

Georg von Westphalen

MEDKAYFAB ELEMENTAL WRESTLING THE ATOMIC ARENA

UNCLE FRIZZLEBOB'S
KRAZY KAYFABIZZARO
KOMIK KARDS

MASTER THE TABLE,
MASTER THE LIFE-CODE.
STAY FLUFFY!

CALL DOC FRIZZLE!
GW Georg v. Westphalen

Protonis (Hydrogen)

STAT: Group 1 | Period 1 | Ox: +1, -1

POWER: Gradient Mastery. Creates or collapses pH balance.

LORE: Drives mitochondrial ATP, rizing H⁺ crusher hemoglobin's oxygen affinity (Bohr Effect).

Oxyra (Oxygen)

STAT: Group 16 | Period 2 | Ox: -2

POWER: Vital Combustion. Sustains life via ATP, destroys via Oxidative Stress (ROS).

LORE: The final electron acceptor; sparks lethal reperfusion injury after ischemia.

Carbos (Carbon)

STAT: Group 14 | Period 2 | Tetravalent

POWER: Structural Sovereignty. Misfolding = structural disease.

LORE: Builds stable covalent backbones; replacing a single atom alters entire receptor affinities.

Nitros (Nitrogen)

STAT: Group 15 | Period 2 | Ox: -3 to +5

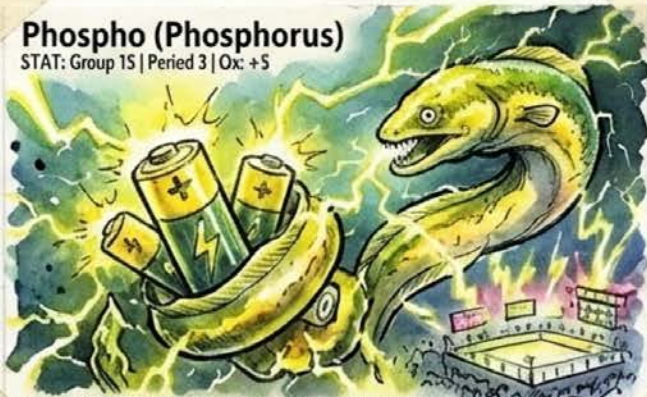

POWER: Protein Synthesis. Builds the Muscles of the cell.

LORE: High Urea indicates waste failure; negative N-balance is an ICU catabolic red flag.

Phospho (Phosphorus)

STAT: Group 15 | Period 3 | Ox: +5

POWER: Energy Transfer. Powers every cellular move.
LORE: The P in ATP; Refeeding Syndrome causes lethal serum drops.

Chlorax (Chlorine)

STAT: Group 17 | Period 3 | Ox: -1

POWER: Osmotic Balance & Killing. Balances Na^+ and makes immune bleach.
LORE: Drives the RBC Chloride Shift; hyperchloremia triggers metabolic acidosis.

What the
FLUFF?!

Sulfon (Sulfur)

STAT: Group 16 | Period 3 | Disulfide Bonds

POWER: Structural Stability. Holds the frame together.
LORE: Disulfide bridges lock insulin and keratin in place; breaking them denatures the cell.

Fluoro (Fluorine)

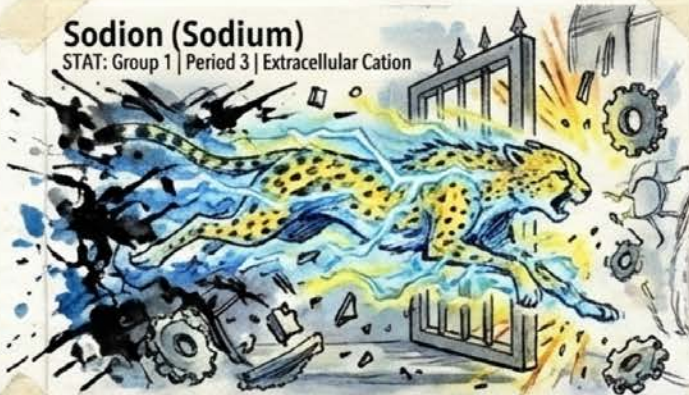

STAT: Group 17 | Period 2 | Ox: -1

POWER: Hardness Buff. Protects the dental arena.
LORE: Strengthens hydroxyapatite; excess causes mottled enamel (Fluorosis).

Sodion (Sodium)

STAT: Group 1 | Period 3 | Extracellular Cation

POWER: Electrical Trigger. Fires neurons; high Na^+ shrinks cells.
LORE: Drives action potentials; correcting too fast breaks the Mainframe-Brain.

Lithos (Lithium)

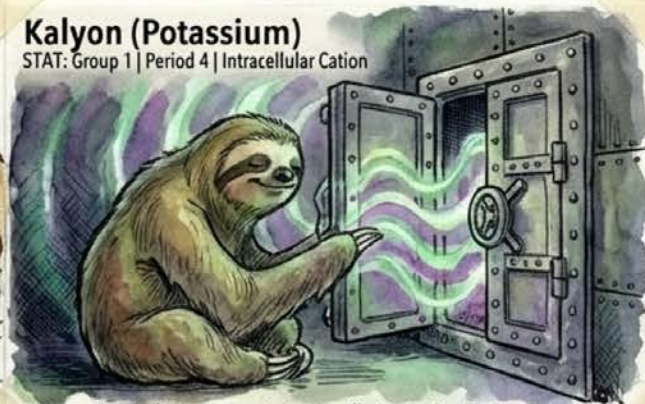

STAT: Group 1 | Period 2 | Smallest Alkali

POWER: Signal Dampening. Calms the Bipolar-Storm.
LORE: Mimics Na^+ in the brain; toxicity causes the shakes and renal crash if Na^+ intake drops.

Kalyon (Potassium)

STAT: Group 1 | Period 4 | Intracellular Cation

POWER: Electrical Reset. Hyperkalemia stalls the Cardiac Engine.
LORE: Defines resting membrane potential; insulin therapy drives it out of the serum.

Rubid (Rubidium)

STAT: Group 1 | Period 5 | Rare Trace

POWER: Tracer-Vision. Follows the K-Path to reveal perfusion gaps.
LORE: K-mimic used in PET scans to track hidden blood flow in the Heart:Engine.

KayfaBIZARRO!

Mag-the-Magnet (Magnesium)

STAT: Group 2 | Period 3 | Enzyme Co-factor

POWER: Relaxation & Stability. Low Mag triggers Torsades-the-Twist.

LORE: Powers 300+ enzymes; acts as the natural antidote for Eclampsia seizures.

Calcion (Calcium)

STAT: Group 2 | Period 4 | Signaling Ion

POWER: Signal-to-Action. Low Ca causes The Tetany-Twitch.

LORE: Universal second messenger driving contraction, neurotransmitters, and coagulation.

Stronto (Strontium)

STAT: Group 2 | Period 5 | Ox: +2

POWER: Matrix-Reinforcement. Increases bone density but confuses Calcion.

LORE: Behaves like Calcion; radioactive Sr-90 is lethally toxic to the Marrow-Factory.

Baros (Barium)

STAT: Group 2 | Period 6 | Heavy Metal

POWER: The Opaque-Painter. Coats the GI-Tunnel to reveal ulcers.

LORE: Toxic if absorbed, safe as an insoluble sulfate Chalky-Drink to block X-rays.

**Diagnosis?!
BLÖDSINN!**

GW

Georg v. Westphalen

Ferrox (Iron)

STAT: Transition Metal | Ox: +2, +3

POWER: Gas Transport. Fuels the arena; Anemia = System Hypoxia.

LORE: The heart of Hemoglobin; Heme vs. Non-Heme absorption dictates bio-availability.

Zinco (Zinc)

STAT: Transition Metal | Ox: +2

POWER: Gene Expression. Zinc-Fingers hack the DNA code.

LORE: Runs 2000+ transcription factors; deficiency causes Acrodermatitis and taste loss.

Cupros (Copper)

STAT: Transition Metal | Ox: +1, +2

POWER: Energy Linkage. Bridges Iron and Oxygen; high Cu = Wilson's disease.

LORE: Powers Cytochrome C; toxicity leaves Kayser-Fleischer rings in the Eye-Arena.

Mangas (Manganese)

STAT: Transition Metal | Ox: +2 to +7

POWER: Antioxidant Shield. Defends against ROS Oxyra-Fragments.

LORE: Superoxide dismutase co-factor; toxicity mirrors Parkinson's-Tremor.

Cobo (Cobalt)

STAT: Transition Metal | Ox: +2, +3

POWER: Nerve Protection. Missing Cobo melts the Myelin-Sleeve.
LORE: Central atom of B12; deficiency causes Megaloblastic (Macro-klaX) anemia and stumbles.

Nickus (Nickel)

STAT: Transition Metal | Ox: +2

POWER: The Contact Riot. Master of triggering Type IV hypersensitivity.
LORE: Not biologically required; the undisputed champion of Jewelry-Dermatitis.

Moly (Molybdenum)

STAT: Transition Metal | Ox: +4, +6

POWER: Waste Processing. Clears DNA debris; excess causes Gouty-George-Grit.
LORE: Essential for Xanthine oxidase to process purine Waste-Code into Uric Acid.

Chromo (Chromium)

STAT: Transition Metal | Ox: +3, +6

POWER: Glucose Potentiator. Enhances Insu-the-Key for cell entry.
LORE: Regulates the Sugar-Stat; beware the Hexavalent form—it is a Mutagenic-Vandal.

Stay fluffy!

Stay fluffy!

Ioda (Iodine)

STAT: Group 17 | Period 5 | Ox: -1

POWER: Metabolic Throttle. Controls the Speed-of-the-Match.

LORE: Builds T3/T4; deficiency stalls the engine and swells the neck (Hypo-Hanna-Goiter).

Helios (Helium)

STAT: Noble Gas | Group 18 | Period 1

POWER: Easy Flow. Reduces the Work-of-Breathing.

LORE: Low density turns turbulent storms into laminar breezes to bypass Airway-Clogs.

Bromos (Bromine)

STAT: Group 17 | Liquid Halogen

POWER: Systemic Dampening. Calms nerves but triggers Bromism delirium.

LORE: Competes with Chlorine; phased out as a sedative for safer Benzo Mind-Mutes.

Xenos (Xenon)

STAT: Noble Gas | Group 18 | Period 5

POWER: The Perfect-Sleep. Neuroprotective NMDA-antagonist anesthetic.

LORE: Induces a Mind-Mute without the Heart-Halt side effects for high-risk ICU wrestlers.

Seleno (Selenium)

STAT: Nonmetal | Period 4 | Selenocysteine

POWER: Radical Neutralization. Disarms ROS before they rip the cell membrane.
LORE: Heart of Glutathione Peroxidase; deficiency leads to Keshan Disease cardiomyopathy.

Arseno (Arsenic)

STAT: Metalloid | Group 15 | Ox: +3, +5

POWER: The Metabolic Mimic. Yields zero energy, starving the cell in a sea of fuel.
LORE: Sabotages ATP and Pyruvate Dehydrogenase; causes garlic breath and Mees-lines.

Silica (Silicon)

STAT: Metalloid | Group 14 | Period 3

POWER: Structural Integrity. Excess (inhaled) causes Silico-the-Lung-Grinder.
LORE: Crucial for collagen crosslinking; inhaling it grinds the lungs into fibrosis.

Boros (Boron)

STAT: Metalloid | Group 13 | Period 2

POWER: Mineral Regulation. Keeps the Bone-Stat steady.
LORE: Regulates Calcium and Magnesium; key player in post-menopausal bone health quests.

KayfaBOGGLE!

GW

Georg v. Westphalen

KayfaBONGO!

Mercurio (Mercury)

STAT: Transition Metal | Liquid | Ox: +1, +2

POWER: The Mainframe-Corrosive. Shatters Enzyme-Gears.
LORE: Binds sulphydryl groups; organic methyl-mercury triggers Mad-Hatter tremors.

Plumbos (Lead)

STAT: Post-Transition Metal | Ox: +2

POWER: The Anemia-Artist. Stops Iron from entering the Hemoglobin-Ring.
LORE: Inhibits Ferrochelatase; causes basophilic stippling, lead lines on gums, and wrist drop.

Cadmo (Cadmium)

STAT: Transition Metal | Group 12 | Period 5

POWER: The Filter-Destroyer. Accumulates in Renal-Tubes.
LORE: Mimics Zinc; leaches bone minerals causing Itai-Itai (Ouch-Ouch) bone pain. High risk for smokers.

Argentos (Silver)

STAT: Transition Metal | Ox: +1 | Anti-bacterial

POWER: The Microbial-Bum. Destroys bacterial cell walls on contact.
LORE: Toxic to prokaryotes; excess in humans deposits permanently in skin under sunlight (Argyria).

Platinos (Platinum)

STAT: Transition Metal | Ox: +2, +4

POWER: The Rebellion-Stopper. Cross-links DNA (Cisplatin) to stop division.
LORE: High-power Chemo-Artillery triggering apoptosis; beware deafness and kidney-failure side effects.

Vanad (Vanadium)

STAT: Transition Metal | Ox: +2 to +5

POWER: The Insulin-Proxy. Activates the insulin receptor without insulin.
LORE: An insulin-mimetic investigated for Diabetes-Quests, but limited by heavy metal toxicity.

Aurum (Gold)

STAT: Transition Metal | Ox: +1, +3

POWER: The Immune-Mute. Calms the Joint-Riot.
LORE: Chrysotherapy inhibits macrophages; mostly replaced today by modern Biologic-Brawlers.

Stannos (Tin)

STAT: Post-Transition Metal | Group 14 | Period 5

POWER: The Surface-Seal. Blocks Acid-Assassins from the tooth-pulp.
LORE: Used as Stannous Fluoride; outperforms Sodium Fluoride for Gingivitis-Defense.

HUMBUG!

Gado (Gadolinium)

STAT: Lanthanide | Paramagnetic | Period 6

POWER: The Signal-Booster. Highlights Blood-Brain Barrier leaks.
LORE: Must be chelated to prevent toxicity; deadly NSF risk in Nephro-Ray-Failure patients.

Thallo (Thallium)

STAT: Post-Transition Metal | Period 6

POWER: The K-Infiltrator. Mimics Potassium to enter the heart, then halts it.
LORE: Lethal poison causing extreme neuropathy and massive hair loss (Hair-Loss-Halt).

What the
FLUFF?!

Techno (Technetium)

STAT: Transition Metal | Radioactive (^{99m}Tc)

POWER: The Meta-Radar. Attaches to supply trains for SPECT-Imaging.
LORE: Short 6-hour half-life; the undisputed Gold-Standard for Bone-Scan quests.

Uranos (Uranium)

STAT: Actinide | Radioactive | Period 7

POWER: The Nephron-Smasher. Chemically toxic long before radiation hits.
LORE: Depleted Uranium is primarily a chemical threat that obliterates the proximal tubules.

Berylllos (Beryllium)

STAT: Alkaline Earth Metal | Group 2 | Period 2

Diagnosis?!

POWER: The Metal-Allergy. Dust triggers a Chronic-Immune-Riot.

LORE: Mimics Magnesium but causes system lag; Berylliosis mimics Sarcoid-the-Scar on X-rays.

Antimos (Antimony)

STAT: Metalloid | Group 15 | Period 5

POWER: The Energy-Starver. Cuts off glycolysis fuel to the Micro-Punks.

LORE: First-line move (Sodium Stibogluconate) against Leishmaniasis (Leish-the-Skin-Eater).

Titan (Titanium)

STAT: Transition Metal | Group 4 | Period 4

POWER: The Bone-Bonder. The immune system ignores it.

LORE: Highly bio-inert; the champion material for joint replacements and Osseointegration.

Cesio (Cesium)

STAT: Alkali Metal | Group 1 | Period 6

POWER: The Rhythm-Hacker. Mimics Potassium but causes massive QT-Interval-Stretch.

LORE: Ingestion leads to Torsades-de-Pointes; Cs-137 is a long-term fallout vandal.

AAS-the-Metal-Counter

STAT: Atomic Absorption Spectroscopy

POWER: The Trace-Revealer. Finds a single lead speck in a blood pool.
LORE: Uses light to see the specific Atomic-Signature of elements.

The Chelator-the-Cage

STAT: EDTA, Penicillamine, Desferrioxamine

POWER: The Metal-Grabber. Cages toxic Trace-Titans and drains them out.
LORE: Prevents unbound metals from vandalizing enzymes during Chelation Therapy.

pH-the-Log-Scale

STAT: $\text{pH} = -\log[\text{H}^+]$

POWER: The Acid-Meter. pH 7.4 is the Equilibrium-Zone.
LORE: It is logarithmic; a tiny number shift means a massive change in Protonic power.

Electronegativity-Scale

STAT: Pauling Scale (0 = 3.44, Na = 0.93)

POWER: The Electron-Thief-Score. Predicts who steals the charge.
LORE: High score dictates the ultimate thief; fundamentally dictates ionic vs. covalent bonding.

KayfaBIZARRO!

Doc FrizzleBob (The Attending)

STAT: Master Alchemist

POWER: The Atomic-Balancer.
LORE: Master the elements or the wrestling ring collapses into dust! Are the protons flowing? Stay fluffy!

Synthesis Quest 1: Acid-Base Brawl

STAT: Lung-Drown (CO2 buildup)

POWER: The Chloride Shift.
LORE: When Proton-Army levels skyrocket, the Acid-Base-Shield (Chlorine) must balance the shift.

Synthesis Quest 2: The Rusting Liver

STAT: Hemochromatosis

POWER: Clearing the Rust.
LORE: Bronze skin + failing liver = Oxygen-Bearer gone rogue; requires Chelator-the-Cage to fix.

Synthesis Quest 3: The Spark-Failure

STAT: Peaked-Mountains (ECG)

POWER: Gate-Stabilizer.
LORE: K-rich diets + Kidney stalls = Lethal Reset-Current. Calcium is the shield to protect the heart-wires.

Call Doc Frizzle!

Stay fluffy!
