, he
triggers the Clot-Monster
for a Heart-Halt.

KayfaBIZARRO!

34 Aneurysm-Annie (The Bulge)

STAT: Berry (Brain)
vs. AAA (Belly) vs.
Dissection (Thorax)

POWER: The Weak-Wall-
Balloon. Stretches the
Pipe-Armor until it
bursts.

LORE: A Berry-Burst
causes a sudden
Thunderclap-Headache.

35 Thrombos-the-Clot (The Jam)

STAT: Lines of Zahn /
Virchow's Triad

POWER: The Static-
Stoppage. Builds a
Blood-Dam that halts
flow completely.

LORE: Born in a moving
stream = Lines of Zahn.
Born after death =
Currant-Jelly.

36 Embolus-the-Exile (The Drifter)

STAT: Fat, Air, Amniotic,
Thromboembolus

POWER: The Long-Distance
Strike. A piece of
Thrombos that breaks free
to jam a Smaller-Pipe.

LORE: A Saddle-Embolus
blocks the main Lung-
Highway, ending the
match instantly.

Emphy-Sema (The Air-Trapper)

(37)

STAT: Alpha-1 antitrypsin deficiency / Centriacinar

POWER: The Wall-Dissolver.
Eats the Alveolar-Balloons into useless, flabby Air-Sacs.

LORE: Loss of Snap (Elasticity).
Can get air in, but can't get it out (Pink-Puffer).

Bronchitis-Bill (The Blue Bloater)

(38)

STAT: Reid Index $\uparrow$ /
Mucus gland hyperplasia

POWER: The Mucus-Flood.
Fills Airway-Tunnels with blue sludge.

LORE: Chronic irritation leads to Gland-Expansion, the king of the Smoker's Cough.

Pneu-Moni (The Lung-Solidifier)

(39)

STAT: Lobar vs. Bronchopneumonia
Hepatization stages

POWER: The Liquid-Lung.
Fills the Air-Balloons with pus/blood until the lung is Solid like a liver.

LORE: Gray Hepatization:
RBCs die but the fibrin-armor stays, permanently stealing the Air-Space.

Silic-the-Stoner (Silicosis)

(40)

STAT: Eggshell calcification /
Whorled collagen nodules

POWER: The Sand-Lung.
Breathing Rock-Dust turns soft lungs into hard, scarred stone.

LORE: Macro-Maggies eat the dust but die, calling Fibro-Fiona to build a permanent scar-tomb.

Nephritic-Nate (The Blood-Leaker) (41)

STAT: Hematuria (RBC Casts) / Hypertension / Oliguria

POWER: The Clogged-Filter. Inflames the Glomerulus-Grit until blood leaks and the Pressure-Alarm sounds.

LORE: Post-Strep Nate is a Type III War. Immune-Complexes riot in the filter.

Nephrotic-Nelly (The Protein-Drain) (42)

STAT: Proteinuria (>3.5g) / Edema / Hyperlipidemia

POWER: The Sieve-Leak. Filter is so broken that all the Albumin-Gold drains out, causing water swelling.

LORE: MCD-Molly (Minimal Change Disease) attacks junior wrestlers, erasing the Podocyte-Feet.

MedKayfabel

ATN-Andy (Acute Tubular Necrosis) (43)

STAT: Muddy brown casts / Ischemic vs. Toxic

POWER: The Pipe-Melt. Renal-Pipes die and fall apart, clogging the system with Muddy-Debris.

LORE: Most common cause of Acute Renal Failure. If the host survives, pipes can regrow.

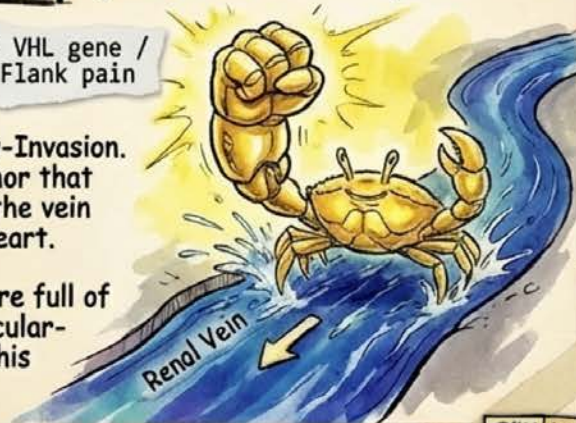

MedKayfabel

Renal-Cell-Ray (The Gold-Tumor) (44)

STAT: Clear cell / VHL gene / Hematuria + Flank pain

POWER: The Yellow-Invasion. A bright yellow tumor that loves to grow into the vein and travel to the heart.

LORE: Clear Cells are full of lipids. Ray is a Vascular-Master who builds his own blood supply.

H&E-Holly (The Standard)

(45)

STAT: Hematoxylin
(Blue/Nuclei) +
Eosin (Pink/Protein)

POWER: The Pink-and-
Blue Vision. Provides
the Standard-Map of
the cellular battlefield.

LORE: Blue means
Acid-Lover (DNA/RNA);
Pink means Basic-
Lover (Cytoplasm).

PAS-the-Sugar-Seeker

(46)

STAT: Periodic Acid-
Schiff / Magenta color

POWER: The Glycogen-
Glow. Highlights every-
thing sweet: Basement
Membranes, Fungal-
Punks, Sugar-Stores.

LORE: A thick Basement
Membrane glows as a
solid, unmistakable
bright magenta line.

Prussian-Blue-Pete

(47)

STAT: Perl's Stain /
Iron detector

POWER: The Rust-Finder.
Turns hidden Iron-
Stores (Hemosiderin)
bright blue.

LORE: Used to find
where Hank-Hemorrhage
was hiding or to
catch iron-overload.

IHC-Isaac (Immunohistochemistry)

(48)

STAT: Brown DAB signal /
Antibody-Antigen match

POWER: The Identity-Tag.
Uses Special-Key-Antibodies
to unlock the true name
of an anaplastic tumor.

LORE:
CD20+ = B-Cell-Brawler.
CK7+ = Epithelial-Elite.
Isaac never guesses;
he proves it.

The Y-Incision-Yoda

49

STAT: Primary opening
Shoulder to Pubis

POWER: The Total-Access.
Opens the Body-Box to
expose all the
organ-tenants.

LORE: The very first step
of the Somatic-Scan.
Everything starts with Yoda.

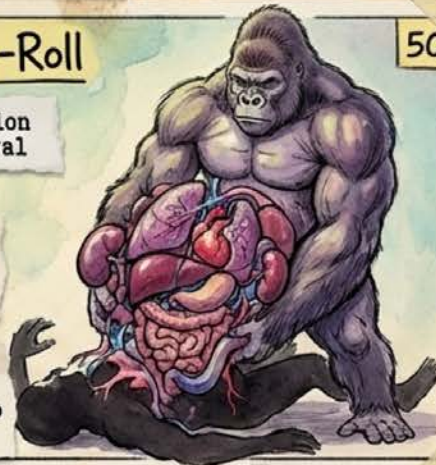

The Rokitansky-Roll

50

STAT: In-situ evisceration
Organ-block removal

POWER: The Block-Lift.
Removes all the tenants
in one connected piece.

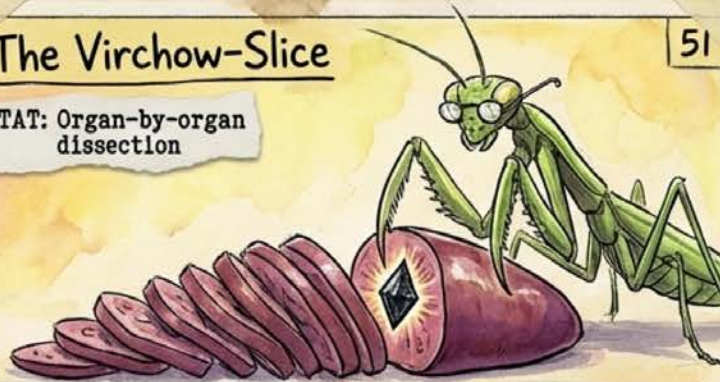

LORE: Preserves the
Connections to see if a
Bile-Bandit escaped into
the blood.

The Virchow-Slice

51

STAT: Organ-by-organ
dissection

POWER: The Detail-Cut. Takes
organs out one-by-one and slices
them to find Hidden-Scars.

LORE: The Old-School way.
Perfect for hunting tiny
pneumonias deep in the lung.

The Tox-Sieve (Toxicology)

52

STAT: Blood, Vitreous Humor,
Urine, Hair

POWER: The Ghost-Hunter.
Finds the Chemical-Saboteurs
the eyes can't see.

LORE: Vitreous-Humor is the
ultimate vault for sugar or
alcohol—it stays clean the longest.

KayfaBONGO!

Diagnosis?! KayfaBONGO! Stay fluffy—and always check the histology!

53 The Path-Attending (Doc FrizzleBob)

STAT: Board Certified / Microscope-Master

POWER: The Morphological-Oracle. The eyes see what the mind knows.

LORE: Is it inflammation, infarction, or infection? Show me the basement membrane!

54 Synthesis Quest 1: The Nutmeg Shadow

STAT: Liver-Hound + Fibrin Sheep + Wet-Lung

POWER: The Backwards Flow.

LORE: Identify the Pump-Failer (Cardio-Carl) and explain why the liver looks like a spice.

55 Synthesis Quest 2: The Silent Thief

STAT: Blowfish Burst + Crunchy Snake

POWER: The Plaque Pressure.

LORE: Explain the connection between the Pipe-Gunk and the Brain-Bleed in a Berry-Annie burst.

56 Synthesis Quest 3: The Golden Leak

STAT: Swelling Raccoon + MCD-Molly

POWER: The Melted Feet.

LORE: Identify the syndrome and name the character responsible for erasing the podocyte-feet.

Diagnosis?! KayfaBONGO! Stay fluffy—and always check the histology!
